## Want to save energy? Baelz offers solutions worldwide.

Baelz is a family-owned enterprise with over a century of tradition and experience, based in Heilbronn, Germany. Baelz technologies are geared towards innovation for the economical use of energy and resources. Thanks to our commitment to continuous development and improvement, Baelz components and products for control, heat and cold engineering are in operation worldwide.

### Control Valves for Industry and Building Services

#### Baelz-electrodyn®

Electrically and pneumatically operated **control valves from DN15 to DN300** for water, steam, thermal oil, hot water, condensate, oxygen, nitrogen and many other media. Baelz control valves have a far superior design and long service life because they are built with decades of Baelz experience as developer of thermal systems, making Baelz a competent partner when it comes to selecting and designing valve housings and drives for specific applications

### Controlled Ejectors for Fluids

#### Baelz-hydrodynamic®

#### Jetomat®

Baelz ejectors offer durability and excellent value for money with long service lives and low maintenance. Installations are reliable, energy-economical and cost-effective to run.

### Heat Exchangers

#### Baelz-thermodynamic®

Baelz offers a wide range of heat exchangers for all types of plant in HVAC, district heating and industry. Suitable heat transfer media are steam, heating and hot water and thermal oil.

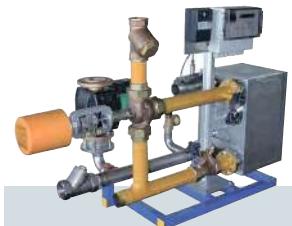

Our in-house production in Germany enables us to manufacture individual, customized solutions using unique modular systems. We supply heat exchangers, steam generators with straight, U-shaped and spiral tubing or fixed tube bundles in either vertical or horizontal design.

## System Solutions - Water

### Baelz-hydrodynamic®

System solutions can be individual components or compact units, pre-assembled and ready-wired to suit customer requirements. They are ready to operate upon delivery, eliminating time-consuming installation work on site and saving money for the customer.

## System Solutions - Steam

### Baelz-thermodynamic®

#### Steam Terminal®

Wherever steam is used, there are potential energy savings which can be realized by our versatile system solutions. These are fully piped and wired, insulated and skid-mounted as required.

## System Solutions - Absorption Refrigeration

### Baelz-absorpdynamic®

These are medium-range compact and energy efficient heat-operated refrigeration systems. Possible sources of heat are power plants, local and district heating networks, solar-powered systems or industrial waste heat. The use of low feed temperatures from 55°C enables the use of excess heat. Available with power outputs of up to 500 kW.

## Closed-Loop Systems

### Baelz-electrodyn®

#### Pilot®

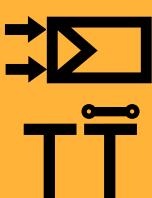

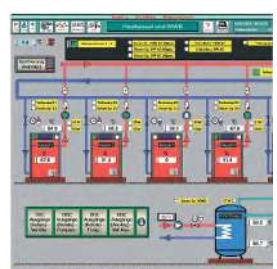

Baelz closed-loop controllers with internally developed hardware and software are designed for intelligent control and automation in industry and building services, optimizing efficiency in the generation, consumption and conversion of energy. All Baelz Touchpilot controllers are touch screen operated.

## Central Control Systems

### Baelz-electrodyn®

The WinBAS universal software package for Baelz building and plant control technology is flexible, adaptable and modular. It offers all the options necessary for comprehensive automation concepts in buildings and industry.

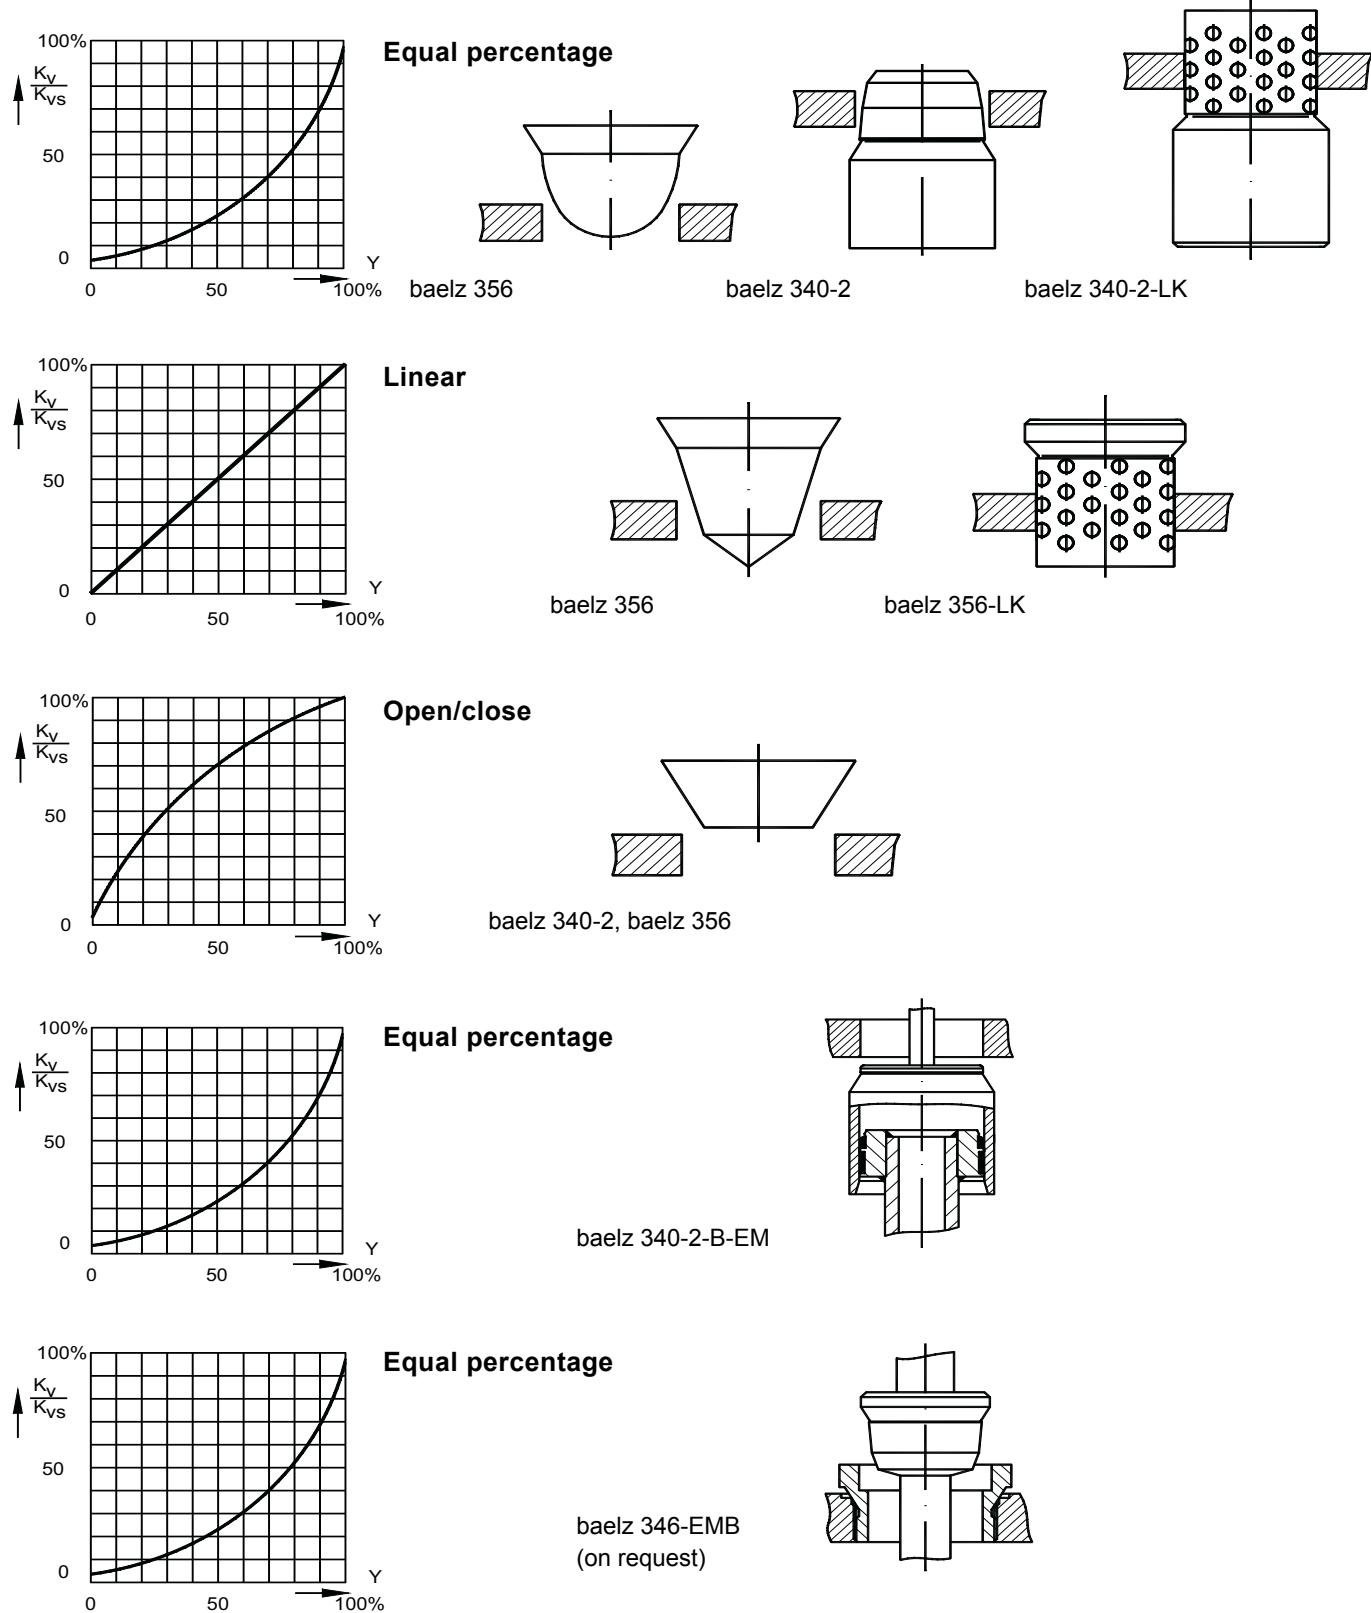

## 1.1 Product Identification - Valves

Example of identification for ordering: Baelz 340-2-B-TK-DN50-PN16-Kvs10-Skr-spheroid ductile iron

## Baelz Surface Treatments for Valves and Ejectors

	<b>Standard coating</b>	<b>Enhanced corrosion protection (surcharge)</b> Order-No.: MP-KORROSIONSSCHUTZ
<b>Product for surface treatment</b>	High-temperature-resistant aluminium paint	Gray zinc-rich paint + topcoat "white aluminium"
<b>Description / Applications</b>	Oil-free synthetic resin aluminium paint as a protective coating for hot surfaces (boilers, heating systems etc.)	Coating based on specially modified synthetic resins for chemical, heat and corrosion resistance in machine and plant construction.
<b>Properties</b>	Heat and weather-resistant coating. Weathering can affect the mechanical resistance of the coating. Not resistant to fats, oils, mineral oils, benzines, salts, alcoholic liquids, acids and alkalis.	Corrosion protection category 3 according to DIN EN ISO 12944. Good adhesion to steel. Resistant to corrosive and aggressive substances.
<b>Temperature resistance</b>	In dry, indoor spaces up to 500 °C. At 500 °C no silicone constituents are released.	Resistant to sustained temperature 200 °C Short-term resistant to a temperature of 250°C
<b>Color</b>	Metallic aluminium gloss	Metallic aluminium gloss

**Fu/SB** = spring below / **FSR** = fail-safe retracts → in case of air/power supply failure actuator retracts spindle  
**Fo/SA** = spring above / **FSE** = fail-safe extends → in case of air/power supply failure actuator extends spindle

2-way valves have two possible fail-safe positions:

spindle retracted = valve closed and  
spindle extended = valve closed.

Direction of action **NC** (normally closed):  
Direction of action **NO** (normally open):

air / power failure → valve **closed**  
air / power failure → valve **open**

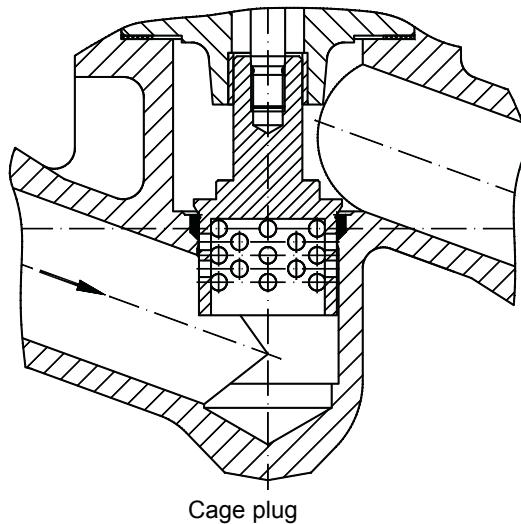

Fail-Safe Positions of Baelz Valves and Ejectors in Case of Air / Power Supply Failure dependent upon the configuration of the actuator			
Air / power supply failure: valve closed (NC)			Air/power supply failure: Way A-AB closed*
2-way valves SB / FSR	2-way valves SA / FSE	all ejectors SA / FSE	all Baelz 3-Way valves SB / FSR
<b>actuator spindle retracted</b>			
<b>NC</b> 			 A      AB B
<b>actuator spindle extended</b>			
	<b>NC</b> 	<b>NC</b> 	 A      AB B
340-2	340-2-AI	471	335
331	185	472	342-2
334	344	475	347-2
365	346	480	347-2-AI
	350	485	354
	356	590	367
	358	591	
	359		

\*If the B-AB way of 3-way valves is to be closed in case of air/power supply failure:  
To reverse direction of action → Select an Fo/SA actuator (pneumatic) / FSE actuator (electric).

### Examples of solutions for noise reduction:

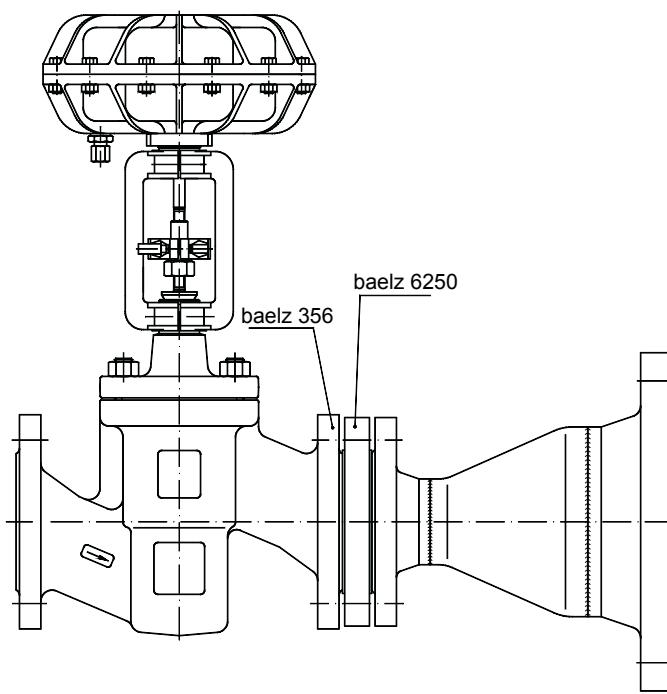

#### 1. Cage plug LK

The LK cage plug is available for all valve series and is effective against noise and cavitation. The parabolic plug is replaced by the cage plug, which changes the direction of flow and divides it into several currents through smaller openings.

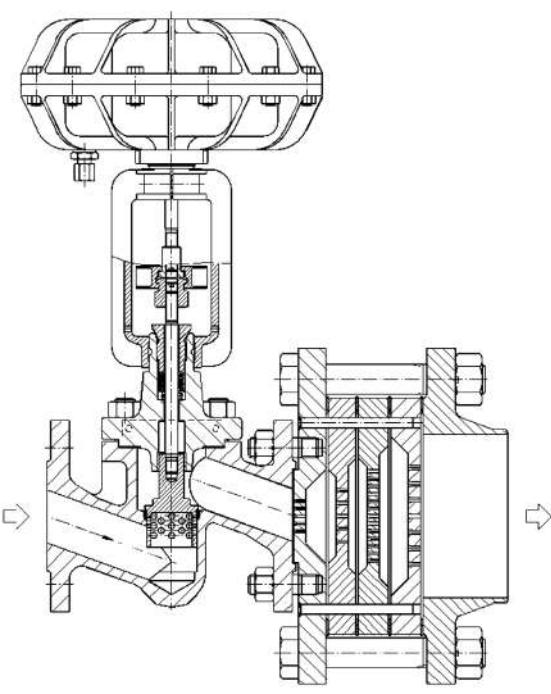

#### 2. Valve with baelz 6250 orifice plate for noise reduction

The baelz 6250 orifice plate protects the valve against damage caused by excessive pressure drop and has a noise-damping effect. The orifice plate is connected downstream from the valve and absorbs most of the pressure drop. Thus, the cheap orifice plate is "sacrificed" to prevent damage to the expensive valve.

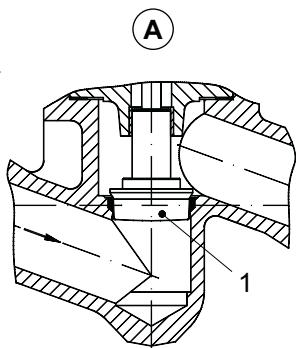

Example of mounting a baelz 6250 noise-damping disk in the pipeline

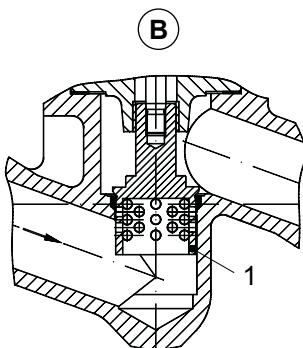

Example of mounting several baelz 6250 noise-damping disks in the pipeline

### 3. Noise damping and prevention of cavitation with balanced and unbalanced plugs

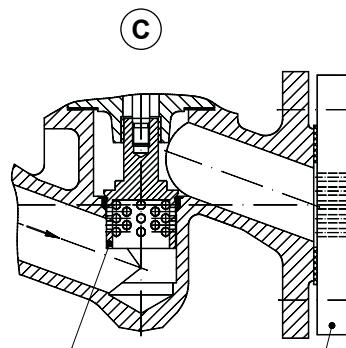

#### Unbalanced plug

1. Parabolic plug

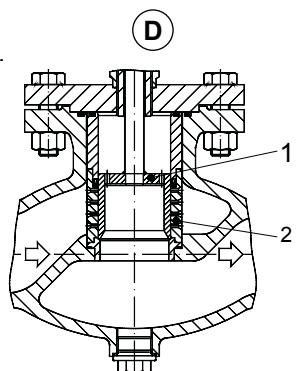

1. Cage plug

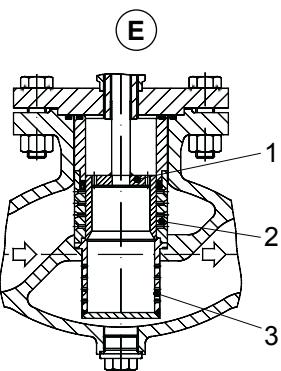

1. Cage plug  
2. Noise damper (perforated disk)

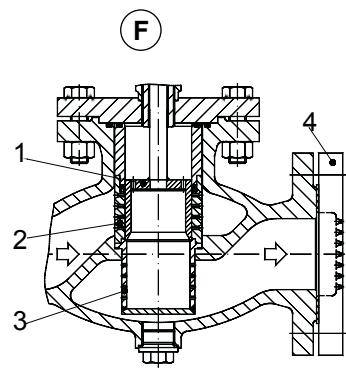

#### Balanced pressure plug

1. Plug  
2. Seat

1. Plug  
2. Seat  
3. Cage

1. Plug  
2. Seat  
3. Cage  
4. Noise damper

#### Determination of the noise level and cavitation for control valves

##### Application for hot water (and condensate)

Temperature  $T_v = 120^\circ\text{C}$   
Inlet pressure  $P_1 = 6$  bar absolute outlet pressure  $P_2 = 3$  bar absolute  
saturation pressure  $P_v = 2$  bar absolute vapor pressure at temperature  $T_v$

150 °C  
16 bar abs.  
5 bar abs.  
4.8 bar abs.

Fig.	A	B	D	A	B	C	D	E
<b>Cavitation</b>	Yes	No	No	Yes	Yes	No	Yes	No
<b>Noise reduction dB</b>	0	30	30	0	6	31	20	31
<b>Compared to c XF*</b>	<0.2	$0.2 < X_F < 0.5$	$0.5 < X_F < 0.75$	<0.2	$0.2 < X_F < 0.5$	$0.2 < X_F < 0.5$	$0.2 < X_F < 0.5$	$0.75 < X_F$

\* XF = ratio of the differential pressure for liquids  $X_F = P_1 - P_2 / P_1 - P_v$

##### Application for steam

Inlet pressure  
Outlet pressure

## baelz 185

### DESCRIPTION

The baelz 185 is a versatile DN 15 microflow control valve for low flow rates with integrated strainer and stainless steel housing.

Provided with 6 holes („VA“ and „VU“, page 15) with G1/2" thread, for connecting accessories:

- Pneumatic or electric actuator
- Solenoid valve
- Manual isolating valve
- Direct-acting pilot valve
- Safety valve
- Pressure sensor or temperature sensor
- Drain valve or ball valve

### TECHNICAL SPECIFICATIONS

Housing material - stainless steel 1.4021

Connection type: flange EN 1092-2; EN 1092-1 Shapes D / E / F on request.  
Plug type: Tapered plug, PTFE soft seal plug

Additional options:

- baelz 260st single or double manual valves for filter cleaning
- Plug soft seal

Working fluids: water, hot water, steam

### Leakage class (EN 1349)

metal-to-metal seal: 0.004% Kvs (better than class IV)  
with PTFE plug: 0.001% Kvs (better than class VI)

	Stroke		Spindle diameter
	DN15	16 mm	10 mm

Options	Special features	T max. / P max.	Designation
Plug	Stainless steel 1.4571 (standard)	240 °C / 40 bar ... 50 °C / 40 bar	baelz 185
	Stainless steel 1.4571 + PTFE (PTFE)	240 °C / 40 bar ... 50 °C / 40 bar	MP185-TK-15
Spindle seal	V-rings in PTFE (standard)	240 °C / 40 bar ... 50 °C / 40 bar	baelz 185

## baelz 340-2

### DESCRIPTION

The baelz 340-2 is a 2-way control valve in a 3-way housing for industrial applications. Several plug variants allow utilization for different control tasks.

### TECHNICAL SPECIFICATIONS

Connection type: Flange EN 1092-2; EN 1092-1 Shapes D / E / F on request.  
 Plug type: parabolic plug, special plug, cage plug  
 Control characteristic: equal percentage, linear  
 Working fluids: liquids, gases, water, steam, thermal oil, etc.

Please note: New valve series!  
 Altered value for h2 marked in table of dimensions (s. page 22).

#### Leakage class (EN 1349)

metal-to-metal seal: 0.004% Kvs (better than class IV)  
 with PTFE plug: 0.001% Kvs (better than class VI)

	Stroke (mm)	Spindle diameter (mm)
DN 15 - DN 25	12	10
DN 32 - DN 125	22	10 (16*)
DN 150	44	22
DN 200 - DN 300	66	

\*\* for baelz 340-2-B-EMF DN 100, DN 125

	Options	Designation**
Plug	Parabolic plug (standard)	baelz 340-2-B...
	Balanced	baelz 340-2-XX-EMF
	Cage plug	MP340-LK...
	Reduced Kvs	MP340-SKR...
	With PTFE soft seal plug (max. 200°C)	MP340-TK...

## baelz 344

### DESCRIPTION

The baelz 344 is an industrial 2-way control valve. The stainless steel housing allows utilization under demanding operating conditions.

### TECHNICAL SPECIFICATIONS

Connection type: Flange EN 1092-2; EN 1092-1 Shapes D / E / F on request.  
 Plug type: parabolic plug / conical  
 Control characteristic: equal percentage, linear, OPEN / CLOSED  
 Working fluids: liquids, water, thermal oil, steam, gases

#### Leakage class (EN 1349)

metal-to-metal seal: 0.004% Kvs (better than class IV)  
 with PTFE plug: 0.001% Kvs (better than class VI)

	Stroke (mm)	Spindle Ø (mm)
DN 65	22	10
DN 80	22	10
DN 100, DN 125	22	16
DN 150	44	22

	Options	Designation
<b>Plug</b>	Parabolic plug (standard)	baelz 344...
<b>Spindle seal</b>	V-rings in PTFE standard	baelz 344...
	Cooling tube	MP344-K
<b>Additional options</b>	Cooling tube + double-walled stainless steel bellows seal	MP344-SS...
	V-shaped seal heating (for fluids at temperatures of - 10 to - 40°C) Pmax. 20 W; 12-24 V / 110-230 V AC/DC	baelz 85950...
	Version for drinking water	MP344-Twg

## baelz 358-K / 359-K

### DESCRIPTION

The baelz 358-K and 359-K control valves are 2-way valves with cooling tube for systems with high temperatures and pressures.

### TECHNICAL SPECIFICATIONS

Connection type: Flange EN 1092-2; EN 1092-1 Shapes D / E / F on request.

Plug type: parabolic plug / conical

Control characteristic: equal percentage, linear, OPEN / CLOSED

Stroke - 16 mm / 22 mm

Working fluids: liquids, gases, water, steam

### Leakage class (EN 1349)

metal-to-metal seal: 0.004% Kvs (better than class IV)

### Housing material baelz 358-K, baelz 359-K

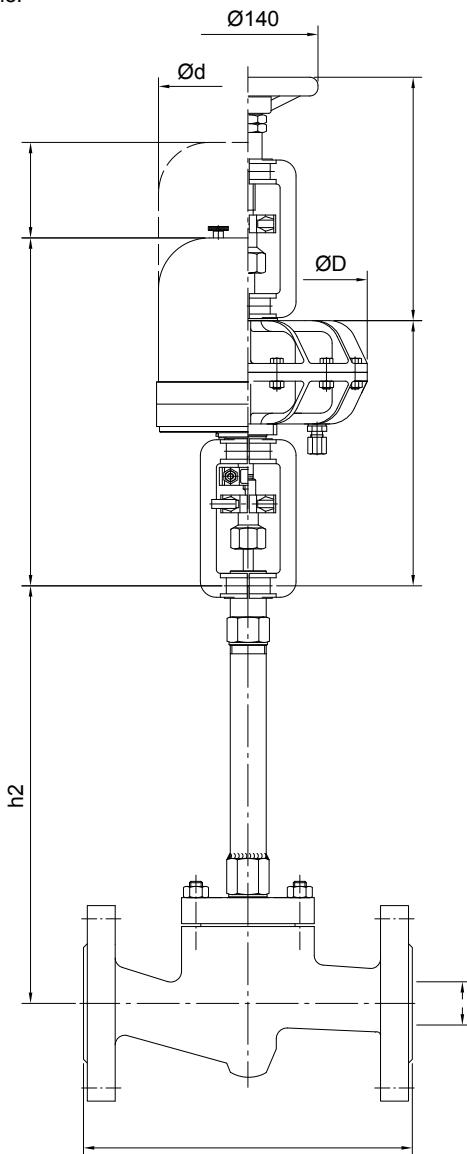

Nominal width	DN 15...DN 25	from DN 32
Housing material 358-K	Steel 13CrMo4-5 - 1.7335	Cast steel G17CrMo5-5 - 1.7357
Housing material 359-K	Steel P250GH - 1.0460	GP240GH+N - 1.0619+N

### T max. (°C) / P max. (bar)

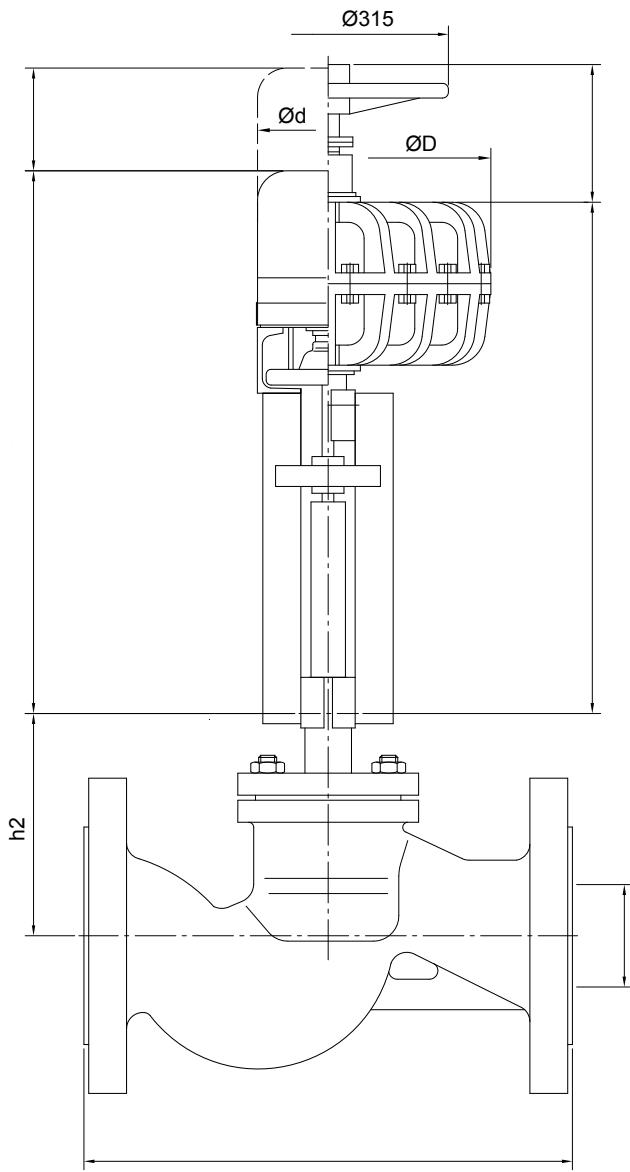

Nominal pressure	PN 63	PN 100	PN 160

## baelz 365

### DESCRIPTION

The baelz 365 ANSI 300 valve is a flanged and pressure rated 2-way control valve in accordance with US ANSI / ASME standards.

### TECHNICAL SPECIFICATIONS

Connection type: ASME / ANSI B16.5 flange

Plug type: parabolic plug

Control characteristic: equal percentage

Working fluids: liquids, gases, water, steam, thermal oil

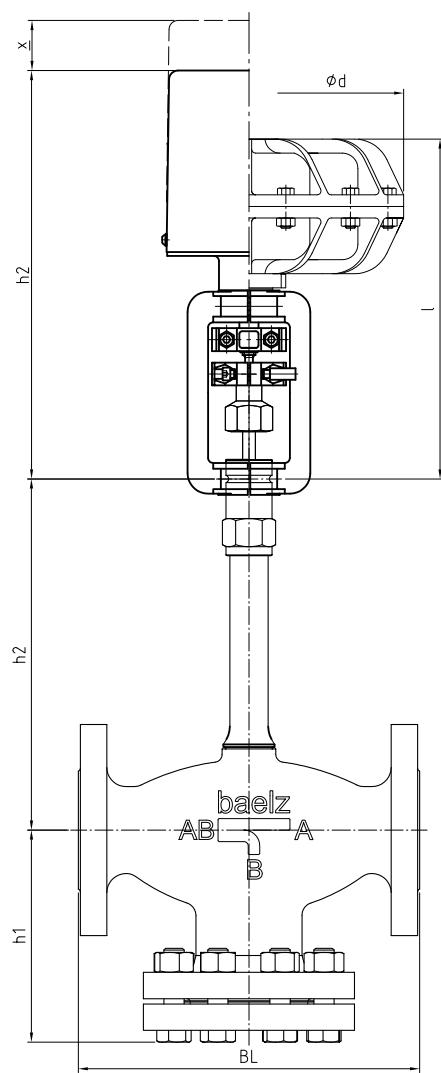

### Leakage class (EN 1349)

metal-to-metal seal: 0.004% Kvs (better than class IV)

Technical Specifications		Designation
<b>Housing material</b>	1.0619 (1.0432) / SA216WCB (SA105)	
<b>T max. / P max.</b>	650 °F/362 psi; 100 °F/362 psi   343 °C/25 bar; 38 °C/25 bar	
<b>Plug</b>	Parabolic plug (standard)	baelz 365-K-SS
<b>Cooling tube / Spindle seal</b>	V-rings in PTFE standard Cooling tube + double-wall stainless steel bellows and safety gland	
<b>Additional options</b>	V-shaped seal heating (for fluids at temperatures of - 10 to - 40°C) Pmax. 20 W; 12-24 V / 110-230 V AC/DC	baelz 85950...

<sup>+</sup> with yoke S41/with yoke S41C

\* dimensions, see actuator E65, page 103

**Maximum differential pressure  $\Delta P_{max}$  (bar) at which the actuator closes the valve completely**  
The differential pressures specified here are limited by the nominal pressure of the housings, if this is lower.

**Electric actuators. Plug closes against the flow.**

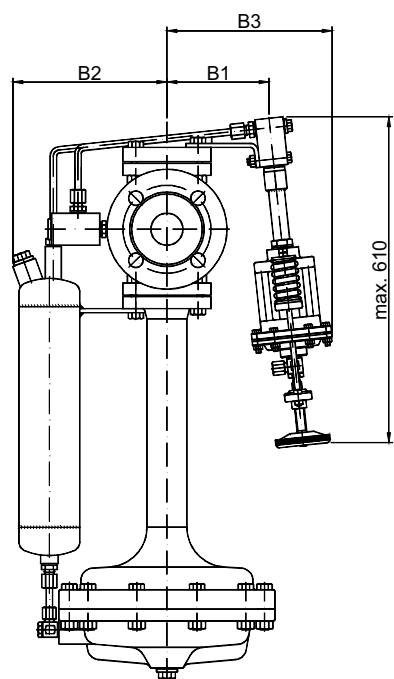

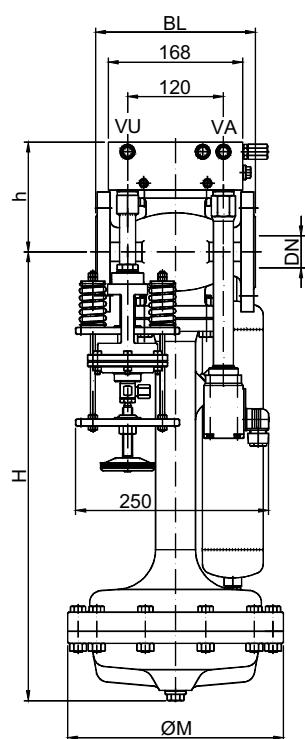

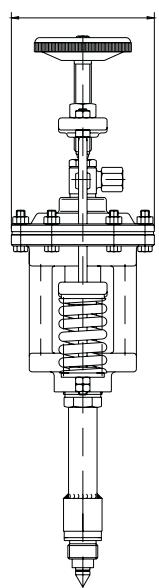

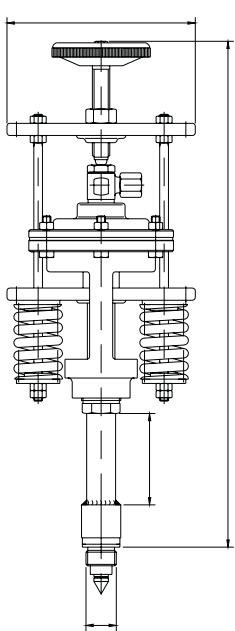

**Pneumatic actuators (OPG) closed without compressed air. Plug closes against the flow.**

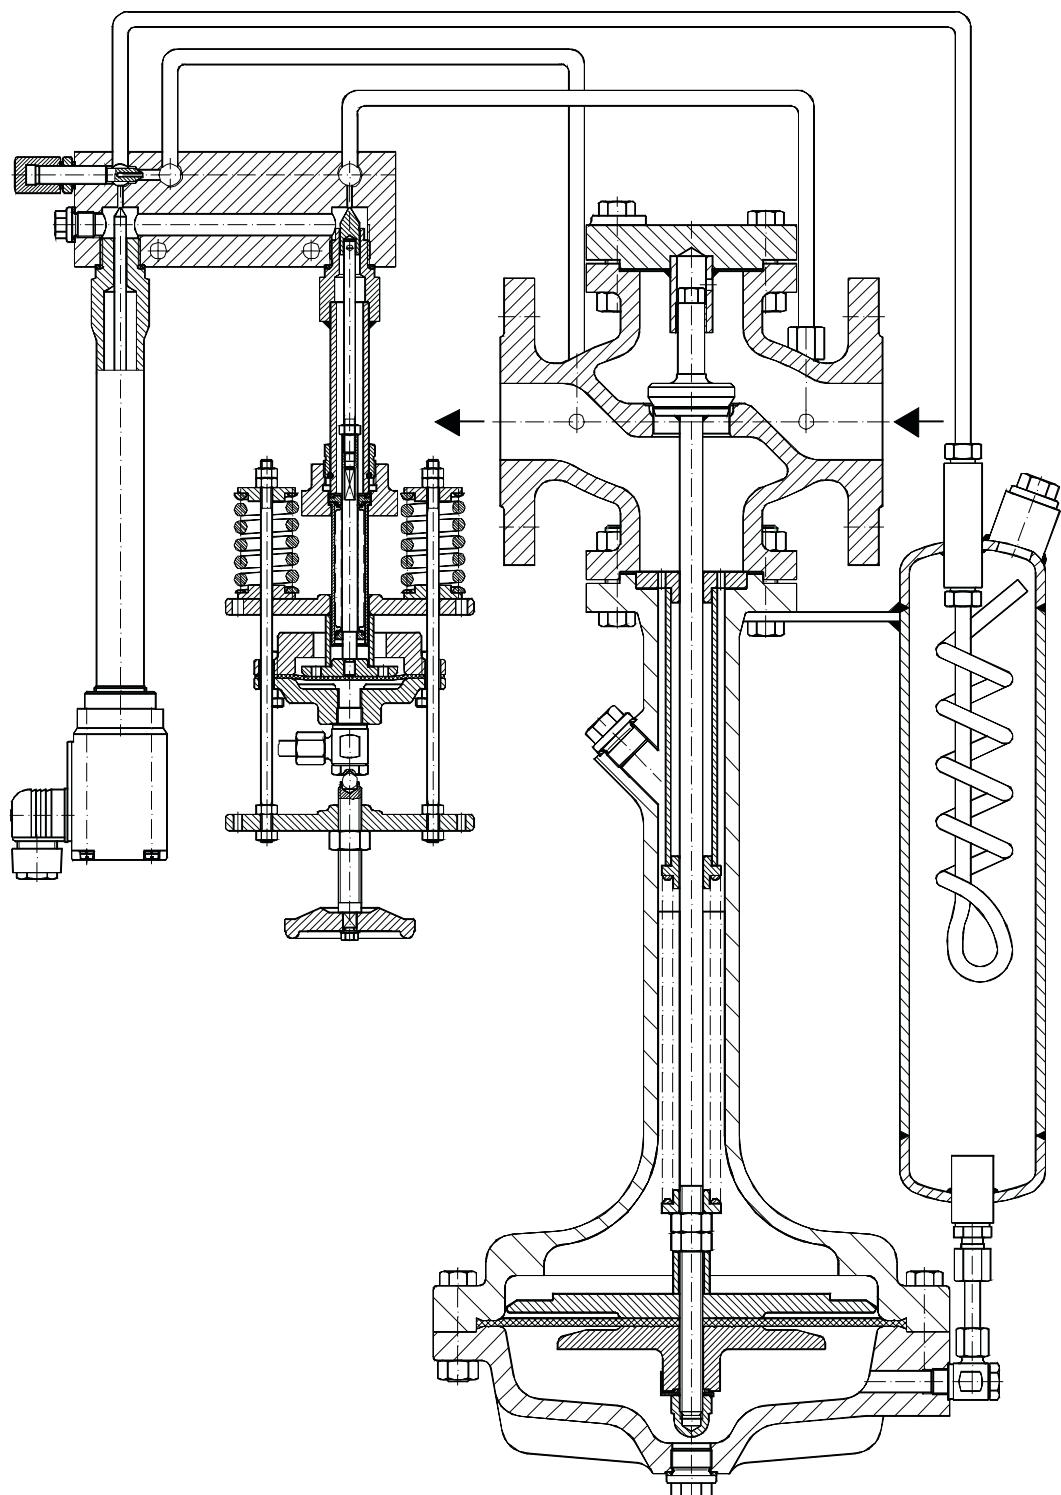

Please note that actuators utilized as safety devices as defined by the Pressure Equipment Directive (PED 2014/68) are subject to certification.  
Certification costs on request.

## baelz 335

### DESCRIPTION

The baelz 335 is a 3-way control valve with red brass housing for heating, ventilation and air conditioning systems.

### TECHNICAL SPECIFICATIONS

Connection type: external thread / for welding

Plug type: standard control plug with slot (lantern shape)

Control characteristic: linear

Stroke: 12 mm

Additional option: silicone seal

Working fluids: water, hot water, steam

### Leakage class (EN 1349)

Straight way (A-AB): 0.004 % Kvs (better than class IV)

Angle way (B-AB): 2 % Kvs (class I)

	Options	Designation
Plug	Stainless steel 1. 4571 standard	baelz 335-1
Spindle seal	V-rings in PTFE standard	baelz 335-1

## baelz 347-2

### DESCRIPTION

The baelz 347-2-B is a universal 3-way valve in a globe housing. Industrial use: The variety of plug variants and the highly precise tightness tolerances allow utilization of the valve for the solution of complicated control tasks.

### TECHNICAL SPECIFICATIONS

Connection type: Flange EN 1092-2; EN 1092-1 Shapes D / E / F on request.

Plug type: parabolic plug with slit

Control characteristic: linear

Working fluids: steam, gas, liquids, thermal oil

Please note: New valve series!  
Altered value for h2 marked in table of dimensions (s. page 22).

### Leakage class (EN 1349)

metal-to-metal seal: 0.004% Kvs (better than class IV)  
with PTFE plug: 0.001% Kvs (better than class VI)

slit plug

## baelz 353 / 354

### DESCRIPTION

baelz 353 and baelz 354 are industrial 3-way control valves. The stainless steel housing allows utilization under demanding operating conditions.

### TECHNICAL SPECIFICATIONS

Connection type: Flange EN 1092-2; EN 1092-1 Shapes D / E / F on request.

Type of plug: parabolic plug with slot

Control characteristic: linear

Working fluids: liquids, water, thermal oil, steam, gases

Leakage class (EN 1349)	
Straight way (A-AB)	0.004 % Kvs (better than class IV)
Angle way (B-AB)	0.004 % Kvs (better than class IV)

Stroke (mm)			Spindle Ø (mm)
baelz 353	DN 15-25	12	10
baelz 353	DN 32-65*	22	
baelz 354	DN 80-125*	22	

\* DN 150 with stroke 44 mm on request

## baelz 367

### DESCRIPTION

The baelz 367 ANSI 300 valve is a flanged and pressure rated 3-way control valve in accordance with US ANSI / ASME standards.

### TECHNICAL SPECIFICATIONS

Connection type: ASME / ANSI B16.5 flange

Plug type: parabolic plug

Control characteristic: equal percentage

Working fluids: liquids, gases, water, steam, thermal oil

### Leakage class (EN 1349)

metal-to-metal seal: 0.004% Kvs (better than class IV)

**baelz 367 ANSI 300 valve stroke, seat diameter and Kvs values**

## baelz 206r

### DESCRIPTION

The pressure measuring and control element baelz 206r is generally used with baelz 192 as a pressure reducing valve. The set point can be selected by adjusting the tension in the springs using a handwheel.

### Baelz-hydrodynamic®

The controlled water ejector combines the functions of four single components: It generates circulation in the area of the consumer, it adjusts the circulation volume according to the actual heat requirement, it regulates the temperature and compensates for fluctuations in differential pressure.

### Baelz-vapordynamic®

The functional principle of the regulated ejector is also applicable for steam. Here, smooth-running equipment is of the essence. Factors such as production reliability, energy costs and maintenance expenditure are crucial for success in all industries.

Note: For systems with ejectors, see Chapter 6.2  
 "Ejector technology - the basics" starting on page 190 of this catalogue.

## 2.1 Ejectors - Product identification

2 examples of order numbers: **baelz 474-MMJV-G3/4-PN25-D2mm** / **baelz 480-6-DN 50-PN 16/25-Düse 16 mm**

**baelz - XXX-X - X - GXX - DNXX - PNXX - Düse XXmm**

Series	471-X	472-X	474	475-X	480-6	585-X	590-X	591-X	Düse = nozzle
See Baelz Pricelist for current serial numbers									
Options			MMJV	G3/4					
see Baelz Pricelist									
Nominal diameter					DN 50				
Nominal pressure						PN16/25			
Nozzle diameter							PN25		
								Düse 16 mm	
								D2mm	

#### Notes:

All available type designations and order numbers can be found in the Baelz price list .

There are various options for ejectors available for a supplementary cost (order and type numbers start with "MP") eg.:

Weld-on and threaded sockets, cooling tube, flange machining, silicone free

## 2.2 Ejectors - Range of products

page 77

### baelz 471

**Controlled water ejector  
Jetomat**

- 1/2" – 1 1/2"
- PN16/25
- External thread
- Housing CC491K - CuSn5Zn5Pb5-C
- max. 150°C
- PTFE seal
- Mixes water with water
- For heating systems

page 79

### baelz 472

**Controlled water ejector  
Jetomat**

- 2"
- PN16
- External thread
- Housing CC499K - CuSn5Zn5Pb2
- max. 130°C
- PTFE seal
- Mixes water with water
- For heating systems

page 80

### baelz 474

**Four-way radiator ejector  
Jetomat**

- 2 x 3/4". 2 x M22x1.5 mm
- PN25
- External thread
- Housing CW508L - CuZn37
- max. 140°C
- 2 exchangeable O-rings
- Mixes water with water
- For heating systems

page 82

### baelz 475

**Controlled water ejector  
Jetomat**

- 3/4"
- PN16/25
- External thread
- Housing CC491K - CuSn5Zn5Pb5-C
- max. 150°C
- EPDM seal
- Mixes water with water
- For heating systems

page 83

### baelz 480

**Controlled water ejector  
Jetomat**

- DN15-250
- PN16/25/40
- Flanged connection
- Housing 5.3103 - EN-GJS-400-18-LT
- max. 240°C
- Cooling tube optional
- Mixes liquids
- Industrial applications

page 85

### baelz 585

**Controlled steam / water  
mixing ejector Jetomat**

- DN15-125
- PN16/25
- Flanged connection
- Housing 5.3103 - EN-GJS-400-18-LT
- max. 240°C
- Mixes water with steam
- Water heating by direct steam injection
- Industrial applications

page 87

## baelz 590

### Controlled steam ejector Jetomat

- DN15-250
- PN16/25/40
- Flanged connection
- Housing 5.3103 - EN-GJS-400-18-LT
- max. 350°C
- Cooling tube optional
- Mixes steam
- Industrial applications

page 89

## baelz 591

### Steam cooling and reducing Jetomat

- DN32-300
- PN16/25/40 (max. PN 160 on request)
- Flanged connection
- Housing 5.3103 / 1.0619
- max. 350°C
- Cooling tube optional
- Cools hot steam with water
- Reducing cooling valve
- Industrial applications

## baelz 471

### DESCRIPTION

The baelz 471 Jetomat is a controlled water/water ejector with red brass housing and threaded connections for heating systems.

Housing / diffusor and nozzle made of CuSn5Zn5Pb5-C red brass

### TECHNICAL SPECIFICATIONS

The plug type and the control characteristic are designed and manufactured to order.

Stroke:

12 mm for nozzle diameters < 9 mm

22 mm for nozzle diameters ≥ 9 mm

Spindle diameter: 10 mm

Working fluids: water

Designation	Nominal pressure	Housing material	Nominal diameter	Connection	Leakage class (EN 1349)
baelz 471	PN 16 / 25	Red brass CuSn5Zn5Pb5-C	1/2" - 1 1/2"	External thread with union nut made of brass and weld-on sockets made of steel	metal-to-metal seal: 0.004% Kvs (better than class IV)

### T max. (°C) / P max. (bar)

Housing material	Red brass CuSn5Zn5Pb5-C
Nominal pressure	PN 16 / 25

## baelz 474

### DESCRIPTION

The baelz 474 is a four-way radiator water/water ejector with red brass housing and threaded connection for heating systems.

Housing made of cast brass CuZn37  
Internal parts made of stainless steel

### TECHNICAL SPECIFICATIONS

Stroke - 3 mm  
Weight, approx.: 0.65 to 0.9 kg depending on the equipment

With different nozzle inserts according to the design  
Several control / actuator options.  
Also applicable as minimum quantity injection valve.  
Working fluids: water

## baelz 480

### DESCRIPTION

The baelz 480 Jetomat is a controlled liquid/liquid ejector with flange connection for mixing and recirculation

Housing: GJS-400-18-LT - 5.3103 / GP240GH - 1.0619 (PN 40 & DN 250)

Diffuser: DN 15: X14CrMoS17

DN 25...125: GJS-400-18-LT

≥ DN 150 and all PN 40: steel, welded

Plug stem and nozzle: stainless steel

### TECHNICAL SPECIFICATIONS

Connection type: Flange EN 1092-2; EN 1092-1 Shapes D / E / F on request

The plug type and the control characteristic are designed and manufactured to order.

Spindle seal: V-rings in PTFE

Option: baelz 480-K - with cooling tube

Working fluids: liquids, water, thermal oil

Stroke (mm)		Spindle Ø (mm)	
DN 15 - DN 25. nozzle ≤ 6.5 mm	12	10

## baelz 585

### DESCRIPTION

The baelz 585 is a liquid/steam ejector with a flange connection for direct mixing of steam and water. (Water heating by direct steam injection).

Housing: GJS-400-18-LT - 5.3103

Inner parts: hardened stainless steel

### TECHNICAL SPECIFICATIONS

Connection type: Flange EN 1092-2; EN 1092-1 Shapes D / E / F on request

The plug type and the control characteristic are designed and manufactured to order.

Spindle seal: V-rings in PTFE

Option: baelz 585-K - with cooling tube

Working fluids: water

### Leakage class (EN 1349)

metal-to-metal seal: 0.004% Kvs (better than class IV)

## baelz 590

### DESCRIPTION

The baelz 590 is a steam/steam ejector (thermocompressor) with flange connection for recirculation and compression of exhaust vapor.

Housing: GJS-400-18-LT - 5.3103 / GP240GH - 1.0619 (PN 40)

Diffuser: DN 15: X14CrMoS17

DN 25...125: GJS-400-18-LT

≥ DN 150 and all PN 40: steel, welded

Plug Spindle and nozzle: stainless steel

### TECHNICAL SPECIFICATIONS

Flange: Special design according to EN 1092-1 possible

The plug type and the control characteristic are designed and manufactured to order.

Spindle seal: V-rings in PTFE

Option: baelz 590-K - with cooling tube

Option: silicone-free version

Working fluids: steam

### Leakage class (EN 1349)

metal-to-metal seal: 0.004% Kvs (better than class IV)

## baelz 591

### DESCRIPTION

The baelz 591 is a steam/water ejector (desuperheater) with flange connection for saturated steam generation and superheated steam cooling.

Housing: GJS-400-18-LT - 5.3103 / GP240GH - 1.0619 (PN 40)  
Plug spindle and nozzle: stainless steel

### TECHNICAL SPECIFICATIONS

The plug type and the control characteristic are designed and manufactured to order.

Saturated steam generator with high control quality for load ≈ 2 - 100%

Spindle seal: V-rings in PTFE

Option: baelz 591-K - with cooling tube

Working fluids: steam / water

### Leakage class (EN 1349)

metal-to-metal seal: 0.004% Kvs (better than class IV)

	Stroke (mm)	Spindle Ø (mm)
DN 32 - DN 80	22 / 40 mm	10mm

### 3.1 Linear Pneumatic Diaphragm Actuators

#### Advantages of linear pneumatic diaphragm actuators:

- fast positioning
- specified position in case of pressure failure
- powerful
- can be operated at high ambient temperatures
- can be operated in potentially explosive atmospheres
- number of springs selectable for adjustment of actuator force
- easy conversion NO / NC without special equipment
- handwheel optional

Table for selecting baelz 373-PXX actuators

Spring force, manual control (N)	Diaphragm surface (cm <sup>2</sup> )	Max. Stroke (mm)	Type baelz 373

- Stroke: 44, 66 mm
- Power: 3765...31920 N
- Weight: 55.5-66.5 kg
- Temperature: 0 ... +80°C
- Humidity: 0 ... 90%
- Pressure: 1.2...6 bar
- Housing: Aluminum
- Diaphragm: NBR

page 100

## Accessories for Linear Pneumatic Diaphragm Actuators

- Positioners
- Switches
- Pressure controllers

### Direction of Action with Control Valve

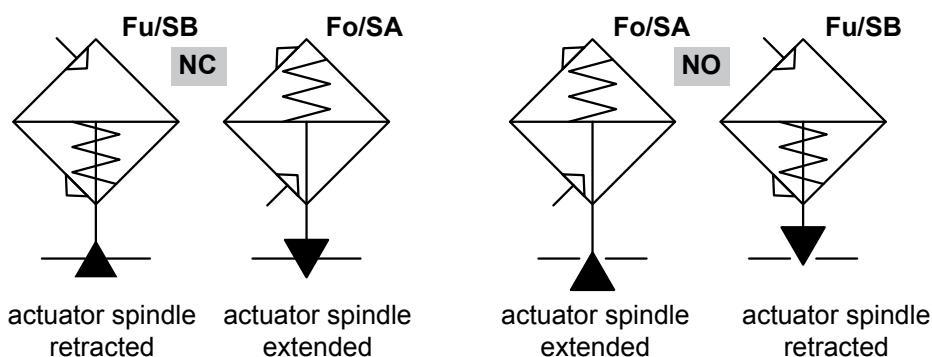

Direction of action **NC** (normally closed):      pressure failure → valve **closed**  
 Direction of action **NO** (normally open):      pressure failure → valve **open**

The actuator has the following directions of action:

**Fu/SB** (spring below)    →    in case of air/power supply failure actuator retracts spindle  
**Fo/SA** (spring above)    →    in case of air/power supply failure actuator extends spindle

The valve has 2 optional closing directions: *spindle retracted = valve closed* and *spindle extended = valve closed*.

The combinations resulting from these options are shown below.

## baelz 373-P11

### DESCRIPTION

baelz 373-P21 compact pneumatic linear actuators with aluminum housing EN AC-AlSi9Cu3(Fe) and NBR diaphragm. For control valves up to DN 65.

### TECHNICAL SPECIFICATIONS

Environmental parameters: temperature: 0 ... +80° C; relative humidity: 0 ... 90%

Max. supply air pressure: 6 bar

Air connection: push-in fitting for tube Ø 8 mm

Yoke and coupling made of aluminum, fasteners made of zinc plated steel.

Stroke: 12, 16, 22 mm

Number of springs: 1

### OPTIONS

#### Special Feature: Fo/Fu-Actuator

Fo (spring above) or Fu (spring below) depends upon which way up the actuator is mounted, so Fo or Fu can be selected with no need for dismantling the actuator. Components used remain identical for Fo and Fu.

**Fo** = Spring above: spindle extended is normal position. The springs extend the spindle, compressed air retracts the spindle.

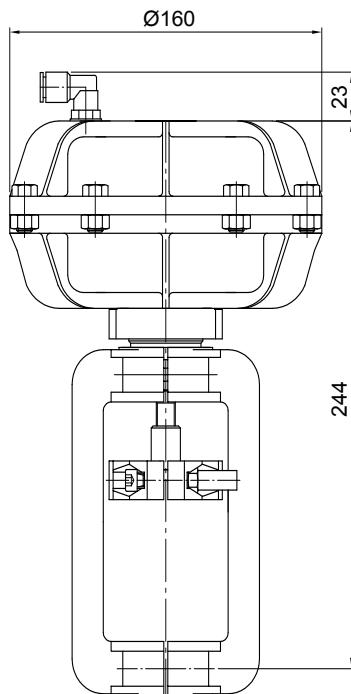

**Fu** = Spring below: spindle retracted is normal position. The springs retract the spindle, compressed air extends the spindle.

#### Yoke options:

S21 yoke (standard) - for valves with spindle Ø10 mm

Options					
Designation	Valve Spindle Ø (mm)	Force (N)	Min. supply air pressure (bar)	Nº springs	Weight, approx. (kg)
P11-1-Fo/Fu	10	950	1.2	1	2.1

### baelz 373-P11 dimensions (mm)

## baelz 373-P21

### DESCRIPTION

baelz 373-P21 compact pneumatic linear actuators with aluminum housing EN AC-AlSi9Cu3(Fe) and NBR diaphragm. For control valves up to DN 125.

### TECHNICAL SPECIFICATIONS

Environmental parameters: temperature: 0 ... +80° C; relative humidity: 0 ... 90%

Max. supply air pressure: 6 bar

Air connection: push-in fitting for tube Ø 8 mm

Yoke and coupling made of aluminum (P21L: coupling zinc plated steel), fasteners made of zinc plated steel.

Stroke: 8, 12, 16, 22 mm

Number of springs: 3, 6, 12, 18 or 6 reinforced (V6)

### OPTIONS

**Fo** = Spring above: spindle extended is normal position. The springs extend the spindle, compressed air retracts the spindle.

**Fu** = Spring below: spindle retracted is normal position. The springs retract the spindle, compressed air extends the spindle.

#### Manual operation:

P21-H21 (for 3, 6, 12, 18 spring) - handwheel Ø120 mm

P21-V6-H21 (for reinforced spring) - handwheel Ø 200 mm

#### Yoke options:

S21 yoke (standard) - for valves with spindle Ø10 mm

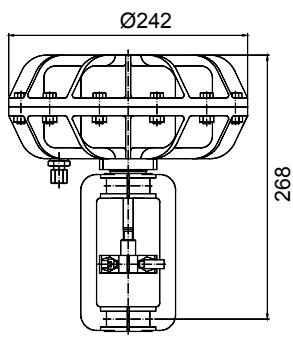

S21-L yoke - for valves with spindle Ø16 mm

S23 yoke - spindle Ø10 mm (für high differential pressures)

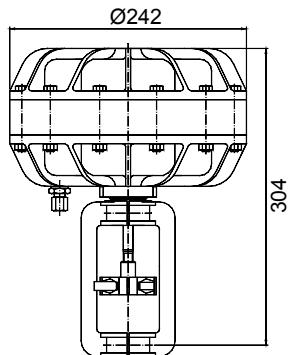

S23L yoke - spindle Ø16 mm (für high differential pressures)

## baelz 373-P22

### DESCRIPTION

baelz 373-P21 compact pneumatic linear actuators with aluminum housing EN AC-AlSi9Cu3(Fe) and NBR diaphragm. For control valves up to DN125.

### TECHNICAL SPECIFICATIONS

Environmental parameters: temperature: 0 ... +80°C; relative humidity: 0 ... 90%

Max. supply air pressure: 6 bar

Air connection: push-in fitting for tube Ø 8 mm

Yoke and coupling made of aluminum (P22L: coupling zinc plated steel), fasteners made of zinc plated steel.

Stroke: 40 mm

Number of springs: 3, 6

### OPTIONS

**Fo** = Spring above: spindle extended is normal position. The springs extend the spindle, compressed air retracts the spindle.

**Fu** = Spring below: spindle retracted is normal position. The springs retract the spindle, compressed air extends the spindle. **Manual operation:**

P22-H22 - handwheel Ø 120 mm

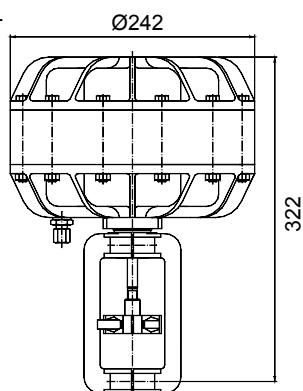

#### Yoke options:

S21 yoke (standard) - for valves with spindle Ø10 mm

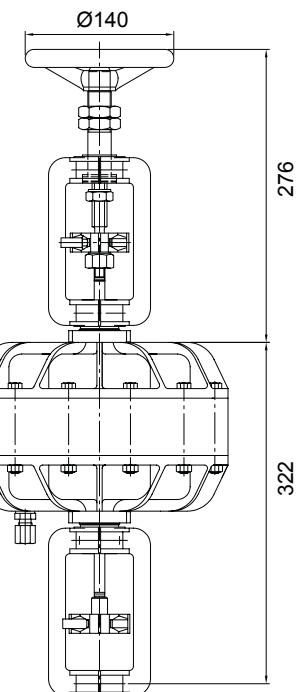

S21-L yoke - for valves with spindle Ø16 mm

Options					
Designation	Valve Spindle Ø (mm)	Force (N)	Min. supply air pressure (bar)	Nº springs	Weight, approx. (kg)

## baelz 373-P31

### DESCRIPTION

baelz 373-P31 compact pneumatic linear actuators with aluminum housing EN AC-AlSi9Cu3(Fe) and NBR diaphragm.  
For DN 150 control valves.

### TECHNICAL SPECIFICATIONS

Environmental parameters: temperature: 0 ... +80° C;  
relative humidity: 0 ... 90%

Max. supply air pressure: 6 bar

Air connection: push-in fitting for tube Ø 8 mm

Yoke, coupling and fasteners made of zinc plated steel.

Stroke: 44 mm

Number of springs: 3, 6, 18

### OPTIONS

**Fo** = Spring above: spindle extended is normal position. The springs extend the spindle, compressed air retracts the spindle.

**Fu** = Spring below: spindle retracted is normal position. The springs retract the spindle, compressed air extends the spindle.

**Manual operation:**

P31-H31 - handwheel Ø 315 mm

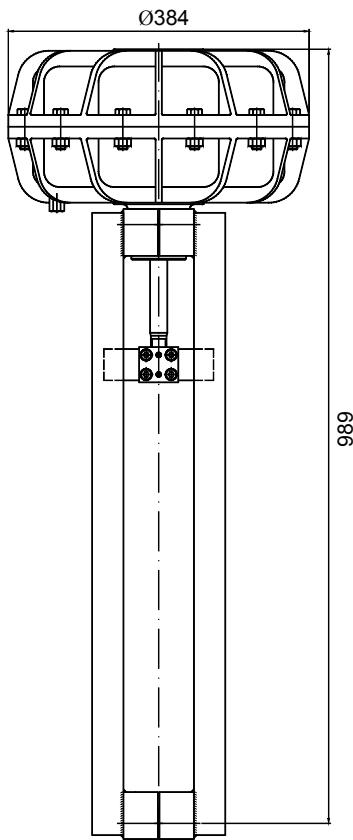

**Yoke options:**

S41 - for valve control without cooling tube

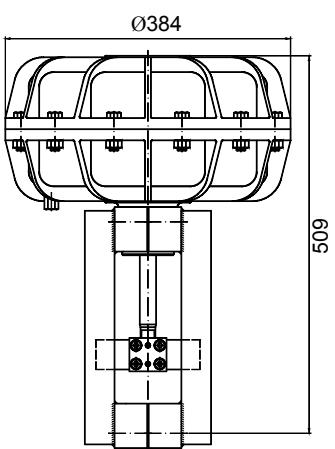

S41C - for valve control with cooling tube

## baelz 87

### DIGITAL I/P POSITIONER

The baelz 87 electro-pneumatic positioner compares an electrical actuating signal with the stroke of the pneumatic valve and thus regulates the required actuating pressure.

### ADVANTAGES AT A GLANCE

- Easy operation with menu navigation and capacitive buttons
- Preset parameters, individually customizable if required
- Power-fail-safe storage of all parameters in the EEPROM
- Optional accessories: assembly kit, manometer attachment kit

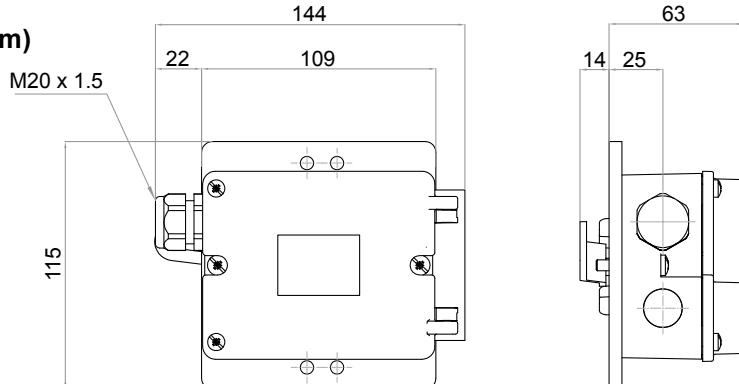

### Options

<b>87</b>	without explosion protection
<b>87-Ex</b>	ATEX: II 2 G Ex ia IIC T4 / STCC: 0 Ex ia IIC T4 X
<b>87-Ex-CSA</b>	CSA: Ex ia IIC T4; Class I, Zone 0, AEx ia IIC T4; Class I, Div. 1, Groups A, B, C & D
<b>87- ...</b>	without mounting
<b>87- ... -M</b>	including mounting on baelz 373-P pneumatic actuator ...
<b>Complete adaptation parts</b>	Assembly package as replacement or for retrofitting, weight approx. 0.2 kg
<b>Manometer mounting kit</b>	including 2 manometers Ø 40 mm, display range: 0 ... 10 bar

### baelz 87 positioner - technical specifications

<b>Input signal</b>	4 ... 20mA (2-wire)
<b>Fluid</b>	Compressed air according to ISO 8573-1 - Particle content: Class 4; Oil content: Class 3
<b>Air pressure</b>	Max. 1.7 ... 7 bar (actuating pressure for linear actuators 6 bar)
<b>Ventilate actuator flow</b>	3.0 m <sub>n</sub> <sup>3</sup> /h at 1.4 bar; 8.5 m <sub>n</sub> <sup>3</sup> /h at 6 bar
<b>Dearate actuator flow</b>	4.5 m <sub>n</sub> <sup>3</sup> /h at 1.4 bar; 14.0 m <sub>n</sub> <sup>3</sup> /h at 6 bar
<b>Air consumption</b>	< 0.1 m <sub>n</sub> <sup>3</sup> /h to 6 bar
<b>Housing / cover</b>	Polyphthalimide (PPA) / polycarbonate (PC)
<b>IP rating</b>	IP 66
<b>permissible ambient temp.</b>	- 20 ... + 80°C (see also Ex approval)
<b>Cable gland</b>	Polyamide (PA), black, M20 x 1.5
<b>Connecting thread</b>	G 1/4, internal thread
<b>Stroke</b>	12...66 mm
<b>Weight</b>	approx. 0.7 kg

### baelz 87 dimensions (mm)

## baelz 88

### I/P POSITIONER

The baelz 88 electro-pneumatic positioner compares an electrical actuating signal with the stroke of the pneumatic valve and thus regulates the required actuating pressure.

### ADVANTAGES AT A GLANCE

- Easy operation with three keys with two-line display
- Preset parameters, individually customizable if required
- Distance measurement with lever system and internal rotary potentiometer
- Position feedback 0/4 ... 20 mA or 0 ... 10 V optional
- Mounting parts or assembly optional

## baelz 373-ESI

- For radiator valves and small ejectors
- Stroke: max 5.5 mm
- Actuating force: 100 N
- Power consumption: 1, 2, 6 VA
- Actuating speed: 1 / 3.7 mm/min
- Supply voltage: 24 / 230V
- Weight, approx.: 0.4 kg
- Temperature: +1 ... +50°C
- Humidity: 5 ... 85 %
- IP rating: IP40
- Housing: plastic

page 109

## baelz 373-ESA

- For small ejectors
- Stroke: max 7.5 mm
- Actuating force: 500 N
- Power consumption: 4/8 VA
- Actuating speed: 10 / 20 mm/min
- Supply voltage: 24 / 230V
- Weight, approx.: 1 kg
- Temperature: 0 ... +50°C
- IP rating: IP54
- Housing: plastic
- Delivery incl. matching adapter

page 110

## baelz 373-E07

- For DN 15...125
- Stroke: max 22 mm
- Actuating force: 700 / 2000 N
- Power consumption: 4.1 / 12 VA
- Actuating speed: 6; 18 mm/min
- Supply voltage: 24 / 115 / 230 V
- Weight, approx.: 2.2 kg
- Temperature: 0 ... +50°C
- Humidity: 0 ... 75 %
- IP rating: IP42 (IP65)
- Cover: plastic

## baelz 373-Ex-Run

- For spindle Ø 10 / 16 mm
- Stroke: max 60 mm
- Actuating force: 50-5000 N
- Power consumption: 11 / 64 VA
- Actuating speed: 15; 40 mm/min
- Supply voltage: 24 ... 230 V AC/DC
- Weight, approx.: 7 kg
- Temperature: -20 ... +40°C
- IP rating: IP66
- Housing: aluminum, painted
- Further information on request

page 113

## baelz 373-E45

- For DN 15...150
- Stroke: max 44 mm
- Actuating force: 4000 N
- Power consumption: 11 VA
- Actuating speed: 15 mm/min
- Supply voltage: 24 / 115 / 230 V
- Weight, approx.: 8 kg
- Temperature: 0 ... 50°C
- Humidity: 0 ... +75 %
- IP rating: IP65
- Cover: plastic

## baelz 373-E63

- For DN 150
- Stroke: max 50 mm
- Actuating force: 4400 N
- Actuating speed: 152.4 mm/min
- Supply voltage: 24/110...230 V
- Weight, approx.: 48.5 kg
- Temperature: -30 ... +70°C
- IP rating: IP68
- Housing: aluminum, powder-coated
- Further information on request

## baelz 373-E64

- For DN 150 ...300
- Stroke: max 65 mm
- Actuating force: 7000-14000 N
- Power consumption: max. 93 VA
- Actuating speed: 39-78 mm/min
- Supply voltage: 230V
- Weight, approx.: 12 kg
- Temperature: -20 ... +60°C
- IP rating: IP67
- Housing: Aluminum. color coated
- Further information on request

page 115

## baelz 373-E65

- For DN to 125
- Stroke: max 40 mm
- Actuating force: 1100 / 2000 N
- Power consumption: 18 / 20 VA
- Actuating speed: 10/15/30 mm/min
- Supply voltage: 24 / 100 / 230 V
- Weight, approx.: 5.6 kg
- Temperature: -10 ... +55°C
- Humidity: 0 ... 95 %
- IP rating: IP66
- Housing: plastic

page 117

## baelz 373-E66

- For DN 150...300
- Stroke: max 80 mm
- Actuating force: 8000 / 15000 N
- Power consumption: 25 / 34 VA
- Actuating speed: 25 / 22 mm/min
- Supply voltage: 24 / 115 / 230 V
- Weight, approx.: 13 kg
- Temperature: 0 ... +50°C
- Humidity: 0 ... 75 %
- IP rating: IP65
- Cover: steel, painted

## baelz 373-E88

- For DN 150...300
- Stroke: max 80 mm
- Actuating force: 8000 / 15000 N
- Power consumption: 34 VA
- Actuating speed: 22; 25 mm/min
- Supply voltage: 24...230 V
- Weight, approx.: 2.2 kg
- Temperature: -10 ... +50°C
- Humidity: 0 ... 75 %
- IP rating: IP65
- Cover: steel, painted
- Further information on request

page 120

## baelz 375-E42

- Rotary actuator
- Angle of rotation: 90°
- Torque: 150 Nm
- Power consumption: 65 VA
- Actuating speed: 60 s/90°
- Supply voltage: 230 V
- Weight, approx.: 7.5 kg
- Temperature: 0 ... +50 °C
- Humidity: 0 ... 75 %
- IP rating: IP65
- Cover: plastic, gray

page 122

## Built-in Controllers for Electric Actuators

- baelz 7164
- baelz 7020
- baelz 7020A

## baelz 373-ESI

### DESCRIPTION

Electric actuator for baelz 474, 475 and baelz 500 ... 507.

### TECHNICAL SPECIFICATIONS

Stroke: 5.5 mm

Housing: plastic

IP rating: IP 40

Thrust: 100 N

Weight, approx.: 0.4 kg (0.5 kg with auxiliary switch)

Thread connection: union nut M30 x 1.5 mm (or with M30 x 1.0 adapter)

Electrical connection: 3-core connection cable with 1.5 m plug (L15) or  
optionally: 3-core connection cable 4.5 m, with plug;

3-pole terminal block connector with screw connection (ESI-61, ESI-81)

Environmental parameters:

Temperature: +1 ... +50°C; Relative humidity: 0 ... 85%

Type	Actuating speed (s / 5.5 mm stroke)	Control	Media temp. (°C)	Supply voltage	max. power con- sumption (VA)	Parallel operation*	Auxiliary switch**
373-ESI-31	380	3-point	1 ... 110 °C	230 V AC ± 15 %, 50/60 Hz	6	max. 6	optional
373-ESI-61	90	DC 0-10 V	1 ... 100 °C	24 V AC ± 20 %, 50/60 Hz 24 V DC, ± 25 %	2	max. 10	-
373-ESI 81	350	3-point	1 ... 110 °C	24 V AC ± 20 %, 50/60 Hz	0.8	max. 24	optional

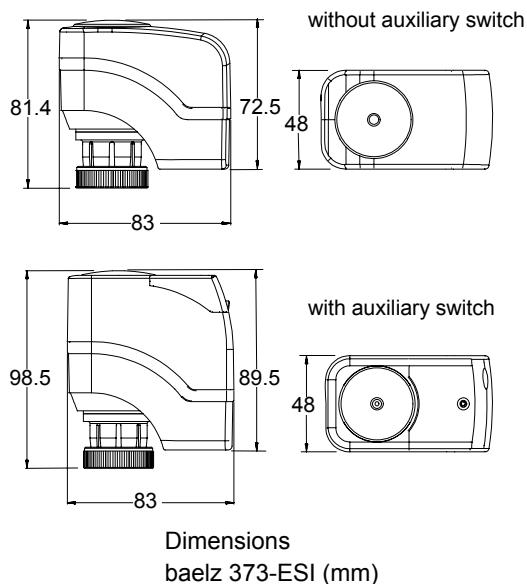

\* Number of actuators for parallel operation, if the output power of the controller is sufficient

\*\* Designation actuators with optional auxiliary switch: 373-ESI-31.1, 373-ESI-81.1

Switching point adjustable 0 ... 100%, factory setting: 50%

Switching capacity max. 250 V AC, 1 A (0.5 A)

Retrofitting not possible!

## baelz 373-ESA

### DESCRIPTION

Motorized linear actuator with emergency function for baelz 475

### TECHNICAL SPECIFICATIONS

Stroke max.: 7.5 mm

Housing: plastic

IP rating: IP 54 (installation upright)

Thrust: 500 N

Weight approx.: 1 kg

Threaded connection: M32 x 1.5 mm

Manual operation (with tool only)

with load-dependent shutdown

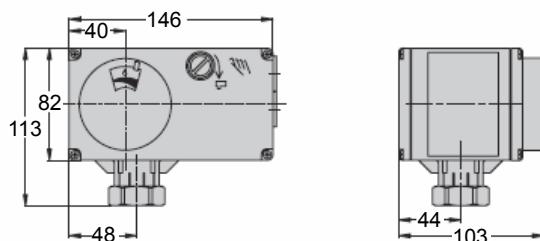

in case of power failure: pushes (extends) - closed without power

Ambient temperature: 0 ... +50°C

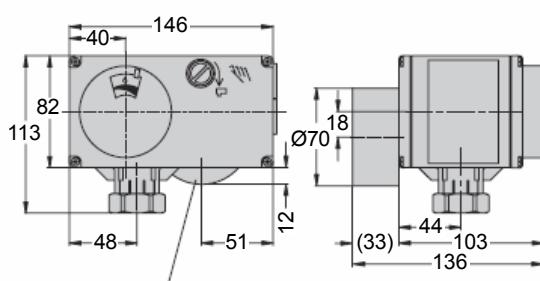

Type	Actuating speed (s / 6 mm Stroke)	Activation/control	Supply voltage	max. power consumption approx. (VA)
373-ESA-D-05-35-230	35	3-point	230 V, 50 Hz	4 / 8
373-ESA-D-05-18-230	18	3-point	230 V, 50 Hz	4 / 8
373-ESA-D-05-30-24	slow: 45 normal: 31 fast: 17	continuous	24 V, 50/60 Hz and DC	8 VA, (24 V DC: 8 W) at actuating speed "normal"

baelz 373-ESA (mm)

baelz 373-ESA-D-05-35-230

## baelz 373-E07

### DESCRIPTION

Motorized linear actuator for control operation For control valves up to DN125.

### TECHNICAL SPECIFICATIONS

Environmental parameters:

Temperature: 0 ... +50°C

Relative humidity: 0 ... 75%

Stroke:

12, 16, 22 mm

Cover: plastic

1 cable inlet M16x1.5 (plastic)

2 locking screws for cable inlet M16x1.5 (plastic)

Manual operation

Yoke options:

Aluminum yoke for valves DN15 ... DN125

S21 - for fittings with Ø 10 mm spindle

S21-L - for fittings with Ø 16 mm spindle

## baelz 373-E45

### DESCRIPTION

Electric linear actuator with load-dependent limit switches.

### TECHNICAL SPECIFICATIONS

Actuator control:	3 point
Stroke:	12, 16, 22, 40, 44 mm
Electrical connection:	3 x M20x1.5
Cover:	plastic, yellow
Manual operation:	crank handle
Actuator:	Synchronous actuator

#### Environmental parameters:

Temperature: 0 ... +50°C Relative humidity: 0 ... 75%

#### Yoke options:

Aluminum yoke for DN15 ... DN125

S21 - for fittings with Ø 10 mm spindle

S21-L - for fittings with Ø 16 mm spindle

#### Galvanized steel yoke for DN150

S41 - for fittings without cooling tube

S41C - for fittings with cooling tube

Type baelz 373	Weight, approx.	Power	Speed	Power	Supply voltage	IP rating

## baelz 373-E65

### DESCRIPTION

Motorized linear actuator with emergency stop function and load-dependent limit switches. Available with fail-safe open or closed.

### TECHNICAL SPECIFICATIONS

Input signal:	0-10 V or 4-20 mA, 2 or 3-point selectable
Output signal:	0-10 V, burden >2,5 kΩ
Power consumption:	18 VA
Stroke:	40 mm, self-adapting
Set-up:	automatic initialization
Electrical connection:	2 x M20 x 1.5, 1 x M16 x 1.5
Housing:	yellow plastic, silicone-free
Manual operation:	push-button (E65-11) / mechanical (E65-20)
Motor:	brushless DC motor
Environmental parameters:	Temp: -10 ... +55°C Rel. humidity: 0 ... 95%
TÜV approved:	1100 N models TÜV type tested
Aluminum yoke, coupling and fixing screws:	
S21 (standard) - fittings with Ø 10 mm spindle	
S21-L - fittings with Ø 16 mm spindle	

Type baelz 373	Weight, approx. (kg)	Power (N)	Actuating speed (mm/min)	Supply voltage	Position feedback	in case of power failure	IP rating

## baelz 373-E66

### DESCRIPTION

Electric linear actuator with load-dependent limit switches.  
For control valves up to DN150-DN300.

### TECHNICAL SPECIFICATIONS

Actuator control:	3 point
Stroke:	12 - 66 mm
Electrical connection:	4 x M16x1.5
Cover:	metal, yellow
Manual operation:	handwheel
Actuator:	Synchronous actuator

#### Environmental parameters:

Temperature: 10 ... +50°C; relative humidity: 0 ... 75%

#### Yoke options:

- S41 - for fittings with Ø 22 mm spindle without cooling tube
- S41C - for fittings with Ø 22 mm spindle with cooling tube
- S23 - for fittings with Ø 10 mm spindle without cooling tube
- S23L - for fittings with Ø 16 mm spindle without cooling tube

### 3.4 Built-in controllers for electric actuators

## baelz 7164

### BUILT-IN MICROPROCESSOR CONTROLLER

Installed in baelz 373-E07 motorized linear actuator  
Constant setpoint or heating curve with 5 plotting points  
Analog inputs PT100 (-40 ... +120°C), NTC, 0 / 4 ... 20 mA, 0/2 ... 10 V,  
teletransmitter 1-5 kΩ

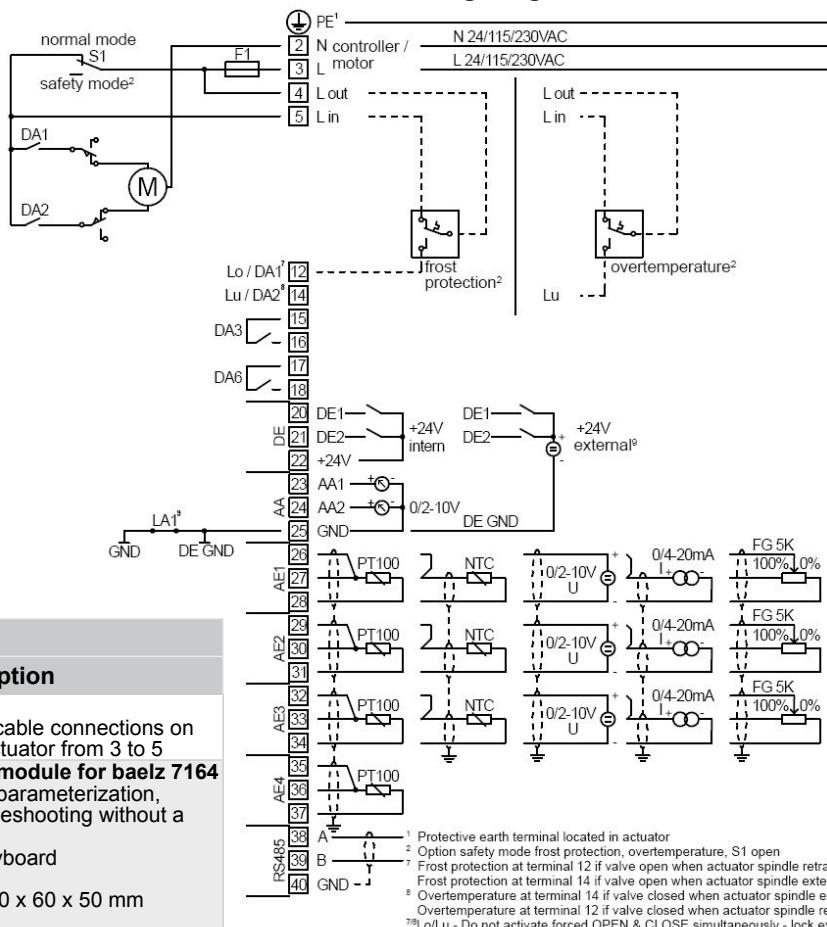

### ADVANTAGES AT A GLANCE

- Reduced fitting costs due to elimination of signal cabling between actuator and controller
- Overall installation costs and effort are minimized
- Space saving, as the controller hardware sits in the actuator
- Variable, outside temperature-controlled characteristic

### baelz 7164 positioner technical specifications

Analog inputs	4	Interface	RS485 Modbus RTU / connector for manual control unit
Analog outputs	2x (0/2 ... 10 V)	Power supply	230 V. 50/60 Hz; 115 V. 50/60 Hz; 24 V. 50/60 Hz;
Digital outputs	2x relays	Weight	approx. 0.2 kg
Digital inputs	2	Ambient temperature	0 ... 50 °C
Connection	Spring clips	Ambient humidity	5 ... 90% (non-condensing)
Precision	0.3 % of upper range value		

### baelz 7164 wiring diagram

### Options baelz 7164

Option	Description
ZB373-E07-7164-1385	5/3 cable gland adapter increases the number of cable connections on the housing of the E07 actuator from 3 to 5
ZB373-E07-7164-1381	Plug-in manual control module for baelz 7164 for on-site operation and parameterization, commissioning and troubleshooting without a RS485 bus controller. With LCD display and keyboard 1 m cable with plug Dimensions: (HxWxD) 160 x 60 x 50 mm Weight, approx.: 0.2 kg

<sup>1</sup> Protective earth terminal located in actuator

<sup>2</sup> Option safety mode frost protection, overtemperature, S1 open

Frost protection at terminal 12 if valve open when actuator spindle retracted

Frost protection at terminal 14 if valve open when actuator spindle extended

Overtemperature at terminal 14 if valve closed when actuator spindle extended

Overtemperature at terminal 12 if valve closed when actuator spindle retracted

<sup>3</sup> S1 open - Do not activate forced OPEN & CLOSE simultaneously - lock externally!

<sup>4</sup> DE (D1) with external 24 V, cut track at LA1 if electrical insulation required

## baelz 7020

### DIGITAL POSITIONER

Installed in baelz 373-E07 motorized linear actuator

Setting with DIP switches and LED or Modbus.

### ADVANTAGES AT A GLANCE

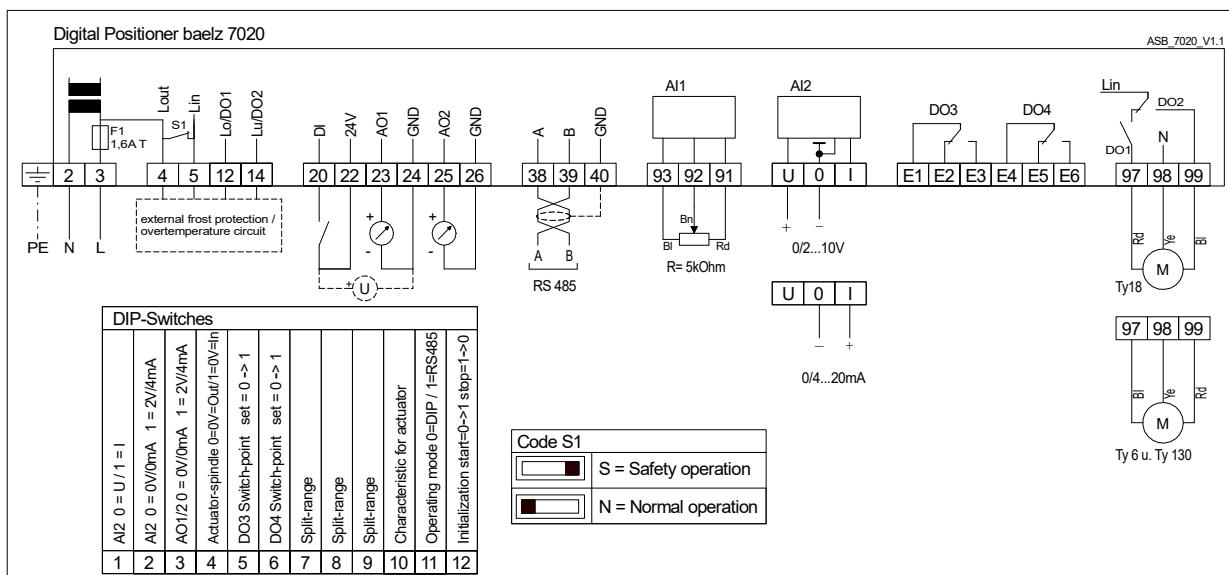

- Self-adaptation (controller, hysteresis, valve runtime)
- Detection and suppression of interference signals
- Error detection and alarm functions - e.g. fail-safe position
- Free WTP parameterisation software (Modbus RTU)
- Comfortable operation and optimized actuator installation
- Variable valve characteristics with high resolution

### baelz 7020 positioner technical specifications

2 output signals	output 1: 0...10 V and output 2: 0...20mA or output 1: 2...10 V and output 2: 4...20mA factory setting: 0...10 V und 0...20mA	Interface	RS485 Modbus RTU
Input signal	0/2...10 V or 0/4...20 mA Precision 0.1 %	Operation	12 DIP switch / extended operation with free software Winbas Tools Par / Modbus operation
Digital outputs	2 potential-free additional limit switches adjustable, max. 250 V, 4 A, min. contact load digital outputs: 10 V / 100 mA	Power supply	230 V. 50/60 Hz; option 115 V. 50/60 Hz; 24 V. 50/60 Hz;
Digital input	1 adjustable (e.g. summer/winter switchover), Imax 5 mA, low = 0...5 V DC, high = 9...38 V DC, Re = 5 kΩ	Fuse	internal 1.6 A/T
DE supply voltage	24 V DC. Imax = 5 mA	Power consumption	approx. 5 VA
Connection	PUSH IN spring clamps	Weight	approx. 0.2 kg
		Ambient temperature	0 ... 50 °C
		Ambient humidity	5 ... 90% (non-condensing)

The actuator must be equipped with a 5 kΩ feedback potentiometer

### baelz 7020 wiring diagram

## baelz 7020A

### DIGITAL POSITIONER

Installed in motorized linear actuator baelz 373-E45 / baelz 373-E66  
Installed in rotary motorized actuator baelz 375-E42  
Setting with DIP switches and LED or Modbus.

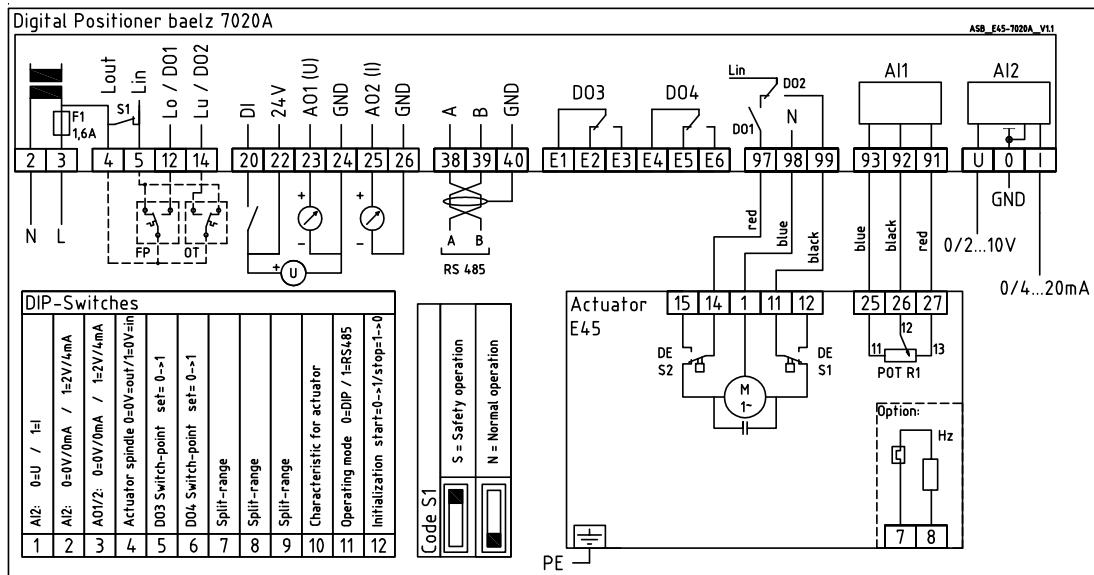

### ADVANTAGES AT A GLANCE

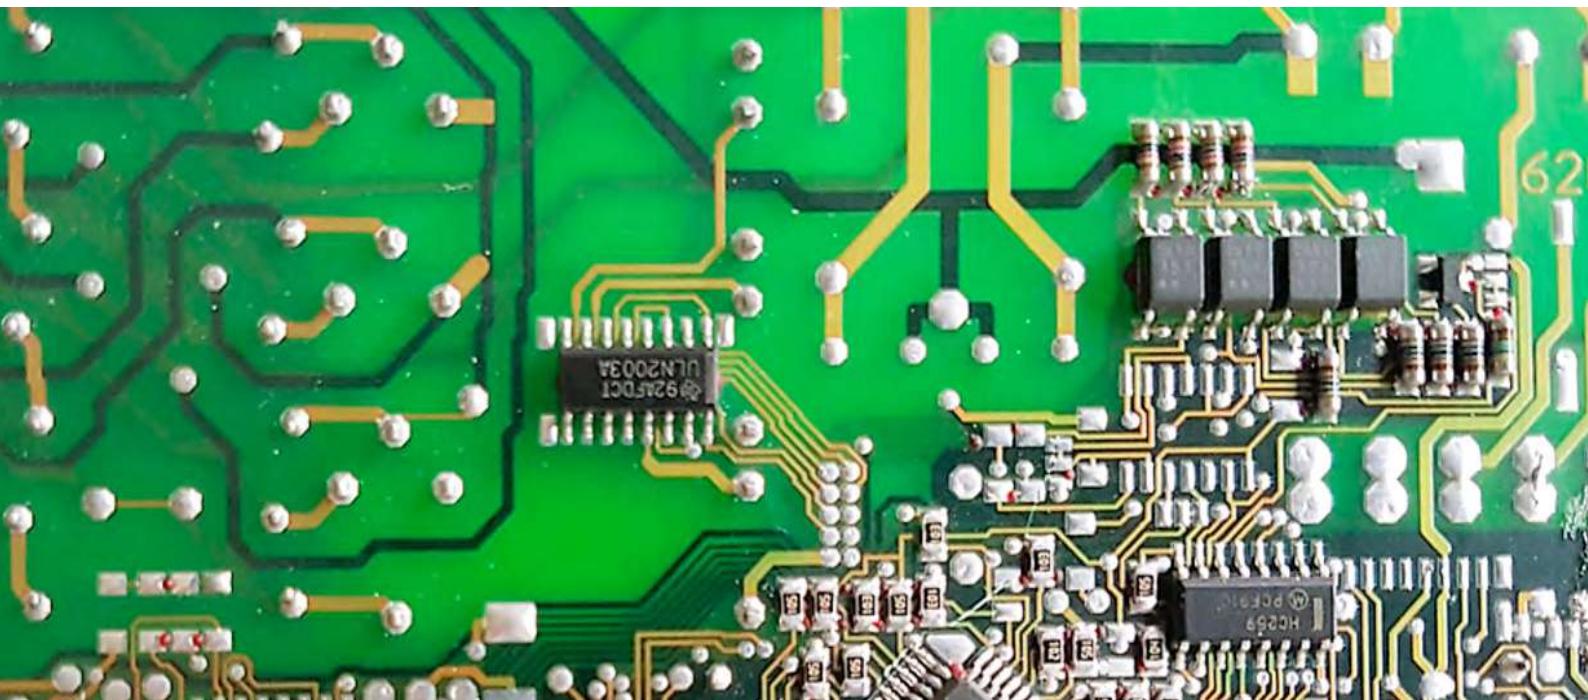

- Self-adaptation (controller, hysteresis, valve runtime)
- Detection and suppression of interference signals
- Error detection and alarm functions - e.g. Eg fail-safe position
- Free WTP parameterisation software (Modbus RTU)
- Comfortable operation and optimized actuator installation
- Variable valve characteristics with high resolution

Microprocessor compact controller

- for heating systems
- regulates flow temperature depending on outside temperature
- RS-485 Modbus RTU interface
- various additional functions
- as three-point step/three-point/two-point or continuous controller
- with analog output 0/2 ... 10 V

page 133

**baelz 6200**

Microprocessor controller

- for major BACS projects
- expandable, modular system
- several software options
- up to 16 control circuits
- integrated PLC control
- simple operation
- several installation options

page 138

**baelz 6490 / 6590****PID 3-point step controller**

- Industrial controller with special PID step-controller algorithm
- compact and reliable
- simple operation
- self-adaptation of the control parameters
- Manual/automatic switchover
- two-point/three-point selectable
- LED displays for setpoint and actual value

page 141

**baelz 6496 / 6596****PID continuous controller**

- P/PD/PI/PID control behavior with continuous control signal
- compact and reliable
- simple operation
- self-adaptation of the control parameters
- Manual/automatic switchover
- LED displays for setpoint and actual value

page 144

**baelz 6497 / 6597****PID 3-point step controller**

- PI/PID control response with three-point output
- compact and reliable
- simple operation
- self-adaptation of the control parameters
- Manual/automatic switchover
- two-point/three-point selectable
- LED displays for setpoint and actual value

page 146 - page 158

<sup>1</sup> only one analogue input useable

\*available from stock

<sup>2</sup> two analogue inputs useable

<sup>3</sup> setpoint offset OFS (DI)

<sup>4</sup> freely selectable by software

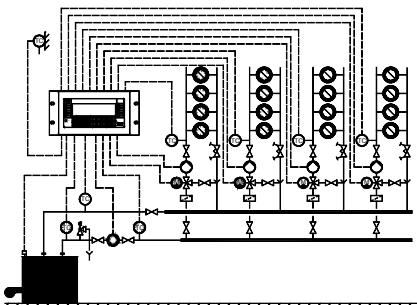

24 V or 115 V instead of 230 V on request

## 4.3 Control application examples

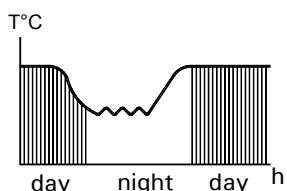

### Heating and air conditioning applications:

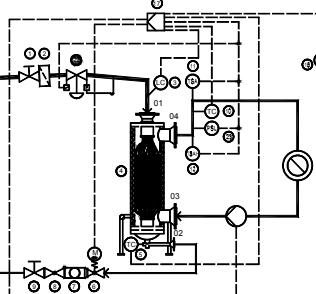

with 8, 12 or 16 control loops

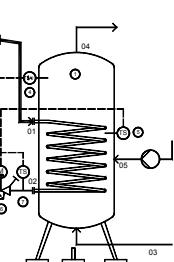

with or without optimized start-up / stop

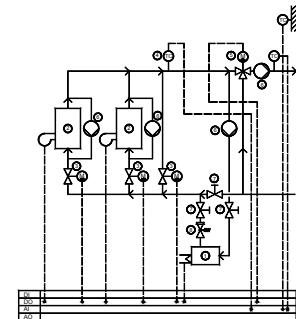

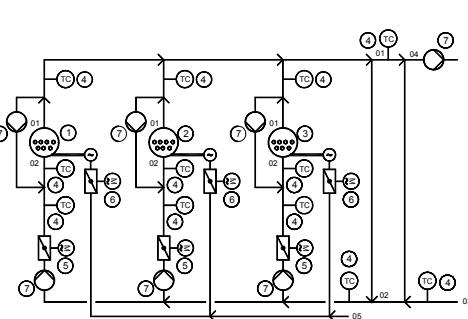

control of heat-exchangers for heating

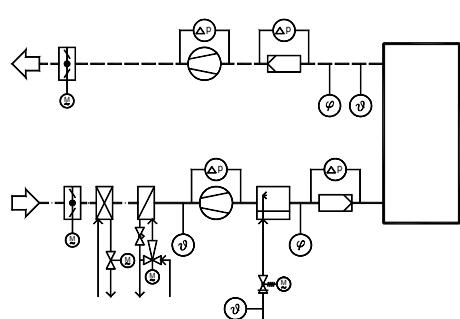

for domestic hot water

### Control of boilers including cascades:

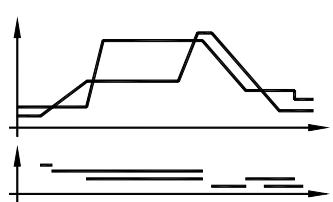

### Ventilation, air conditioning:

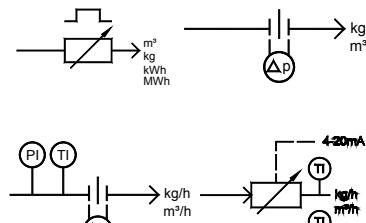

### Control in the industry:

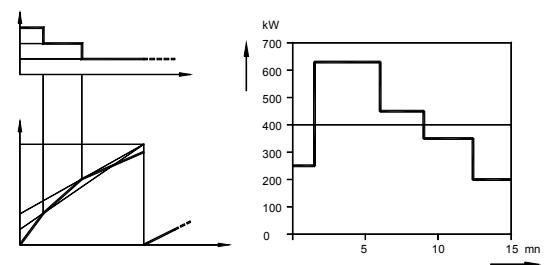

program control for dyeing vats and pasteurization units

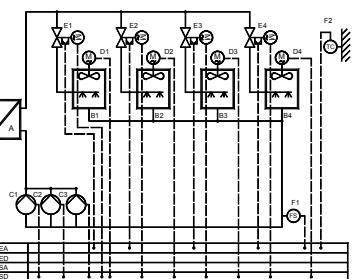

consumption measurements, summation

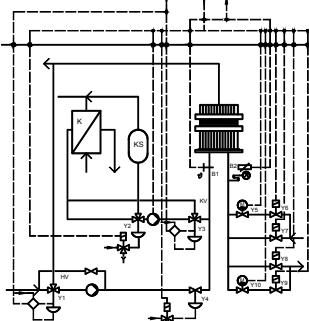

relief

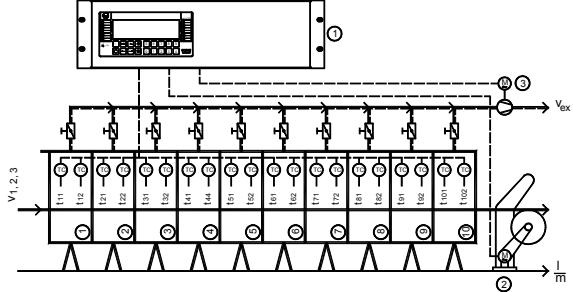

### cascade of cooling towers

### control of presses

### control of stentors, dryers, pasteurization units

# baelz 5192

## CONTROL DEVICE WITH TOUCH SCREEN

Unit for operating Baelz devices without own display or operating unit.

Can be connected to Modbus RTU protocol with an RS 485 interface to operate multiple devices. Connection to a higher-level control system with Modbus TCP protocol as well as further connection possibilities are also possible.

## ADVANTAGES AT A GLANCE

- convenient operation and observation with touch display
- extensive visualization options
- as operator device for several Modbus slaves
- custom configuration of the user level
- trend logger
- online and trend display with multiple curves
- alarm monitoring and alarm display with color change
- event display (e.g. operating and alarm messages)
- VNC remote control via Internet
- as RS 485 Modbus RTU master or Modbus TCP client
- Ethernet interface for remote control and programming
- transfer of process data to other Modbus slaves

## Technical specifications, baelz 5192

Designation	baelz 5192-W-WB-43E	baelz 5192-W-WB-70EA
Housing	plastic	plastic
Screen size (inches)	4.3	7.0
Resolution max. (inches)	480 x 272	800 x 480
Brightness (cd/m <sup>2</sup> )	500	300
Dimensions, WxHxD (mm)	128 x 102 x 32	201 x 147 x 34
Cut-out, WxH (mm)	119 x 93	192 x 138
Weight (approx., kg)	0.3	0.85
USB host	1 x USB 2.0	
COM1	RS 232 / 485	
COM3	RS 485	
Processor	32 bit Cortex A8 600 MHz	
Real time clock	Yes	
Touch panel	TFT; 4-wire resistive	
Contrast ratio	500:1	
Colors	16 M	
Storage	128 MB Flash	
RAM	128 MB	
Ethernet interface	10/100 Base-T	
Temperature range (°C)	0...50	
Storage temperature range (°C)	-20...+60	
Atmospheric humidity	10...90% RH non-condensing	
Degree of protection at the front	IP 65	
Power supply	+24 V DC ±20%	
Current consumption	350 mA @ 24 V DC	

**Options / Supplements / Accessories**

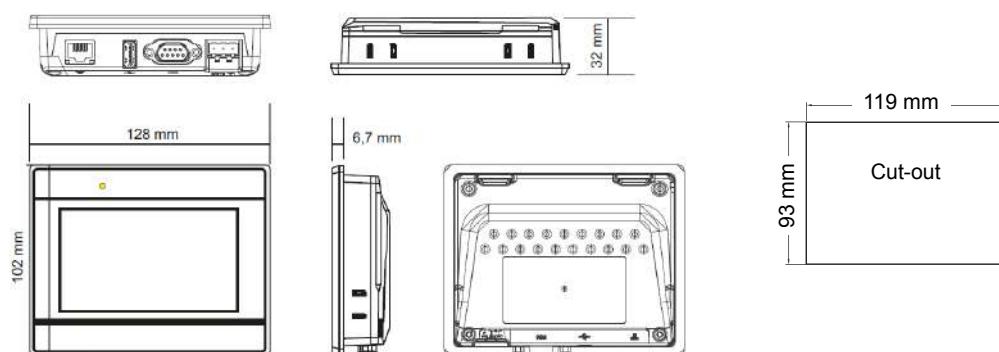

Option baelz 5192-W-WB .. including preconfiguration for max. : 3 control loops, 46 data points, 8 trend variables, 1 P+I diagram

Individual supplements for preconfiguration in the factory:  
 Basic configuration  
 Data point  
 Trend variable  
 Control loop with max. 10 variables  
 Plant picture with max. 20 variables

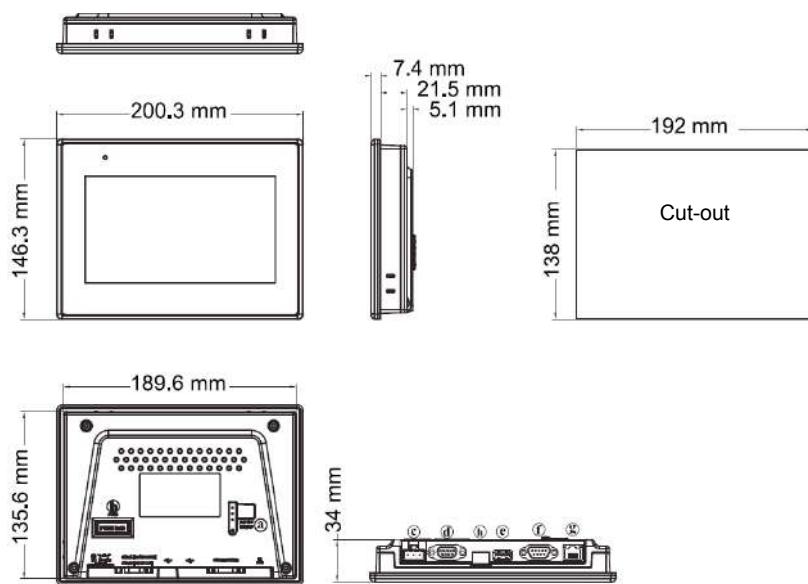

**Important: Required power supply baelz 6208/3-1.0 A (Order No. 6208-022)**

Accessories: Connection cable baelz 5192-W-WB-RS485 with 9-pin connector for connection to touch screen, other end for connection to RS 485. Cable length 3 m

Housing dimensions baelz 5192-W-WB-43E

baelz 6164B-W2

baelz 6164B

## baelz 6164B

### MICROPROCESSOR COMPACT CONTROLLER

for temperature control in heating systems.

Microprocessor compact controllers µClimatron baelz 6164B / 6164B-W2 are used to regulate the feed temperature depending on the outside temperature as required.

### ADVANTAGES AT A GLANCE

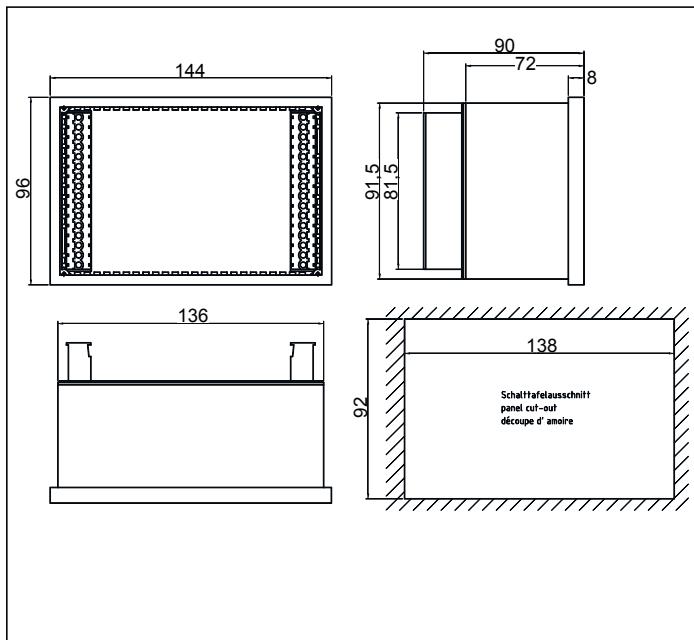

- as three-point step/three-point/two-point or continuous controller with analog output 0/2 ... 10V
- constant setpoint or heating curve with 5 coordinating points
- simple configuration, operation and parameterization with only 4 buttons & LCD display
- pump blocking protection
- Legionella protection function
- boiler charging function
- jet control (for jet pumps)
- sensor monitoring
- switching time deferral depending on the outside temperature
- suitable for hot water or steam systems (starting circuit)

### Specifications microprocessor compact controller µClimatron baelz 6164B / 6164B-W2 / 6164B-W2-SM

	6164B	6164B-W2	6164B-W2-SM
<b>Control loops/circuits</b>		max. 2	
<b>Controller type</b>	Three-point step/three-point/two-point or continuous controller		Continuous controller
<b>Analog inputs</b>	5: PT100 (measuring range: -40°C ... + 120°C) NTC, 0/4 ... 20 mA, Re = 5.9 Ω; 0/2 ... 10 V, Re = 160 kΩ, Potentiometer selectable	5: 3 x PT1000; 2 x PT100	
<b>Analog outputs</b>	2x (0/2...10V), Imax = 5 mA		
<b>Digital inputs</b>		2	
<b>Digital outputs</b>	6x relays		2 x relays
<b>Digital input and transducer supply voltage</b>		24 V DC, Imax = 14 mA	
<b>Connection</b>		Screw-type terminals	
<b>Interface</b>		RS485 Modbus-RTU	
<b>Display</b>		LCD with backlight 2x24 characters	
<b>Mounting</b>	Panel front installation	Wall-mounted housing (also suitable for DIN rail mounting)	
<b>Housing</b>	plastic	Plastic housing with transparent door (optionally lockable)	
<b>Dimensions WxHxD (mm)</b>	144 x 96 x 90	233 x 185 x 118	
<b>Ingress protection rating</b>	IP 55 (front)	IP 65	
<b>Power supply</b>	230 V / (special voltages on request: 115 V / 24 V), 50/60 Hz

## MICROPROCESSOR CONTROLLER „BUSPILOTRONIC“

The standard controller for major BACS projects

For regulation, control and monitoring of industrial and domestic processes.

### ADVANTAGES AT A GLANCE

- Multiprocessor technology
- modular system - expandable at any time
- easy operation with user-friendly menus
- several installation options
- various operating interfaces selectable
- multi-circuit control system - up to 16 control loops
- integrated PLC control without programming device
- monitoring and reducing energy consumption

### Technical specifications microprocessor controller baelz 6200 ...

<b>Control loops/circuits</b>	max. 16
<b>Controller type</b>	freely selectable using plug-in cards
<b>Analog inputs</b>	NTC: 3.11 (-40°C to +60°C); 3.12 (0°C to +60°C); 3.13 (0°C to +140°C) PT100: 2.21 (-40°C to +60°C); 2.4 (0°C to +300°C); 2.49 (-40°C to +120°C) Humidity: 5.4 (0 to 100% rh) 0/4 ... 20 mA, Re = 5.9 Ω; 0/2 ... 10 V, Re = 160 kΩ; Potentiometer: 100 Ω ... 5 kΩ
<b>Analog output</b>	0/4...20 mA, Re = 500 Ω; 0/2...10 V, Imax = 5 mA
<b>Digital input</b>	Re = 4 kΩ (low = 0 VDC; high = 15...24 VDC)
<b>Digital input and transducer supply voltage</b>	24 VDC
<b>Connection</b>	Screw-type terminals, 9-pin female connector RS232
<b>Interface</b>	RS485 Modbus-RTU
<b>Display</b>	LCD backlight with 8x40 characters for plain text display *
<b>Housing</b>	plastic
<b>Power supply (depending on the type)</b>	230 V / (special voltages on request: 115 V / 24 V), -15% / + 10%, 50/60 Hz
<b>Relay</b>	with potential-free contact; Switching capacity 250 VAC / 3 A; Spark suppressor 10 nF + 100 Ω
<b>Ambient temperature (°C)</b>	Operating: 0...50; Transport / Storage: -20...+ 60
<b>Ambient humidity</b>	5...90% RH (non-condensing)
Function keyboard for configuration, operation and parameterization on site *	
Up to 16 LEDs for displaying binary signals (relays 1-16), labeled	
Battery for data backup in case of power failure	
Software available in the following languages: German, English, French, Flemish, Italian, Dutch	

\* except for 6200-i-3

Options / notes	Remarks
Ext. Power supply unit Order No. 6208-012 is required if more than 1 D/I-D/O card(s) are inserted.	
Only one M-Bus card baelz 6200-M can be equipped per device. Order No. 6200-101	
Software for baelz 4614 control system on request.	
baelz 4615 remote control and parameter expression program on request.	
Pre-wiring of the controller: supplement baelz 3572	only for 6200-W4
For further accessories, see Baelz price list.

## baelz 6490 / 6590

### PID 3-POINT STEP CONTROLLER

baelz 6490B-y

baelz 6590

Industrial controller with special PID stepper algorithm.

baelz 6X90 / 6X90B / 6X90B-y µCelsitron microprocessor controllers are compact and reliable controllers suitable for many industrial control applications, e.g.: in dryers, reactors, autoclaves and heat exchangers.

### ADVANTAGES AT A GLANCE

- PI/PID control response with three-point output
- Easy operation with 3 or 4 keys
- Auto tuning, self-adaptation of the control parameters
- Option: RS485 Modbus RTU for connection to master computer
- Control digital input for OPEN, CLOSE, STOP, SP2, REM./LOC.
- Setpoint ramp with selectable gradient
- Manual/automatic switchover
- Thermocouple with ext. converter baelz 6261-Thermo
- Two-point/three-point selectable
- Up to 2 alarms: fixed, sliding, tolerance band/range
- LED status display

### Technical specifications, baelz 6490/6590 (6X90 stands for both types)

	6490...	6590...
<b>Controller type</b>	PID three-point modulating controller (6X90B ... for temperature)	
<b>Analog inputs</b>	PT100, 2.4 = 0...300°C or 2.2 = 0...400°C (other measuring ranges on request) Connection in 3-core technology; 0/4 ... 20 mA, Re = 50 Ω; 0/2 ... 10 V, Re = 100 kΩ	
<b>Analog output for actual value</b>	0...10V corresponds to 0...300°C (2.4) or 2.2 = 0...400°C (2.2) Imax = 2 mA	
<b>Digital inputs</b>	high active, Re = 1 kΩ; open / 0 VDC = low, 12 ... 24 VDC = high	
<b>Digital input and transducer supply voltage</b>	24 VDC, Imax = 60 mA	
<b>Interface</b>	RS485 Modbus protocol in RTU mode 1200 to 19200 baud; 1 start bit, 8 data bits, 1 stop bit, no parity	
<b>Display</b>	2 LED displays for setpoint and actual value	
<b>Mounting</b>	Panel front installation	
<b>Housing</b>	plastic	
<b>Dimensions WxHxD (mm)</b>	96 x 96 x 135	48 x 96 x 140
<b>Ingress protection rating</b>	IP 65 (front)	
<b>Power supply</b>	230 V / (special voltages on request: 115 V / 24 V), -15% / + 10%, 50/60 Hz	
<b>Weight. approx. (kg)</b>	0.6	0.5
<b>Ambient temperature (°C)</b>	Operating: 0...50; Transport / Storage: -25...+ 65	

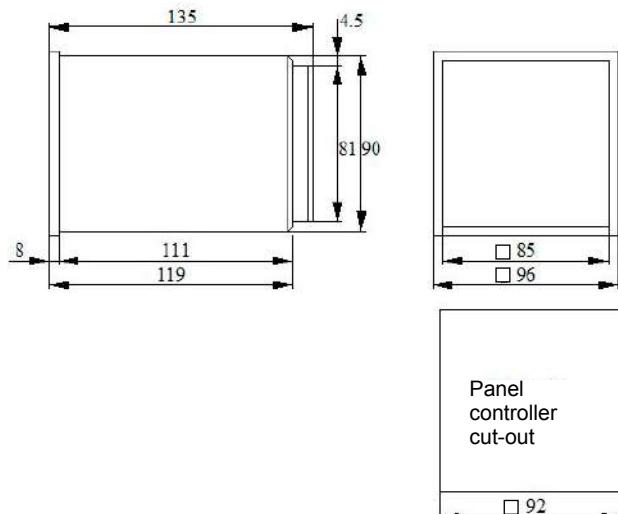

Options / Supplements	Remarks
2 inputs 0/4 ... 20 mA	
2 inputs 0/2 ... 10 V	
Differential temperature 0...50 K	
Measuring range PT100: -30...+ 60°C	
Calibration of measuring input PT100	for connection to Zener barriers
RS 485 - preload S15	for connection to remote maintenance module baelz 5279-NB (only for devices with RS 485)

#### Note:

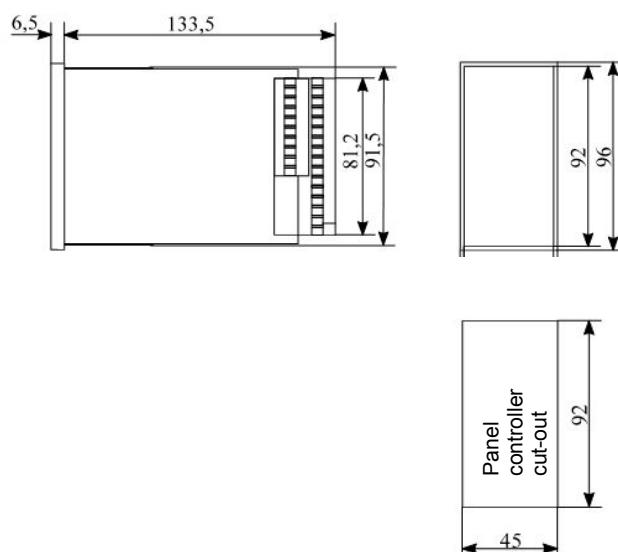

- Software for control technology, see baelz 4614
- Wall-mounted housing: Order No. 3570-001
- Adapter for rail mounting: Order No. 3506-004

Inputs and outputs, baelz 6490/6590 (6X90 stands for both types)							
Type	Measuring inputs	Controller output	Digital inputs	Actual value output 0...10 V (PT100)	Alarm relay with potential-free changeover contact 250 V AC / 3 A.	with RS485 interface Modbus RTU	with Y bar graph display
6X90/2	2 measuring inputs can be assigned either with the process variable or the external setpoint: PT100, 0/2...10 V or 0/4...20 mA	Three-point step / three-point / two-point selectable	5x (open, close, stop, external / internal and 2nd setpoint)	1x 0...10 V (PT100)	1x	No	No
6X90/3			3x (open, close, stop)	-	2x	Yes	No
6X90/4			3x (open, close, stop)	1x 0...10 V (PT100)	2x	Yes	No
6X90/5			1x for switching external / internal setpoint	1x 0...10 V (PT100)	2x	No	No
6X90B/0			-	-	1x	No	No
6X90B/4			1x (open, close, stop or 2nd setpoint)	-	1x	Yes	No
6X90B-y/3			-	-	1x	Yes	Yes

## baelz 6496 / 6596

### PID CONTINUOUS CONTROLLER

baelz 6496

baelz 6596

Constant controller with continuous control signal.

baelz 6X96 µCelsitron microprocessor controllers are compact and reliable controllers suitable for many industrial control applications, e.g.: in dryers, reactors, steam generators and superheated steam coolers (desuperheaters).

### ADVANTAGES AT A GLANCE

- P/PD/PI/PID control behavior with continuous control signal
- Easy operation with 4 buttons
- Auto tuning, self-adaptation of the control parameters
- Option: RS485 Modbus RTU for connection to master computer
- Standard housing 96x96 mm / 96x48 mm
- Control digital input for OPEN, CLOSE, STOP, SP2, REM./LOC.
- Setpoint and positioning ramp with selectable gradient
- Manual/automatic switchover
- Measuring inputs PT 100, 0 / 2-10V, 0 / 4-20mA
- Thermocouple with ext. converter baelz 6261-Thermo
- 2 separate LED displays for setpoint and actual value
- 2 alarms standard: fixed, sliding, tolerance band/range
- LED status display

### PID 3-POINT STEP CONTROLLER

PID three-point modulating controller with setpoint shift input or P/PID cascade controller

baelz 6X97 µCelsitron microprocessor controllers are compact and reliable controllers suitable for many industrial control applications, e.g.: in dryers, reactors, autoclaves and heat exchangers.

### ADVANTAGES AT A GLANCE

- PI/PID control response with three-point output
- Easy operation with 3 or 4 keys
- Auto tuning, self-adaptation of the control parameters
- Option: RS485 Modbus RTU for connection to master computer
- Standard housing 96x96 mm / 96x48 mm
- Control digital input for OPEN, CLOSE, STOP, SP2, REM./LOC.
- Setpoint ramp with selectable gradient
- Manual/automatic switchover
- Measuring inputs PT 100, 0 ... 20 mA, Re = 50 Ω; 0/2 ... 10 V, Re = 100 kΩ
- Thermocouple with ext. converter baelz 6261-Thermo
- two-point/three-point selectable
- 2 separate LED displays for setpoint and actual value
- Up to 2 alarms: fixed, sliding, tolerance band/range
- LED status display

### Technical specifications, baelz 6497/6597 (6X97 stands for both types)

	6497...	6597...
<b>Controller type</b>	PID continuous controller	
<b>Analog inputs</b>	PT100, 2.4 = 0...300°C or 2.2 = 0...400°C (other measuring ranges on request) Connection in 3-core technology; 0/4 ... 20 mA, Re = 50 Ω; 0/2 ... 10 V, Re = 100 kΩ	
<b>Analog output for actual value</b>	0...10V corresponds to 0...300°C (2.4) or 2.2 = 0...400°C (2.2) I <sub>max</sub> = 2 mA	
<b>Digital inputs</b>	high active, Re = 1 kΩ; open / 0 VDC = low, 12 ... 24 VDC = high	
<b>Digital input and transducer supply voltage</b>	24 VDC, I <sub>max</sub> = 60 mA	
<b>Interface</b>	RS485 Modbus protocol in RTU mode 1200 to 19200 baud; 1 start bit, 8 data bits, 1 stop bit, no parity	
<b>Display</b>	2 LED displays for setpoint and actual value	
<b>Mounting</b>	Panel front installation	
<b>Housing</b>	plastic	
<b>Dimensions WxHxD (mm)</b>	96 x 96 x 135	48 x 96 x 140
<b>Ingress protection rating</b>	IP 65 (front)

## 4.4 Ancillary equipment

### baelz 5195-SWI-5 5-port Ethernet switch

<b>Supply voltage</b>	18...30 V DC / 3 W
<b>Dimensions WxHxD (approx., mm)</b>	24 x 74 x 110

### baelz 5277-2 RSS 422/485 repeater

<b>suitable for bus lengths over approx. 1000 m and / or for more than approx. 30 bus users</b>	
<b>for Modbus RTU</b>	
<b>Mounting</b>	on DIN 35 mm rail
<b>Voltage</b>	230 V AC, +15%...-10%, 48...62 Hz
<b>Dimensions (mm)</b>	55 x 100 x 128
<b>Weight (approx., kg)</b>	0.4

### baelz 5280... Interface converter

<b>RS 232 / RS485 converter as desktop device</b>	
<b>Note: replacement for baelz 5275</b>	
<b>RS 485 connection</b>	Screw-type terminals
<b>RS 232 connection</b>	25-pin D-Sub socket incl. matching cable 3 m long for connection to PC (9-pin D-Sub connector)
<b>Ambient temperature (°C)</b>	5...50
<b>Humidity</b>	0...95% (non-condensing)
<b>Configuration</b>	<b>5280-1</b> preconfigured for WINBAS <b>5280-2</b> preconfigured for INBAS
<b>Voltage</b>	115/230 V, +15%...-10%, 48...62 Hz
<b>Dimensions WxHxD (mm)</b>	161 x 53 x 139
<b>Weight (approx., kg)</b>	1.0

### baelz 5280-TS Interface converter

<b>RS 232 / RS485 converter - DIN rail mounting</b>	
<b>RS 485 connection</b>	Screw-type terminals
<b>RS 232 connection</b>	9-pin D-Sub socket incl. matching cable 3 m long for connection to WINBAS or INBAS PC (9-pin D-Sub connector)
<b>Ambient temperature (°C)</b>	5...50
<b>Humidity</b>	0...95% (non-condensing)
<b>Configuration</b>	<b>5280-TS-1</b> preconfigured for WINBAS <b>5280-TS-2</b> preconfigured for INBAS
<b>Voltage</b>	230 V, +15%...-10%, 48...62 Hz
<b>Dimensions WxHxD (mm)</b>	55 x 100 x 128
<b>Weight (approx., kg)</b>	0.6

**baelz 5280-MX-UPort interface converter**
**USB / serial converter with optical isolation**

<b>RS 232- / 422- / 485 connection</b>	9-pin D-Sub connector
<b>USB</b>	Type B
<b>Ambient temperature (°C)</b>	5...55
<b>Humidity</b>	0...95% (non-condensing)
<b>including</b>	1x screw terminal adapter 1x USB cable
<b>Voltage</b>	5 V DC / 260 mA from the USB
<b>Dimensions WxHxD (mm)</b>	52 x 80 x 22
<b>Weight (approx., kg)</b>	0.1

**baelz 5279-BAC-5-RS4-... BACnet protocol converter**
**for BACnet / IP as server and Modbus RTU as master for max. 500 data points**

<b>1x RJ45 10/100 MBิต</b>	for connection to BACnet/IP client
<b>1x RS 485 on terminals</b>	for connection to Modbus RTU slaves
<b>LED-Anzeige</b>	Power, status, RxD, TxD
<b>Operating voltage</b>	12...24 V AC/DC, max. 200 mA
<b>Ambient temperature (°C)</b>	20...80% RH, non-condensing
<b>Humidity</b>	
<b>Mounting</b>	DIN rail DIN EN 50022
<b>Dimensions WxHxD (mm)</b>	31 x 100 x 70
<b>Weight (approx., kg)</b>	0.3
<b>5279-BAC-5-RS4-20</b>	including preconfiguration ex-factory for max. 20 data points
<b>5279-BAC-5-RS4-40</b>	including preconfiguration ex-factory for max. 40 data points
<b>5279-BAC-5-RS4-60</b>	including preconfiguration ex-factory for max. 60 data points
<b>5279-BAC-5-RS4-100</b>	including preconfiguration ex-factory for max. 100 data points
<b>MP5279-BAC-5-VK1</b>	Supplement for preconfiguration of another data point ex-factory
<b>PLEASE NOTE</b>	Power supply unit Order No. 6208-021 must be ordered separately

**baelz 5279-DP Protocol converter**
**for Profibus DP as slave and Modbus RTU as master; for max. 368 bytes of input and output data**

<b>1x RS 485 (D-Sub 9-pin), not galvanically isolated</b>	for connection to Profibus DP master; max. 12 MBaud
<b>1x RS 485</b>	for connection to Modbus RTU slaves; max. 19.2 kBaud
<b>Including 1x RS 485 connection cable 4 m</b>	
<b>LED-Anzeige</b>	Communication, error
<b>Operating voltage</b>	18...30 V DC
<b>Current consumption</b>	max. 0.2 A at 24 V DC
<b>Operating temperature (°C)</b>	0..60
<b>Ingress protection rating</b>	IP 20
<b>Mounting</b>	DIN rail DIN EN 60715
<b>Dimensions LxWxH (mm)</b>	65 x 25 x 100
<b>Weight (approx., kg)</b>	0.3
<b>5279-DP-40</b>	including preconfiguration ex-factory for max. 40 variants
<b>5279-DP-20</b>	including preconfiguration ex-factory for max. 20 variants
<b>5279-DP-10</b>	including preconfiguration ex-factory for max. 10 variants
<b>PLEASE NOTE</b>	If there is no power supply for 24 V DC, Provide power supply unit Order No. 6208-021 Configuration Profibus DP on site

**baelz 5279-PNET protocol converter**
**for Profibus DP as slave and Modbus RTU as master; for max. 368 bytes of input and output data**

<b>1x RS 485 (D-Sub 9-pin), not galvanically isolated</b>	for connection to PROFINET I/O controller 10/100 BASE-TX
<b>1x RS 485</b>	for connection to Modbus RTU slaves; max. 19.2 kBaud
<b>Including 1x RS 485 connection cable 4 m</b>	
<b>LED-Anzeige</b>	Communication, error
<b>Operating voltage</b>	18...30 V DC
<b>Current consumption</b>	max. 0.2 A at 24 V DC
<b>Operating temperature (°C)</b>	0..60
<b>Ingress protection rating</b>	IP 20
<b>Mounting</b>	DIN rail DIN EN 60715
<b>Dimensions LxWxH (mm)</b>	65 x 25 x 100
<b>Weight (approx., kg)</b>	0.3
<b>5279-PNET-40</b>	including preconfiguration ex-factory for max. 40 variants
<b>5279-PNET-20</b>	including preconfiguration ex-factory for max. 20 variants
<b>5279-PNET-10</b>	including preconfiguration ex-factory for max. 10 variants
<b>PLEASE NOTE</b>	If there is no power supply for 24 V DC, Provide power supply unit Order No. 6208-021 Profinet configuration on-site

<b>baelz 5279-BAC-2-TCP      BACnet protocol converter</b>	
<b>for BACnet/IP as server and Modbus-TCP as client; for max. 200 data points</b>	
<b>1x RJ45 10/100 MBit via external Ethernet switch</b>	for connection to BACnet/IP client and Modbus TCP
<b>1x RS 485</b>	on terminals
<b>LED-Anzeige</b>	Power, status, RxD, TxD
<b>Operating voltage</b>	12...24 V AC/DC, max. 200 mA
<b>Ambient temperature (°C)</b>	0...45
<b>Humidity</b>	20...80% RH non-condensing
<b>Mounting</b>	DIN rail DIN EN 50022
<b>Dimensions WxHxD (mm)</b>	31 x 100 x 70
<b>Weight (approx., kg)</b>	0.3
<b>5279-BAC-2-TCP-20</b>	including preconfiguration ex-factory for max. 20 data points
<b>5279-BAC-2-TCP-40</b>	including preconfiguration ex-factory for max. 40 data points
<b>5279-BAC-2-TCP-60</b>	including preconfiguration ex-factory for max. 60 data points
<b>5279-BAC-2-TCP-100</b>	including pre-configuration ex-factory for max. 100 data points
<b>PLEASE NOTE</b>	Power supply unit Order No. 6208-021 must be ordered separately 5-way Ethernet switch, see Order No. 5195-SWI-5-001

<b>baelz 5279-BAC-2-RS4 BACnet protocol converter</b>	
<b>for BACnet / IP as server and Modbus RTU as master for max. 200 data points</b>	
<b>1x RJ45 10/100 MBit</b>	for connection to BACnet/IP client
<b>1x RS 485</b>	on terminals, for connection to Modbus RTU slaves
<b>LED-Anzeige</b>	Power, status, RxD, TxD
<b>Operating voltage</b>	12...24 V AC/DC, max. 200 mA
<b>Ambient temperature (°C)</b>	0...45
<b>Humidity</b>	20...80% RH non-condensing
<b>Mounting</b>	DIN rail DIN EN 50022
<b>Dimensions WxHxD (mm)</b>	31 x 100 x 70
<b>Weight (approx., kg)</b>	0.3
<b>5279-BAC-2-RS4-20</b>	including preconfiguration ex-factory for max. 20 data points
<b>5279-BAC-2-RS4-40</b>	including preconfiguration ex-factory for max. 40 data points
<b>5279-BAC-2-RS4-60</b>	including preconfiguration ex-factory for max. 60 data points
<b>5279-BAC-2-RS4-100</b>	including pre-configuration ex-factory for max. 100 data points
<b>MP5279-BAC-2-VK1</b>	Supplement for preconfiguration of another data point ex-factory
<b>PLEASE NOTE</b>	Power supply unit Order No. 6208-021 must be ordered separately

## Ancillary equipment

<b>baelz 5279-EC-EC61330</b>	<b>Remote maintenance module without preconfiguration</b>
<b>For remote maintenance of touch panel systems. Includes free connection software for configuration of VPN tunnel to industrial router. Ethernet TCP/IP</b>	
<b>Configuration</b>	by web server, FTP server or SD card (internet required)
	1x to 4x LAN RJ45 Ethernet 10 / 100 MBit/s (fully configurable)
<b>Interfaces</b>	0x to 3x WAN RJ45 Ethernet 10 / 100 MBit/s (fully configurable)
	USB 2.0 socket (max. 500 mA)
	SD card slot
<b>Digital inputs</b>	2; max. 24 V DC
<b>Digital output</b>	1; MOSFET, 200 mA
<b>Temperature range (°C)</b>	-25...+70°C
<b>Humidity</b>	10 to 95% RH, non-condensing
<b>Supply voltage</b>	12...24 V DC +/-20%
<b>Power consumption max. (W)</b>	4
<b>Housing</b>	metal
<b>Dimensions WxHxD (mm)</b>	43 x 108 x 99 mm
<b>Mounting</b>	DIN rail or wall-mounted with screw fixing system
<b>Ingress protection rating</b>	IP 20
<b>Weight (approx., kg)</b>	0.2
<b>Certification</b>	CE, UL, FCC

<b>baelz 5279-EC-EC6133G</b>	<b>Remote maintenance module without preconfiguration</b>
<b>For remote maintenance of touch panel systems. Includes free connection software for configuration of VPN tunnel to industrial router. Ethernet TCP/IP, 3G</b>	
<b>Configuration</b>	by web server, FTP server or SD card (internet required)
	1x to 4x LAN RJ45 Ethernet 10 / 100 MBit/s (fully configurable)
<b>Interfaces</b>	0x to 3x WAN RJ45 Ethernet 10 / 100 MBit/s (fully configurable)
	USB 2.0 socket (max. 500 mA)
	SD card slot
	LAN, 3G (wireless mobile) incl. antenna with 5 m cable
<b>Digital inputs</b>	2; max. 24 V DC
<b>Digital output</b>	1; MOSFET, 200 mA
<b>Temperature range (°C)</b>	-25...+70°C
<b>Humidity</b>	10 to 95% RH, non-condensing
<b>Supply voltage</b>	12...24 V DC +/-20%
<b>Power consumption max. (W)</b>	4
<b>Housing</b>	metal
<b>Dimensions WxHxD (mm)</b>	43 x 108 x 99 mm
<b>Mounting</b>	DIN rail or wall-mounted with screw fixing system
<b>Ingress protection rating</b>	IP 20
<b>Weight (approx., kg)</b>	0.2
<b>Certification</b>	CE, UL, FCC

**baelz 5279-NB2 Remote maintenance module**

for remote diagnosis, remote maintenance, remote evaluation and long-term data storage, reporting and user management as well as alarm management with e-mail / SMS notification

<b>Plant schematic image</b>	3
<b>Overview</b>	1
<b>Data points / alarms</b>	128
<b>Recording buffer</b>	50,000 values
<b>Serial interface # 1</b>	RS 232, DSUB
<b>Serial interface # 2</b>	RS 485, insulated, terminals
<b>Ethernet</b>	10/100 MBit/s, RJ45
<b>Logs/protocols</b>	Modbus-RTU/TCP
<b>Digital inputs</b>	2 isolated, max. 24V DC
<b>1 relay</b>	Max. 24V / 1A
<b>4 analog inputs</b>	0...10 V, 0...20 mA, max. 2x Pt100
<b>Temperature range (°C)</b>	-40...+65
<b>Supply voltage</b>	12...48 V DC
<b>Power consumption max. (W)</b>	4.5
<b>Housing</b>	Metal
<b>Dimensions WxHxD (mm)</b>	135 x 92 x 27
<b>Ingress protection rating</b>	IP 20
<b>Weight (approx., kg)</b>	0.5

<b>EC310</b>	<b>Process data transmission via the Internet</b>
<b>EC350</b>	<b>Process data transmission via Ethernet and mobile radio</b>

<b>W</b>	<b>Installed in a wall housing with power supply</b>
<b>Dimensions WxHxD (mm)</b>	182 x 180 x 90
<b>Cable glands</b>	3 x M16 x 1,5
<b>Ingress protection rating</b>	IP 66
<b>Ambient temperature (°C)</b>	-25...+40
<b>Max. humidity</b>	50% RH at 40°C
<b>Power supply 6208-021</b>	100...230 V AC / 24 V DC (0.6 A)
<b>including</b>	<ul style="list-style-type: none"> <li>• external SMA antenna with magnetic base</li> <li>• 10 m extension cable</li> </ul>

<b>2RK</b>	<b>Preconfiguration for max. 2 control loops, max. 16 trend and display variables; 1 plant schematic image (e.g. for baelz 6164, 7164, 64 / 65XX)</b>

------------	--

**Important instructions:**

**RS 485 preload S15** (supplement) required with baelz 6200 / 6XXX. Extension on-site or ex-factory possible.

To supply the remote maintenance module, a 24 V DC power supply is required, see Order No. 6208-021

For operation with GSM/GPRS, a SIM card with data terminal is required (on-site)

<b>baelz 452-N-1 Control unit</b>	
<b>for steam heat transfer stations. Wall and panel control mounting with the following operating/display elements:</b>	
<b>Selector switch</b>	Open/close automatic
<b>Signal lamp</b>	Network (automatic position active)
<b>Signal lamp</b>	Automatic mode (automatic position active and circulating pump switched on)
<b>Signal lamp</b>	Drainage (DLE active: condensate valve is opened)
<b>Signal lamp</b>	Temperature monitor (condensate thermostat addressed, condensate valve closed)
<b>Signal lamp</b>	Fault (safety temperature limiter STB addressed)
<b>Key/button</b>	Test (hereby the safety temperature limiter can be simulated)
<b>Ingress protection rating</b>	IP 43
<b>Supply voltage</b>	230 V, 50 Hz
<b>with built-in pre-fuse</b>	2 A (medium-time lag)
<b>Dimensions WxHxD (mm)</b>	144 x 96 x 93
<b>Weight (approx., kg)</b>	0.8

## Ancillary equipment

### baelz 455 Empty housing

for mounting baelz 1020. Wall mounting or mounting on actuator.

Housing / cover	Polycarbonate (RAL 7035)
Ingress protection rating	IP 66 / 67
Temperature (°C)	-40...+80
455-1	for baelz 1020 without power supply
455-3	for baelz 1020 with power supply
Dimensions LxWxH (approx., mm)	130 x 130 x 75
Weight (approx., kg)	0.4

Including mounting plate and TS 35 mounting rail and the required screws / cover screws

### baelz 455-2 Empty housing

For mounting baelz 477, 456, 457, 462 and 465 relays. Wall mounting.

Housing	Polycarbonate (RAL 7035) with transparent cover, smoke gray
Ingress protection rating	IP 66 / 67
Temperature (°C)	-40...+80
Dimensions LxWxH (approx., mm)	130 x 130 x 125
Weight (approx., kg)	0.4

Including mounting plate and TS 35 mounting rail and the required screws / cover screws

### baelz 455-3 Clock

Use e.g. for automatic sludge blowdown. For switch cabinet interior installation or fitting to a mounting rail.

Separately adjustable pulse and pause times; Time ranges from 0.05 sec to 300 h adjustable.

Output relay	2 changeover contacts 250 V / 3 A
Power supply	24...240 V, 50/60 Hz
Ingress protection rating	IP 20
Dimensions WxHxD (mm)	22,5 x 85 x 100
Weight (approx., kg)	0.14

### baelz 465-KFA6 Contact protection and isolating relay

Use e.g. for automatic sludge blowdown. For switch cabinet interior installation or fitting to a mounting rail.

Separately adjustable pulse and pause times; Time ranges from 0.05 sec to 300 h adjustable.

Housing	plastic
Ingress protection rating	IP 20
Switching capacity	2 A, 250 V AC; Cos φ > 0,7
Weight (approx., kg)	0.15
2-channel	
1 relay output with 1 changeover contact per channel	
for EEx ia II C control circuits (control circuits in zone 0/1/2)	

## baelz 6205-B Transformer

### **EN 61558-2/6. For powering devices with 24 V operating voltage**

Open design, stationary, for device installation and installation in dry rooms.

Strong foot angle piece for attachment. Screw connection with finger-proof leakage-current-proof transformer terminals.

**Ingress protection rating**

IP 00

**Insulation class**

T50/B

**Max. ambient temperature (°C)**

40

**primary**

230 V AC

**secondary**

24 V AC

### baelz 6205-B...

Type	Power (VA)	Dimensions WxHxD (mm)	Weight (approx., kg)
6205-B-24/60VA	60	78 x 86 x 88	1.4
6205-B-24/100VA	100	85 x 91 x 102	2
6205-B-24/160VA	160	97 x 102 x 105	3
6205-B-24/250VA	250	97 x 102 x 119	3,6

## baelz 6208/2-1,0A Power supply

With sieving and stabilized. Housing for DIN rail mounting.

**Input voltage** 230 V AC ±10%

**Input fuse** internal

**Output voltage** 24 V DC

**Residual ripple** max. 3%

**Ingress protection rating** IP 20

**Temperature range (°C)** -10...+40

**Output current (A)** 1.0

**Dimensions WxHxD (mm)** 90 x 115 x 78

**Weight (approx., kg)** 1.1

## baelz 6208/3 Switching power supply

With LED operating display. Housing for DIN rail mounting.

**Input voltage** 85...264 V AC

**Output voltage** 24 V DC; 21.6 ... 26.4 V DC adjustable

**Ingress protection rating** IP 20

**Operating temperature (°C)** -10...+50

**Operating humidity** 20...90% RH, non-condensing

### baelz 6208/3...

Type	Output current	Residual ripple	Dimensions WxHxD (mm)	Weight (approx., kg)
6208/3-0,63A	max. 0.63 A	150 mVp-p	25 x 93 x 56	0.2
6208/3-1,0A	max. 1.0 A	150 mVp-p	78 x 93 x 56	0.3
6208/3-2,0A	max. 2.0 A	480 mVp-p	78 x 93 x 67	0.4

**baelz 6226-B    Digital display instrument**

Panel front installation		
<b>Display</b>	4-digit LED	
<b>Display height (mm)</b>	10	
<b>Housing</b>	Plastic, black	
<b>Ingress protection rating</b>	IP 54	
<b>Ambient temperature (°C)</b>	+5...50	
<b>Input signal</b>	Pt100, 3-wire	
<b>DC linear / scalable</b>	mV, V, mA	
<b>Thermocouples</b>	J, K, T, E, N	
<b>2 relay outputs</b>	programmable e.g. min., max. alarms	
<b>NO contact</b>	1.5 A, 230 V AC (resistive load)	
<b>Power consumption</b>	approx. 3 VA	
<b>Supply voltage</b>	<b>Type 6226-B-100...240VAC</b> <b>Type 6226-B-24VAC/DC</b>	100...240 V AC 24 V AC/DC ( $\pm 10\%$ )
<b>Dimensions WxHxD (mm)</b>	48 x 48 x 110	
<b>Weight (approx., kg)</b>	0.3	

**baelz 1049 Safety Zener barriers**

with ATEX approval Ex II (1/2) G [EEx ia(ib)] II B / IIC. To maintain an intrinsically safe measuring circuit

Mounting outside the hazardous area. i intrinsically safe ignition protection rating

<b>Operating temperature (°C)</b>	-20...+60
<b>Humidity</b>	$\leq 95\%$ RH, no condensation
<b>Housing material</b>	Polyamide 6 fiberglas
<b>Ingress protection rating</b>	Housing: IP 40; Terminals: IP 20
<b>Rail mounting, WxHxD (mm)</b>	12.2 x 104 x 70
<b>Weight (approx., kg)</b>	0.1
1049-S11	Single barrier, positive
1049-S4	Single barrier, positive
1049-S5	Single barrier, alternating current
1049-S6	Double barrier, alternating current
1049-S1-red	Single barrier, positive
1049-S21	Double barrier, alternating current (for baelz 828-N-Ex)

**Note:** With NTC connection, the series resistance of the barriers is included in the measurement. Analog output 0/4 ... 20 mA z. e.g. to control the I/P converter baelz 86/IP8000. For other controllers on request.

**Connection table arranged according to connection type**

Connection	Controller type	Zener barrier 1049 ...
Pt100	6X9X, 3659X, 6X9XA, 6X9XB, 6200, 6164, 6265, 5200, 6390	1 x S5, 1 x S6
NTC	6200, 6265, 6164 5200, 6390	1 x S5, 1 x S6 1 x S5
Transmitters	6200, 6265, 6164	2 x S11
Actual value display	6X9X (from Pt100)	1 x S4
Analogue output 0/4 ... 20 mA	6200, 6X96, 6X87	1 x S4
Analogue output 0/2 ... 10 V	6200, 6164, 6X96, 6X87	1 x S4
Ext. setpoint potentiometer	229X, 23XX, 329XX	2 x 1049-S1 red

**baelz 1049-T Isolating transformer**
**For intrinsically safe operation (EEx ia) IIC of baelz 88-Sp400/401-EEx positioner (with and without HART)**
**Ex II 3 (1) G Ex nA nC (ia Ga) IIC T4 Gc; Ex II (1) D (dEx ia Da) IIIC**
**Galvanic isolation between input, output and auxiliary energy supply**

<b>Analog output</b>	0/4...20 mA
<b>Auxiliary power supply</b>	24 V DC
<b>Voltage range</b>	18...31.2 V
<b>Input</b>	0/4...20 mA
<b>Ex i output</b>	0/4...20 mA, max. load 0...800 Ω
<b>Ambient temperature (°C)</b>	-20...+70
<b>Humidity</b>	≤ 95% RH, no condensation
<b>Housing material</b>	Polyamide
<b>Ingress protection rating</b>	Housing: IP30; Terminals: IP 20
<b>1049-T44</b>	1 channel
<b>1049-T45</b>	2 channels
<b>DIN rail mounting, WxHxD (mm)</b>	99 x 122 x 17.6
<b>Weight (approx., kg)</b>	0.16

**Note:** Also for baelz 86/IP8000 split range

**baelz 6260 Buffer amplifier**
**For galvanic isolation and conversion of analog signals (no galvanic isolation of the output signals)**

For switch cabinet installation (DIN rail mounting)

<b>Power supply</b>	230 V, 50/60 Hz		
<b>Dimensions, WxHxD (mm)</b>	48 x 72 x 94		
<b>Weight (approx., kg)</b>	0.2		
<b>baelz 6260...</b>			
<b>6260-8.1-7.1</b>	Input	0...10V	R <sub>i</sub> = 200 kΩ
	Output 1	0...20 mA	(load 800 Ω)

	Output 2	4...20mA	(load 800 Ω)

## baelz 6261 Measuring amplifier

**For converting or amplifying analog signals** (no galvanic isolation between input and output signals!)

For switch cabinet interior installation (DIN rail mounting)

<b>Power supply</b>	230 V, 50/60 Hz		
<b>Dimensions, WxHxD (mm)</b>	48 x 72 x 94		
<b>Weight (approx., kg)</b>	0.2		
<b>baelz 6261...</b>			
<b>6261-8.1-7.1</b>	Input	0...10V	Ri = 200 kΩ
	Output 1	0...20 mA	(load 800 Ω)
	Output 2	0...10 V	(Imax = 20 mA)
<b>6261-8.1-7.2</b>	Input	0...10V	Ri = 200 kΩ
	Output 1	4...20mA	(load 800 Ω)
	Output 2	2...10V	(Imax = 20 mA)
<b>6261-7.1-8.1</b>	Input	0...20 mA	Ri = 50 kΩ
	Output 1	0...10V	(Imax = 20 mA)
	Output 2	0...20 mA	(load 800 Ω)
<b>6261-7.2-8.1</b>	Input	4...20mA	Ri = 50 kΩ
	Output 1	0...10V	(Imax = 20 mA)
	Output 2	0...20 mA	(load 800 Ω)
<b>6261-4.2-7.2</b>	Input	Potentiometer 5 kΩ	(3-wire)
	Output 1	4...20mA	(load 800 Ω)
	Output 2	2...10V	(Imax = 20 mA)
<b>6261-PT100-7.2</b>	Input	Pt100	(3-wire)
	Range	-100...+ 800 ° C, min. range 0...40°C. When ordering please specify range.	
	Output 1	4...20 mA	(load 800 Ω)
	Output 2	2...10 V	(Imax = 20 mA)

## baelz 3502 Aluminium plate

**Suitable for baelz 164 and 6164**

<b>for panel controller cut-out (mm)</b>	187 x 187
<b>Weight (approx., kg)</b>	0.5
<b>3502</b>	Aluminum plate
<b>3502-S</b>	Aluminum plate with manual switch On-Off-Automatic-Off

## baelz 3503 Aluminum plate

**For μCelsitron controller baelz 64XX**

<b>with cutout (mm)</b>	92 x 92
<b>for panel controller cut-out (mm)</b>	187 x 187
<b>Adapter plate dimensions (mm)</b>	192 x 192
<b>Weight (approx., kg)</b>	0.3

## baelz 3504-1 Aluminum adapter plate

Serves in conjunction with μCelsitron controller 64XX as replacement for controller insert baelz 2256 (white)

Incl. 25 terminal blocks

<b>with cutout (mm)</b>	92 x 92	
<b>Adapter plate dimension (mm)</b>	192 x 192	
<b>baelz 3504-1...</b>		
<b>Type</b>	<b>Version</b>	<b>Weight (approx., kg)</b>
<b>3504-1</b>	Aluminum adapter plate as listed	2.0
<b>3504-1-M</b>	including controller installation and wiring on terminal blocks (price without controller)	2.6

## baelz 3505 Transparent door with lock

Ingress protection rating		IP 55	
baelz 3505...			
Type	für baelz-Type	Dimensions (mm)	Weight (approx., kg)
3505	µCelsitron controller 64XX	96 x 96 x 32	0.1
3505-1	6200-192-4	192 x 96 x 34	0.2
3505-2	6164/2	144 x 96 x 34	0.2

## baelz 3506-C Adapter

Enables the switch cabinet interior installation of the controller listed below (fitting to a mounting rail)	
<b>for baelz types</b>	64XX and 6164
<b>Weight (approx., kg)</b>	0.05

## baelz 3508-3514 Aluminum adapter plate

For internal switch cabinet installation of a microprocessor controller baelz 6200-192-4 in Pilotronic magazine baelz 3514 (price without controller)	
<b>Dimensions (mm)</b>	266 x 179
<b>with cutout (mm)</b>	186 x 92
<b>Weight (approx., kg)</b>	0.3

## baelz 3508-3524 Aluminum adapter plate

For panel controller front mounting of a microprocessor controller baelz 6200-192-4 (price without controller) as a replacement for Pilotronic magazine baelz 3524-R	
<b>Dimensions (mm)</b>	274 x 222
<b>with cutout (mm)</b>	186 x 92
<b>Weight (approx., kg)</b>	0.3

## baelz 3570 / baelz 3572 Wall-mounted housing

<b>For baelz 6200, 64XX and 2290</b>				
Hinge and quick assembly system, without screws. Opening is possible on both left and right sides and between each system part.				
Terminal compartment with cable glands PG 13.5				
<b>Housing</b>	plastic			
<b>Ingress protection rating</b>	IP 66			
<b>baelz 3570... / baelz 3572...</b>				
Type	for installation of	front cover	Dimensions WxHxD (mm)	Weight (approx., kg)
3570-FD-1,5	baelz 64XX, 2290	crystal clear, 4 x PG 13.5	176 x 237 x 224	1.55
3570-FR	1 card baelz 6200-B /-BAA. DENT-RS485	4 x PG 13.5	176 x 237 x 74	1.20
3570-FD-1.0+1.0	baelz 6200-192-4	crystal clear, 6 x PG 13.5	323 x 237 x 261	2.50

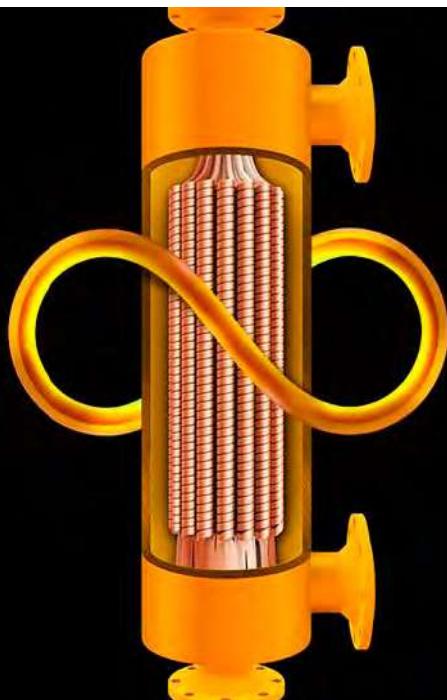

Connection is made with screw terminals on the back of the respective device. Delivery is built-in, unwired (prices without microprocessor controller). Front cover with cylinder lock, see supplements.

If the external peripherals are not connected with flexible cables, we recommend prewiring the controller (s), see supplement (below).

## Supplements

<b>MP3572-SHLO</b>	Cylinder lock for front cover for housing 3570 ... 3572		
<b>MP3572-V7</b>	Pre-wiring of the controllers to DIN rail-mounted terminal blocks	7 terminal blocks	
<b>MP3572-V14</b>		14 terminal blocks	
<b>MP3572-V14K</b>		14 terminal blocks	including installation and wiring of a coupling relay.

Other versions on request.

**Baelz-thermodynamic®**

Baelz offers heat exchangers for carrier fluids such as steam, condensate, hot and warm water.

A wide range, from conventional equipment to the world's only modular steam solution, is available for all types of HVAC, district heating and industrial installations.

As a manufacturer, we are able to offer custom solutions. Steam generators and coolers complete the program. For all types of heat exchanger we also offer pre-assembled compact stations.

Tube bundle materials are steel, copper and stainless steel. Appliances made entirely of stainless steel are also part of the delivery program. All steam-heated heat exchangers are operated with the proven condensate control system to ensure the greatest possible condensate cooling.

Note: For systems and stations with heat exchangers, see Chapter 6.1  
"Steam and condensate - Baelz-thermodynamic®" starting on page 178 of this catalogue.

### baelz 105

#### U-tube heat exchanger

- in standing or lying version
- U-tube bundle exchangeable
- with feet
- standing version optional with tipping device
- PED 2014/68/EU compliant

page 163

### baelz 106

#### Spiral-tube heat exchanger

- standing version
- exchangeable tube bundles optional
- Options: with feet / wall mounting / tipping device
- high elasticity for large temperature differences

page 166

### baelz 111 / 112

#### Straight-tube heat exchanger

- standing version, thus suitable for capacity control with condensate backup
- ring channel optional
- compensator optional
- baelz 112 suitable for sanitary water

page 169

### baelz 118

#### Condensate injection coolers

- industrial controller with special PID for cooling high pressure condensate without risk of evaporation
- exchangeable tube bundles optional
- stainless steel 1.4571 tube bundles
- many design options

page 170

### baelz 120

#### One-piece steam-heated source evaporator

- standing version
- with coiled tube bundle
- suitable for condensate control with forced condensate cooling
- with feet
- version without glands

page 171

### baelz 122

#### U-tube evaporator, steam-heated

- horizontal version
- exchangeable U-tube bundle
- with support device
- with supporting cradles

page 172

### baelz 128

Condensate tank

- angular design
- for unpressurized operation
- in steel or stainless steel
- with process connections
- without insulation

page 173

### baelz 134

Stainless steel water tank

- standing version on base ring
- including removable insulation with polystyrene shell
- special sizes possible
- production according to DIN 4753, Part 1

page 174

### baelz 135

U-tube heat exchanger

- horizontal version
- U-tube bundle exchangeable
- with feet

page 175

### baelz 140

Plate heat exchanger

- in soldered or screwed version
- compact design
- innovative plate technology
- wide range of capacities

page 176

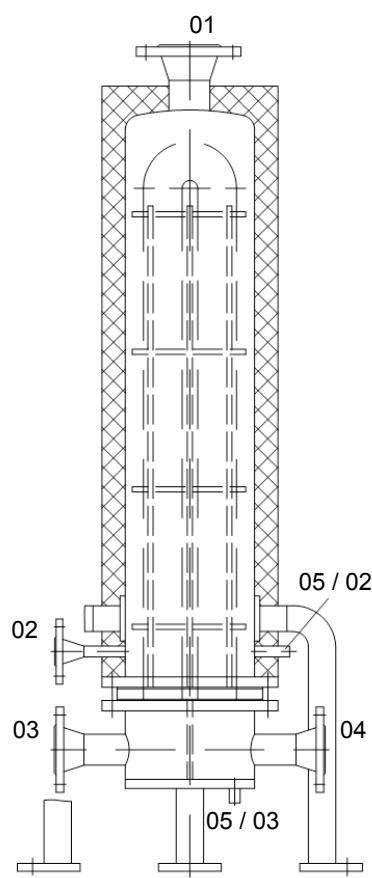

### baelz 147

Module heat exchanger

- for modular transfer stations
- for hot water heating, sanitary water heating, cooling, production facilities, drinking water
- self-cleaning effect to counter deposits
- completely made of copper

## baelz 105

### U-TUBE HEAT EXCHANGERS

- in standing or lying version
- U-tube bundle exchangeable
- with feet
- vertical version optional with tipping device

### FLUIDS

#### standing version:

tube side fluids; shell side steam

#### horizontal version (optional):

tube side steam; Sheath side fluids

tube side fluids; shell side steam

tube side fluids; shell side fluids

**Fluids:** e.g. heating/sanitary water, glycol, hot oil, neutral liquids, other fluids on request.

To avoid corrosion in heat exchangers, water qualities must be checked and recorded at regular intervals.

Requirements for water qualities can be found in our Corrosion Specification, which we are happy to send you upon request.

### Technical specifications, baelz 105

Tubes	Steel / copper / stainless steel
Tube sheet	Steel / plated / stainless steel
Preheader	Steel / stove enamelled / parts in contact with the fluid 1.4571
Shell	Steel
Insulation	Mineral wool with galvanized metal shell (50 / 80 mm)
Housing length	min. 1000 mm, max. 8000 mm
Diameter	min. Ø 114 mm, max. Ø 1200 mm

Design, production and testing according to Pressure Equipment Directive PED 2014/68/EU

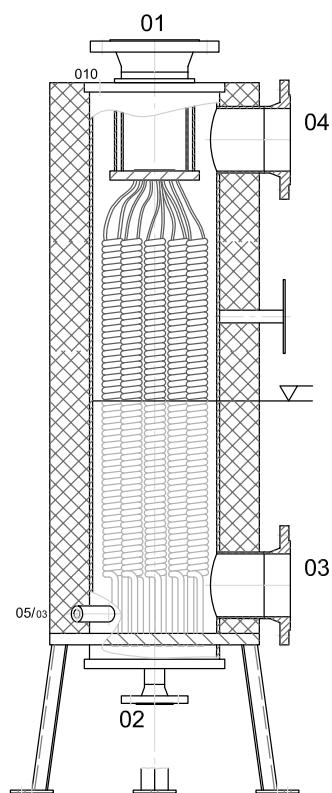

Category / Module: I / A, II / A2, III / G or IV / G or Art. 4, para. 3 and AD 2000 Rules.

baelz 105 - standing version: tube side liquid; shell side steam

- 01 = heating steam inlet
- 02 = condensate outlet
- 03 = secondary return
- 04 = secondary flow
- 05/02 = Primary emptying (G 1/2")
- 05/03 = Secondary emptying (G 1/2")

#### Note:

- In accordance with AD 2000 no load transfer may take place across flange and socket connections.
- For the horizontal version, a straight pipe must be provided on the inlet side as a calming section with a length of min. 6 x DN of the heat exchanger inlet nozzle. The nominal diameters of the pipe and heat exchanger inlet nozzles must match.
- Required hot water quality according to VDI 2035 (avoidance of damage in hot water heating systems according to DIN EN 12828)

## baelz 106

### SPIRAL TUBE HEAT EXCHANGERS

- standing version, thus suitable for capacity control with condensate backup
- exchangeable tube bundles optional
- Options: with feet / wall mounting / tipping device
- high elasticity for large temperature differences
- version without glands

### FLUIDS

Tube side inlet/outlet: steam/condensate  
Shell side: heating water / sanitary water / glycol

To avoid corrosion in heat exchangers, water qualities must be checked and recorded at regular intervals.

Requirements for water qualities can be found in our Corrosion Specification, which we are happy to send you upon request.

### Technical specifications, baelz 106

<b>Tubes</b>	Copper / stainless steel, tube bundles not exchangeable
<b>Tube sheet</b>	Carbon steel
<b>Preheader</b>	Carbon steel
<b>Shell</b>	Carbon steel
<b>Condensate tray</b>	Carbon steel, not removable
<b>Insulation</b>	Mineral wool with galvanized metal shell 80 mm
<b>Housing height</b>	max. 2200 mm
<b>Diameter</b>	min. Ø 89 mm, max. Ø 1000 mm

Design, production and testing according to Pressure Equipment Directive PED 2014/68/EU  
Category / Module: I / A, II / A2, III / G or IV / G or Art. 4, para. 3 and AD 2000 Rules.

### Supplements

removable condensate tray (B1) made of carbon steel
removable condensate tray (C1) made of carbon steel incl. 2 connections for thermo-level degassing (TNE)
exchangeable tube bundle (Fa)
"TURBO" version

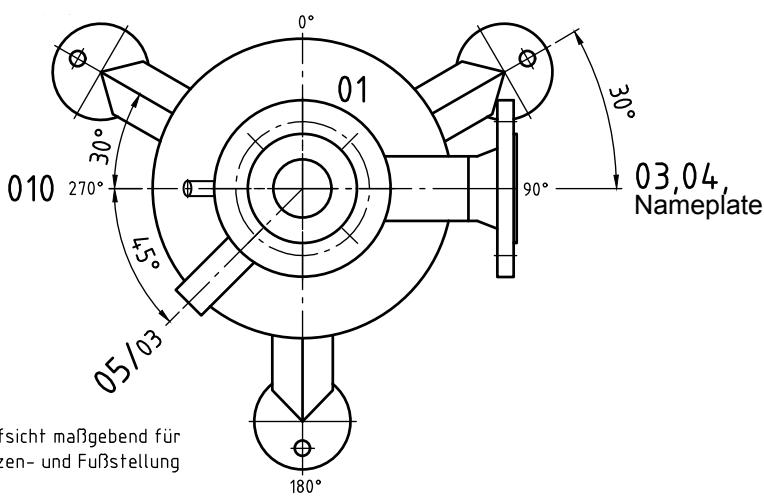

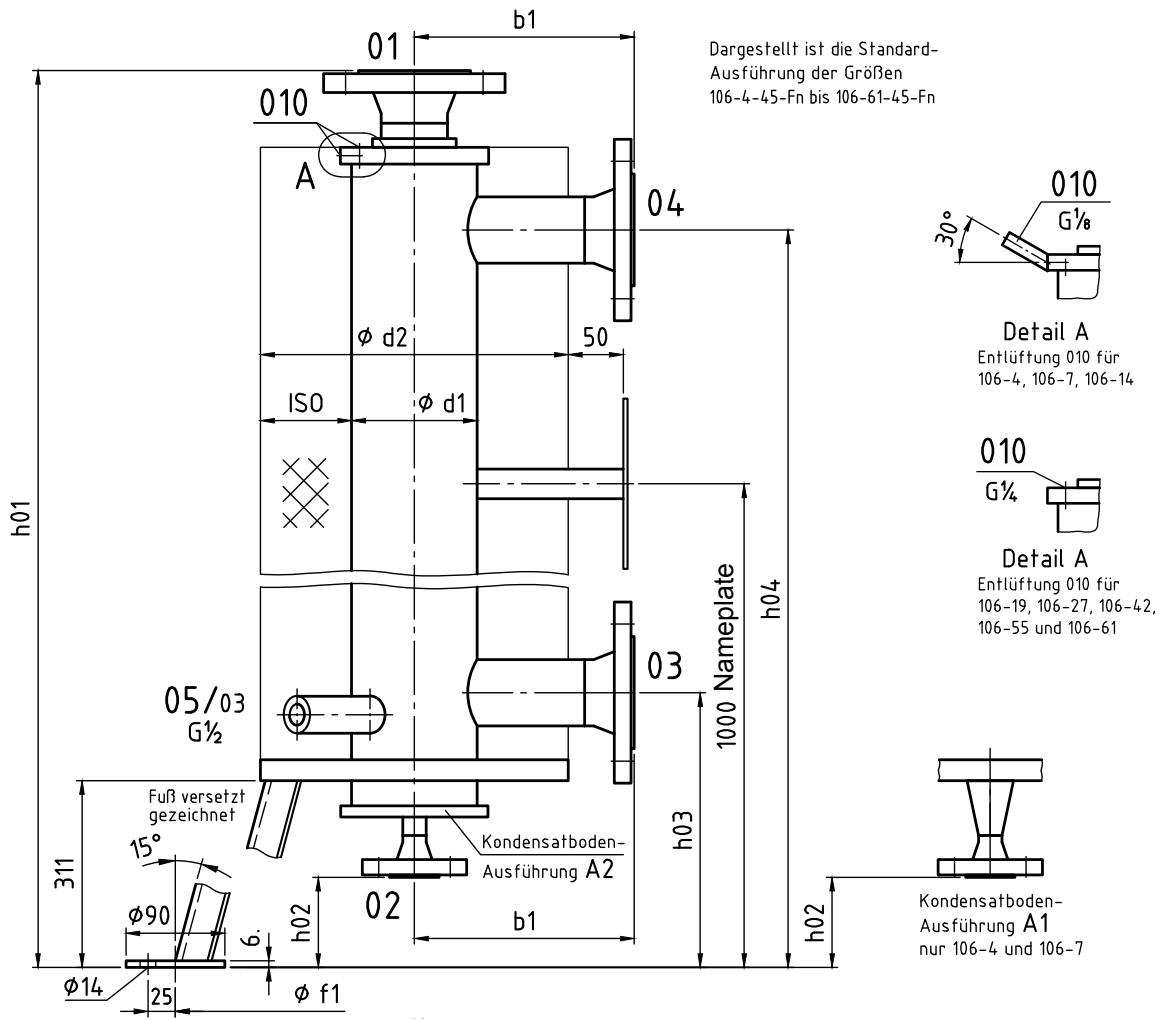

baelz 106: tube side steam / condensate; shell side fluid

- 01 = steam inlet  
 02 = condensate outlet  
 03 = return inlet  
 04 = flow outlet  
 05/03 = secondary emptying (G 1/2")  
 010 = secondary deaeration/venting (G 1/4")

### Note:

- In accordance with AD 2000 no load transfer may take place across flange and socket connections.
- On the inlet side, a straight pipeline must be provided as a calming section with a length of min. 6 x DN of the heat exchanger inlet nozzle. The nominal diameters of the pipe and heat exchanger inlet nozzles must match.
- Required hot water quality according to VDI 2035 (avoidance of damage in hot water heating systems according to DIN EN 12828)

## Dimensions baelz 106

For dimensions and connections of all standard models, see the following page.

**All dimensions are approximate and can change to suit project requirements!**

**Dimensions and specifications baelz 106 with tube length 4500 mm**

All dimensions are approximate and can change to suit project requirements!

All connections according to EN 1092-1 type 11, sealing surface form B1

\* DN 65, PN 16 in 4-hole design

Note: For systems and stations with heat exchangers, see Chapter 6.1  
 "Steam and condensate - Baelz-thermodynamic®" starting on page 178 of this catalogue.

## baelz 111 / 112

### STRAIGHT-TUBE HEAT EXCHANGERS

- standing version, thus suitable for capacity control with condensate backup
- tube bundle not exchangeable
- ring channel optional
- compensator optional
- baelz 112 suitable for drinking water

### FLUIDS

#### baelz 111:

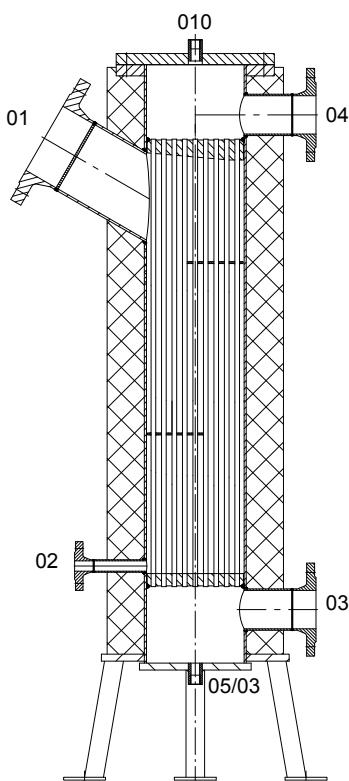

Tube side heating water, glycol, hot oil, neutral liquids, other fluids on request; shell side steam and condensate

#### baelz 112:

Tube side drinking water; shell side steam and condensate

To avoid corrosion in heat exchangers, water qualities must be checked and recorded at regular intervals.

Requirements for water qualities can be found in our Corrosion Specification, which we are happy to send you upon request.

### Technical specifications, baelz 111 / 112

	baelz 111	baelz 112
<b>Tubes</b>	Steel / copper / stainless steel	1.4571

baelz 118:

02/1 = high-temperature condensate to be cooled inlet

02/2 = cooled condensate inlet

012 = mixture of high-temperature condensate and cooled condensate outlet

## baelz 118

### CONDENSATE INJECTION COOLERS (DESUPERHEATERS)

- for cooling high pressure condensate without risk of evaporation
- exchangeable tube bundles optional
- stainless steel 1.4571 tube bundles
- many design options

### FLUIDS

Tube side: high pressure condensate

Shell side: cooled condensate stream

Continuous current flow: High pressure condensate through the tubes

To avoid corrosion in heat exchangers, water qualities must be checked and recorded at regular intervals.

Requirements for water qualities can be found in our Corrosion Specification, which we are happy to send you upon request.

### Technical specifications, baelz 118

<b>Tubes</b>	1.4571, welded and rolled, not exchangeable
<b>Shell</b>	Carbon steel
<b>Insulation</b>	Mineral wool with galvanized metal shell 80 mm
<b>Housing height</b>	max. 2200 mm
<b>Diameter</b>	min. Ø 89 mm, max. Ø 1000 mm

Design, production and testing according to Pressure Equipment Directive PED 2014/68/EU

Category / Module: I / A, II / A2, III / G or IV / G or Art. 4, para. 3 and AD 2000 Rules.

### Examples of max. temperature + max. pressure tube/shell sides

Nominal pressure	Max. temp (° C)	Max. pressure (bar g)
PN 16 / PN 16	250	11
PN 25 / PN 25	250	18
PN 40 / PN 40	250	28

### Examples of mixing coolers

Version	baelz 118-S-8...	baelz 118-S-50...
Content (liters)	8	50
Flanged connection	DN 15 / 25	
Cooling coil + internal parts		1.4571
Fluid	Steam and water	
Max. temp. / pressure	200°C / 11 bar	200°C / 10 bar
Process connections	Cooling water, draining, deaeration/venting	
Housing	Steel / stainless steel	
Weight (approx., kg)	15	100

#### Note:

- In accordance with AD 2000 no load transfer may take place across flange and socket connections.
- On the inlet side, a straight pipeline must be provided as a calming section with a length of min. 6 x DN of the heat exchanger inlet nozzle. The nominal diameters of the pipe and heat exchanger inlet nozzles must match.
- Required hot water quality according to VDI 2035 (avoidance of damage in hot water heating systems according to DIN EN 12828)

## baelz 120

### ONE-PIECE STEAM-HEATED SOURCE EVAPORATOR

- standing version
- with coiled tube bundle, optionally exchangeable
- suitable for condensate control with forced condensate cooling
- with feet
- version without glands

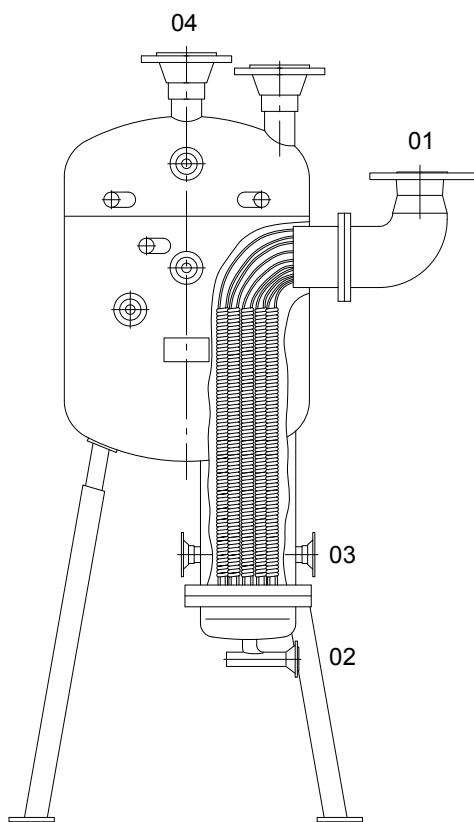

### FLUIDS

**Primary side:** Steam through the tubes

**Secondary side:** Live steam around the tubes

To avoid corrosion in heat exchangers, water qualities must be checked and recorded at regular intervals.

Requirements for water qualities can be found in our Corrosion Specification, which we are happy to send you upon request.

### Technical specifications, baelz 120

<b>Tubes</b>	Steel / copper / stainless steel
<b>Tube sheet</b>	Steel / stainless steel
<b>Preheader</b>	Steel / stainless steel
<b>Shell</b>	Steel / stainless steel
<b>Insulation</b>	Mineral wool with galvanized / stainless steel sheet metal shell
<b>Housing length</b>	Housing dimensions are designed to order
<b>Diameter</b>	Housing dimensions are designed to order

**Design, production and testing according to Pressure Equipment Directive PED 2014/68/EU**  
**Category / Module: I / A, II / A2, III / G or IV / G & AD 2000 Rules.**

baelz 120:

- 01 = steam inlet
- 02 = condensate outlet
- 03 = feedwater inlet
- 04 = live steam outlet

#### Note:

- In accordance with AD 2000 no load transfer may take place across flange and socket connections.
- On the inlet side, a straight pipeline must be provided as a calming section with a length of min. 6 x DN of the heat exchanger inlet nozzle. The nominal diameters of the pipe and heat exchanger inlet nozzles must match.
- Required hot water quality according to VDI 2035 (avoidance of damage in hot water heating systems according to DIN EN 12828)

## baelz 122

### U-TUBE EVAPORATOR, STEAM HEATED

- horizontal version
- exchangeable U-tube bundle
- with support device
- with supporting cradles

### FLUIDS

**Primary side:** Steam through the tubes

**Secondary side:** Live steam around the tubes

To avoid corrosion in heat exchangers, water qualities must be checked and recorded at regular intervals.

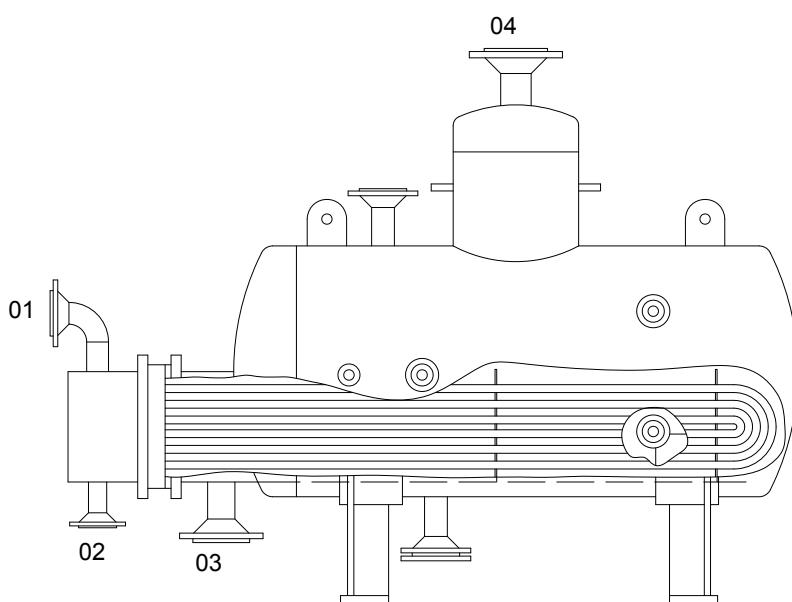

Requirements for water qualities can be found in our Corrosion Specification, which we are happy to send you upon request.

\* zweiter Pumpenananschluß ab Ausführung 800 Liter

## baelz 128

### CONDENSATE TANK

- angular design
- for unpressurized operation
- in steel or stainless steel
- with process connections
- without insulation

### PRODUCT DESCRIPTION

For the energy-efficient recycling of condensate as feed water or as a collection container for controlled water removal.

Including the required process connections for display and draining as well as for control and monitoring.

Ask Baelz about our pressurized condensate tank baelz 130 for a return feed low in oxygen and improved corrosion protection.

### Technical specifications, baelz 128

Version	128-E	128-E-VA
Material	S235JR - 1.0037	X6CrNiMoTi17-12-2 -1.4571*
Interior surface treatment	raw	pickled and passivated
Exterior surface treatment	primed on untreated surface	pickled and passivated
Sheet thickness (mm)	4	
max. temperature (°C)	100	
Hand hole with cover	Ø150 mm	
Opening for pump	Ø105 mm	

Design, production and testing according to Pressure Equipment Directive PED 2014/68/EU, Art. 4, paragraph 3.

### Supplements

additional hand hole with cover and seal

additional pump connection

additional sleeve G 1

additional sleeve G 1 1/2

\* for 2000 l. version, steel feet

### STAINLESS STEEL WATER TANK

- standing version on base ring
- including 100 mm insulation with polystyrene shell silver, RAL 9006
- insulation meets Euro fire class B2 and is removable
- special sizes possible
- production according to DIN 4753, Part 1
- can be retrofitted with electric heating insert via inspection opening

### FLUIDS

Industrial water tank baelz 134-TH: Water / water

Solar storage tank baelz 134-MU: Water / water

Warm water conditioner baelz 134-RU-D: Steam / water

Warm water conditioner baelz 134-RU-DK: Steam / water

### Technical specifications, baelz 134-TH / baelz 134-MU

Total material	X6CrNiMoTi17-12-2 -1.4571	
Coil	max. 25 bar / 110°C	
Tank	max. 10 bar / 95°C	
Tank surface	pickled and passivated inside and out	
Connection	threaded connection	
Inspection opening	O120 mm with O-ring seal	
Energy efficiency	up to 500 l. class B; from 580 l. class C	
Applications	District heating, waste heat recovery, boiler	
	<b>baelz 134-TH</b>	<b>baelz 134-MU</b>
Version	with fixed stainless steel tube coil	with 2 fixed stainless steel tube coils
Capacity	min. 150 l, max. 1000 l	min. 300 l, max. 1000 l

 02 = heating fluid outlet  
 03 = secondary return  
 04 = secondary flow

#### Note:

- In accordance with AD 2000 no load transfer may take place across flange and socket connections.
- On the inlet side, a straight pipeline must be provided as a calming section with a length of min. 6 x DN of the heat exchanger inlet nozzle. The nominal diameters of the pipe and heat exchanger inlet nozzles must match.
- Required hot water quality according to VDI 2035 (avoidance of damage in hot water heating systems according to DIN EN 12828)

## baelz 140

### PLATE HEAT EXCHANGERS

- in soldered or bolted version
- compact design
- innovative plate technology
- wide range of capacities
- suitable for drinking water

### VERSIONS

#### baelz 140-10:

soldered version  
plates: 1.4403 / 1.4404  
solder: copper / nickel

#### baelz 140-20:

bolted version  
plates: stainless steel / titanium  
seal: NBR / EPDM / Viton

#### Note:

- In accordance with AD 2000 no load transfer may take place across flange and socket connections.
- Required hot water quality according to VDI 2035 (avoidance of damage in hot water heating systems according to DIN EN 12828)

## baelz 147

### MODULE HEAT EXCHANGERS

- for modular transfer stations
- for hot water heating, sanitary water heating, cooling, production facilities, drinking water
- self-cleaning effect inhibits deposits
- made entirely of copper

### FLUIDS

Tube side 01/02: steam / water

Shell side 03/04: water

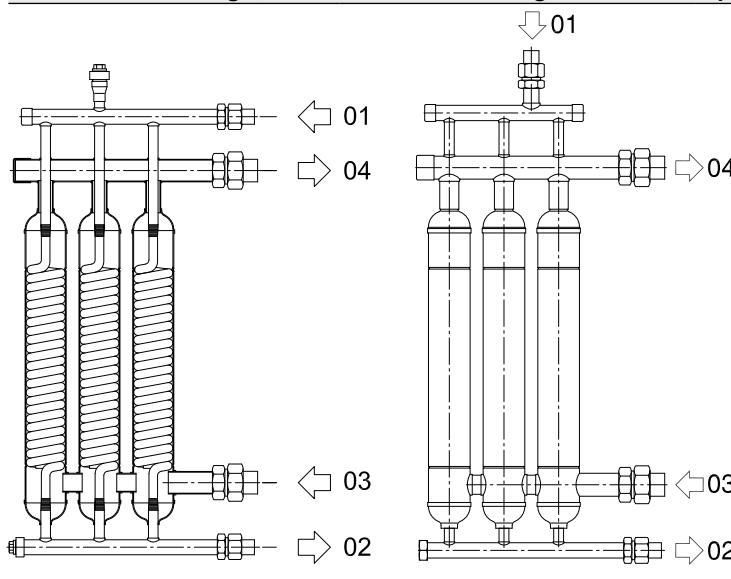

baelz 147 and baelz 147-HT are suitable for drinking water

### Technical specifications, baelz 147

<b>Material</b>	Copper		
<b>Insulation</b>	optional, two-part insulation, weight approx. 2 kg (supplement)		
<b>Connections tube side</b>	for pipe Ø28, size DN 25		
<b>Connections shell side</b>	for pipe Ø42, size DN 40a		
<b>Dimensions, approx.</b>	Height approx. 900 mm, width approx. 450 mm

### Heat from steam, water or thermal oil

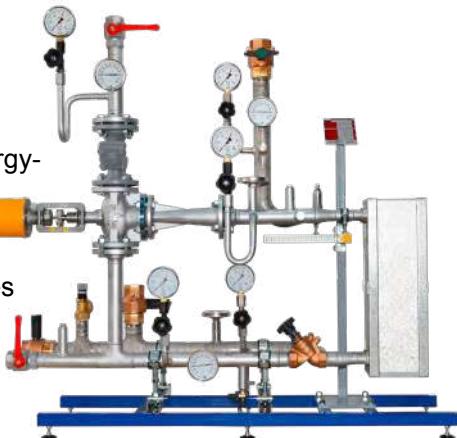

Want to save energy? Baelz offers solutions worldwide. With systems of all kinds and everything from a single source: consulting, design and engineering using our own proven components according to industrial standards and always in line with customer requirements.

An example showing how effective Baelz technology is: More than 4,000 steam heat transfer stations in the district heating network of Paris supply numerous buildings – from apartment buildings to ministries – with heat using the Baelz-thermodynamic® process, and have been doing so since the 1970s! In Germany too, numerous cities such as Dortmund, Frankfurt and Munich have steam district heating networks in which Baelz stations operate while saving energy.

Baelz offers a variety of processes and systems using water as a heat transfer medium in district heating, local heating and building heating networks. These include direct and indirect connection stations and heat transfer stations, as well as stations for drinking water heating. From apartment stations to heat transfer stations for hot water networks with 180°C and 32 bar, Baelz offers energy-efficient and holistic solutions.

Energy-efficient operation is the most important prerequisite of any system. The use of the proven Jetomat® ejectors based on the Baelz-hydrodynamic® process is the key to achieving this. The controlled ejector saves on energy and material, whether during distribution of heating water using only one main centrifugal pump or in the patented combination with plate heat exchangers.

Thermal oil serves as a good alternative to steam or hot water operated systems. As a heat transfer medium, oil is especially well suited to indirect heating of larger industrial applications.

### Generating cooling and heat with water

Absorption chillers are an environmentally friendly, energy-efficient and flexible technology for generating cooling or, if required, heat. Baelz offers three standard versions, all using the Baelz-absorpdynamic® process: Bee, Bumblebee and Hornet, named for their color and different sizes with outputs of 50, 160 and 500 kW respectively. These systems do not only stand out due to their compact and modern design, but above all thanks to their extremely low consumption of electrical energy, as they use heat to produce cooling.

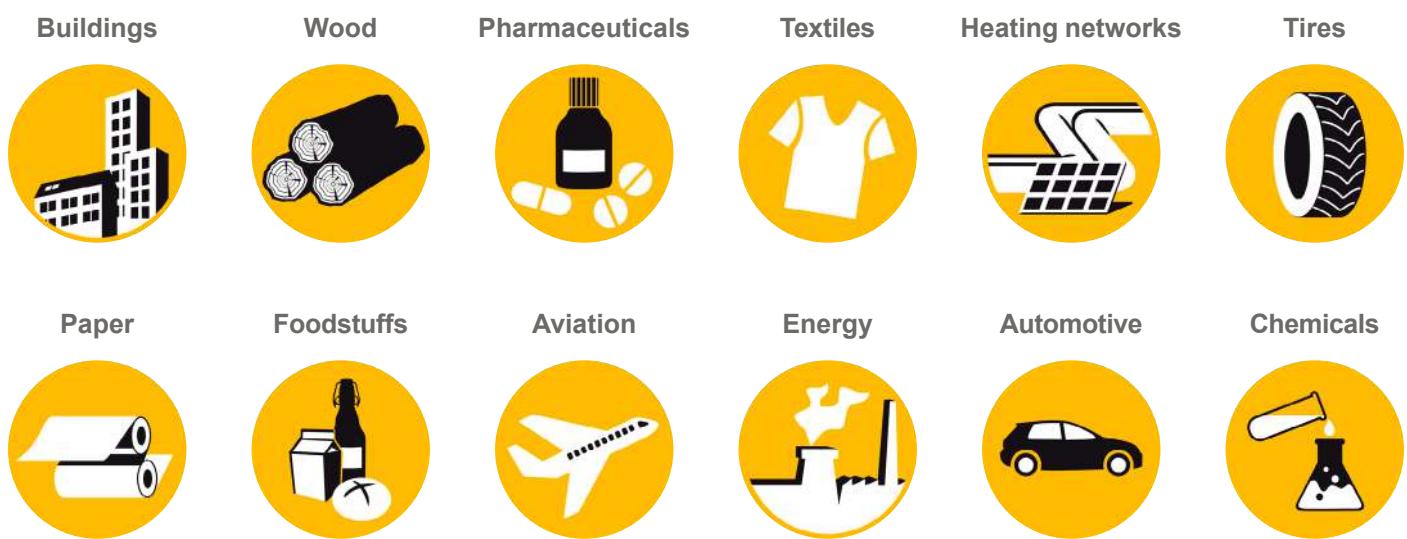

## Steam and condensate – proven technology with a future

### Baelz-thermodynamic®

Optimal solutions are based on extensive consulting. Benefit from our years of experience and extensive knowledge of the applications in which our products are used. We will assist you in selecting the most suitable heat exchanger and fittings for the respective application. We are happy to support you in the design of individual components as well as of heat transfer stations or entire plants. The initial contact often arises from a desire to find ways to optimize processes. Disproportionately rising energy costs combined with an awareness for climate protection call for the use of our economical steam technology to optimize the energy efficiency of your plants.

## Here are some of the fields of application of international Baelz customers

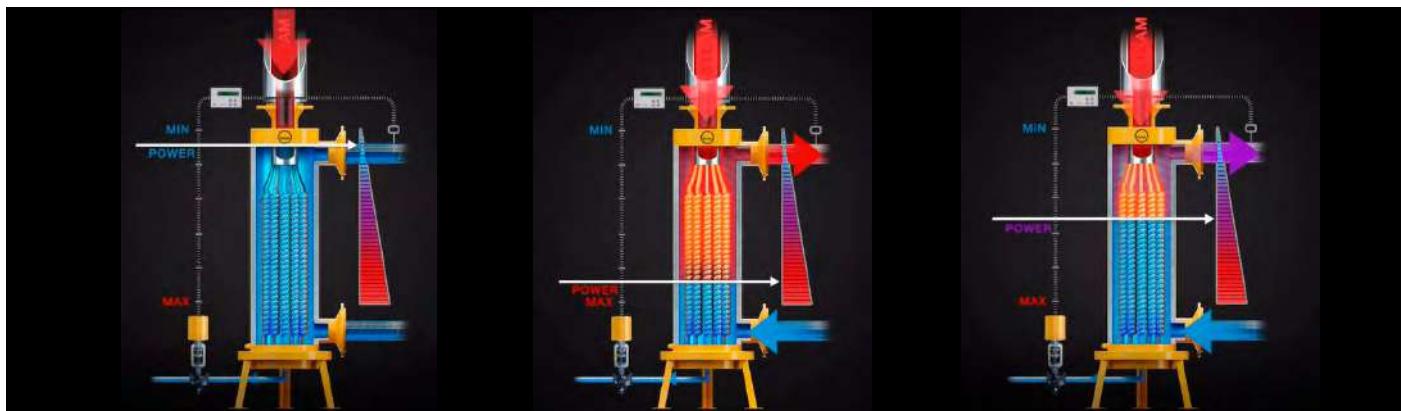

## Progressive, reliable and economical for over 100 years

Our closed steam-condensate circuit guarantees energy efficiency, minimizes steam loss, offers high corrosion resistance and long reliable operation. Thanks to more than 100 years of experience and expertise gained since 1896, Baelz is the ideal partner for the highest demands in steam and condensate technology. Creating perfect and yet impressively simple solutions to problems in the field of process steam control and condensate technology remains at the heart of the company's objectives. Our goal is clear: To build absolutely reliable and efficient steam plants to guarantee customer satisfaction for many years to come. We develop practical solutions to optimize your steam system.

## Energy-saving steam and condensate technology

The Baelz steam and condensate technology allows you to achieve energy savings of 5-25% for steam networks from 0.1 to 100 bar, even with superheated steam.

### Examples of steam and condensate applications with Baelz:

- Replacement of horizontal shell-and-tube heat exchangers by vertical ones with condensate-side control and condensate re-cooling as single unit or compact station.
- Combination of your flash tanks and reuse of the resulting waste steam by means of a controlled steam ejector.
- Replacement of control valves by control steam ejectors for recirculation and recompression so as to achieve a performance increase of up to 15% in the heat consumer.
- Steam cooler for superheated steam to generate saturated steam while simultaneously reducing the pressure.
- Steam/water mixer for direct injection of steam into the water.
- Implementation of the closed steam and condensate cycle for a single system or an entire plant.
- Steam generators, also as clean steam generators or as a compact plant.

Whether you are planning to build a new steam plant or expand and improve your existing system, we can help you achieve your corporate objectives. Use Baelz experience to your advantage! Whether your goal is improved safety at work, energy savings, improved productivity, lower operating costs or reduced carbon dioxide generation, ask Baelz for a comprehensive professional consultation with no obligation.

Steam transfer station; Palais Bourbon, Paris

## Baelz - Your first choice for steam and condensate technology

This product catalogue gives you an overview of the wide range of Baelz products. Since our system solutions are usually designed according to individual requirements, many other components are also available for the optimization of your system - no matter whether you are planning a new installation or a retrofit project. From small ejectors to custom-engineered compact stations, from long-term availability of spare parts to systems which run reliably for decades - we want to save money and energy both with and for our customers.

## Baelz services

- Is my steam plant technology up-to-date?
- Does it comply with the current standards and norms?
- Where is there potential for optimization and savings?

Baelz offers individual audits to make your plant fit for the future.

For further information on services and training, as well as for inquiry forms and contact details:

Steam Terminal® up to 2000 kW  
with a baelz 106 spiral tube heat exchanger  
(above photo, below typical system layout)

## Steam Terminal®

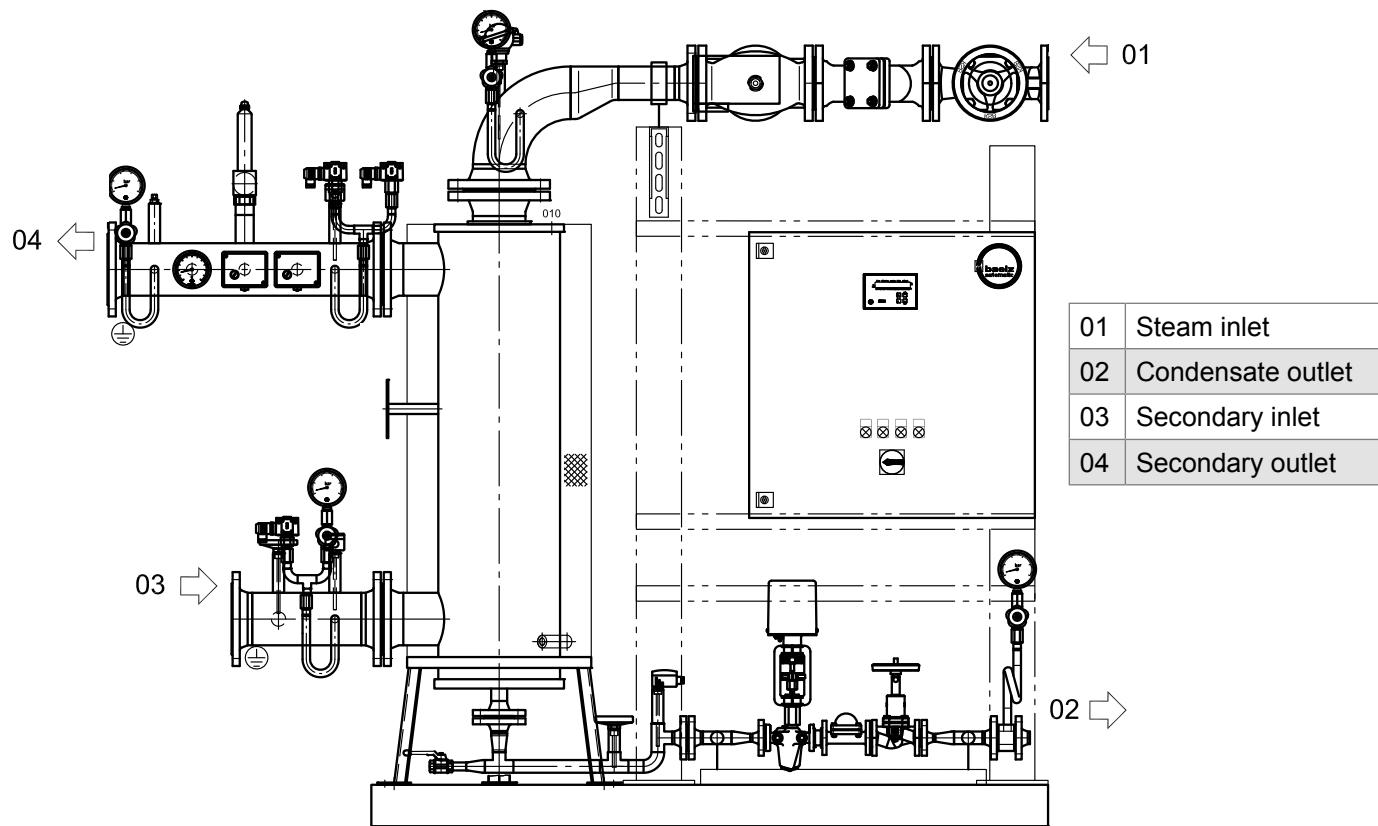

### STEAM HEAT TRANSFER COMPACT STATIONS

Our ready-to-install, fully piped, wired and tested steam heat transfer stations, designed on the basis of our vertical condensate-side controlled heat exchangers, guarantee optimum control quality, a high energy transfer rate and a long service life.

Simple solutions for complex, customer-specific tasks; with over 100 years of Baelz steam experience.

### ADVANTAGES AT A GLANCE

- Enthalpy flow equilibrium in steam, hot water, thermal oil and warm water for building and process heat.
- Fully automatic heat transfer stations with patented Baelz technology: Baelz-thermodynamic®, Baelz-vapordynamic®, Baelz-hydrodynamic®, Baelz-electrodyn®.
- Fully pre-assembled as a steam terminal, hot water terminal or thermal oil terminal.
- Can be transported with a pallet truck. No packaging required for storage and transport.

Closed steam heat transfer stations installed for an international stainless steel manufacturer

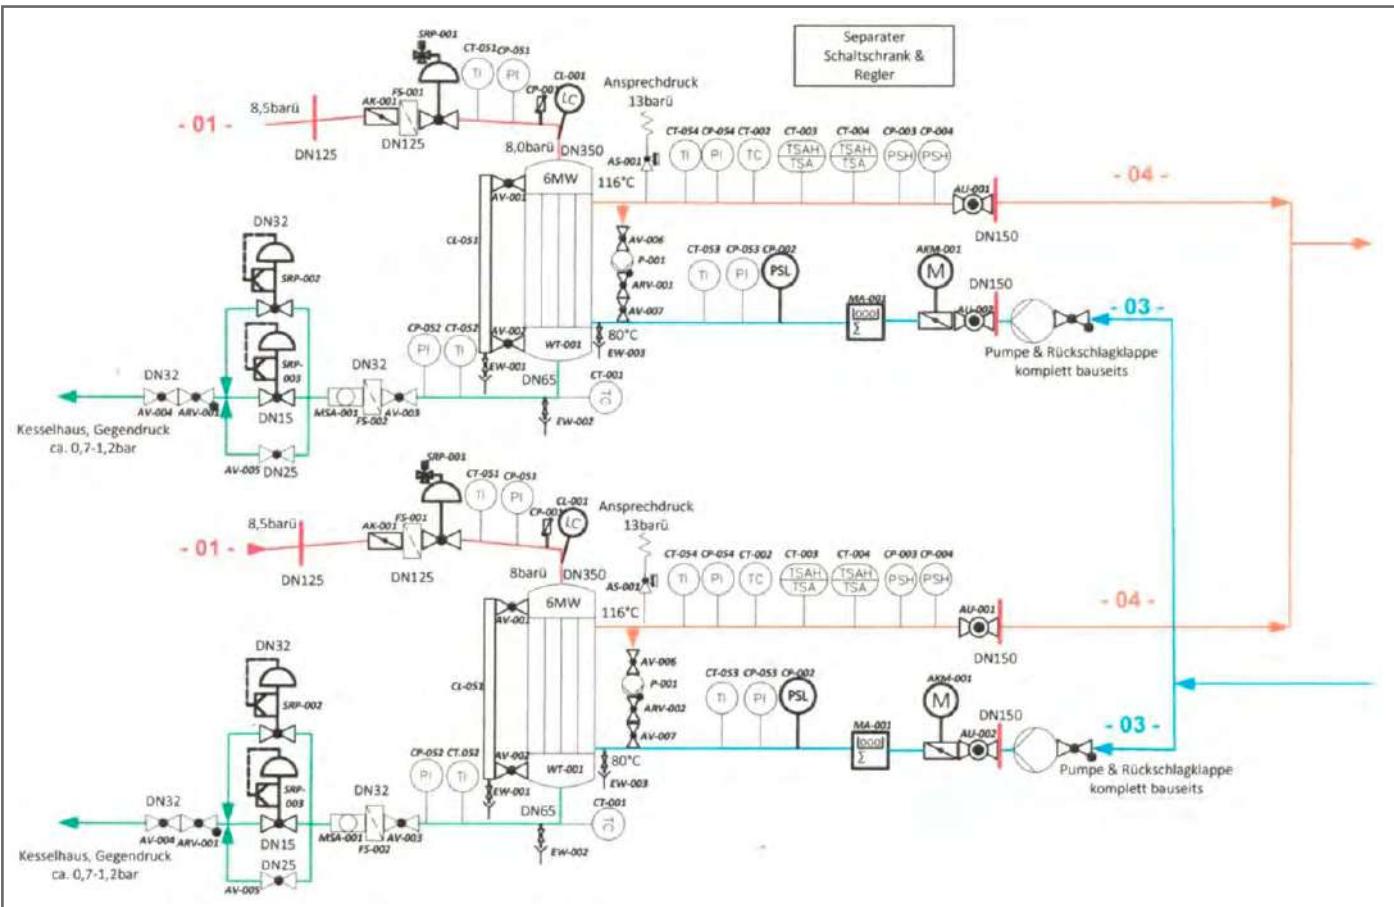

## Individual heat transfer station

### CUSTOMIZED STEAM HEAT TRANSFER STATIONS

Baelz also engineers larger steam heat transfer stations according to individual requirements and installs them on site. The closed steam condensate system prevents excess steam from being wasted. Its energy is preserved and is available for further use after conversion into hot water. The system runs quietly, saves energy and minimises wear on materials. Wear and corrosion due to atmospheric oxygen in condensate lines are a thing of the past. Energy and therefore financial savings ensure that an investment in a closed steam condensate system is amortized within a very short time.

### ADVANTAGES AT A GLANCE

- Energy saving through use of excess steam
- Low noise and wear: no steam hammer
- Durable: corrosion and wear are minimized
- You benefit from Baelz' long experience in the design and control of complex systems
- Quick amortization through saving of expensive steam energy

Example of a hydraulic plan of a closed steam condensate system

## Steam Terminal® Modulo

Steam Terminal® Modulo with reserve connection for another baelz 147 heat exchanger

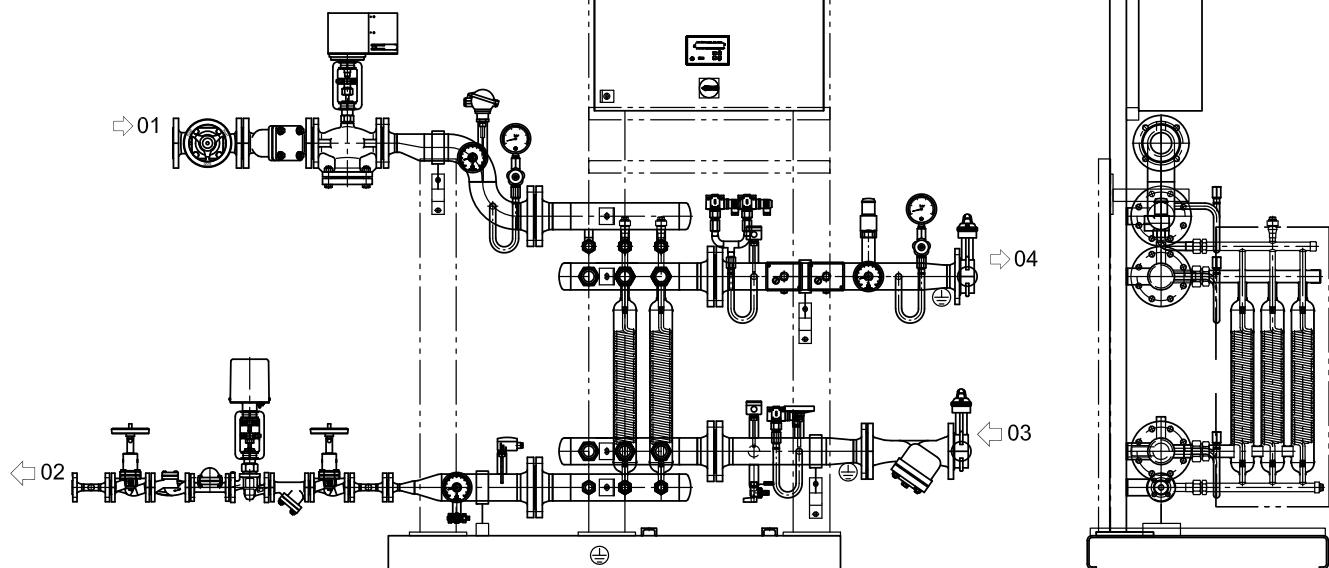

### MODULAR STEAM HEAT TRANSFER COMPACT STATIONS

Our ready-to-install, fully piped, wired and tested steam/water compact stations, designed on the basis of our modular heat exchangers, guarantee optimum control quality, a high energy transfer rate and a long service life. The Modulo heat exchangers, baelz 147 and baelz 150, each consist of only one material - copper or stainless steel - and can therefore be completely and easily recycled and replaced.

### ADVANTAGES AT A GLANCE

- Fully automatic heat transfer station.
- Exchangeable standard modules for economical installation and running.
- Improved safety in the heat supply.
- Entirely recyclable.
- Fully pre-assembled as a steam terminal, hot water terminal or thermal oil terminal.
- Can be transported with a pallet truck. No packaging required for storage and transport.

## 6.1.4 Clean steam generator compact stations

Clean steam generator compact station with baelz 120 in upright configuration with condensate-side control (above photo, below typical schematic diagram)

**Design, manufacture and testing of the evaporators according to the Pressure Equipment Directive PED 2014/68/EU, category/module: I/A, II/2, III/G or IV/G & AD 2000 regulation.**

Baelz offers a wide range of steam generation systems: Horizontal with steam side control and upright with condensate side control. The upright designs in one or two parts have the advantage of taking up considerably less floor space. In addition, the upright design makes for significantly lower condensate backup times and higher condensate cooling. Automatic functions for level, pressure, conductivity and blowdown are always integrated and fully wired and tested.

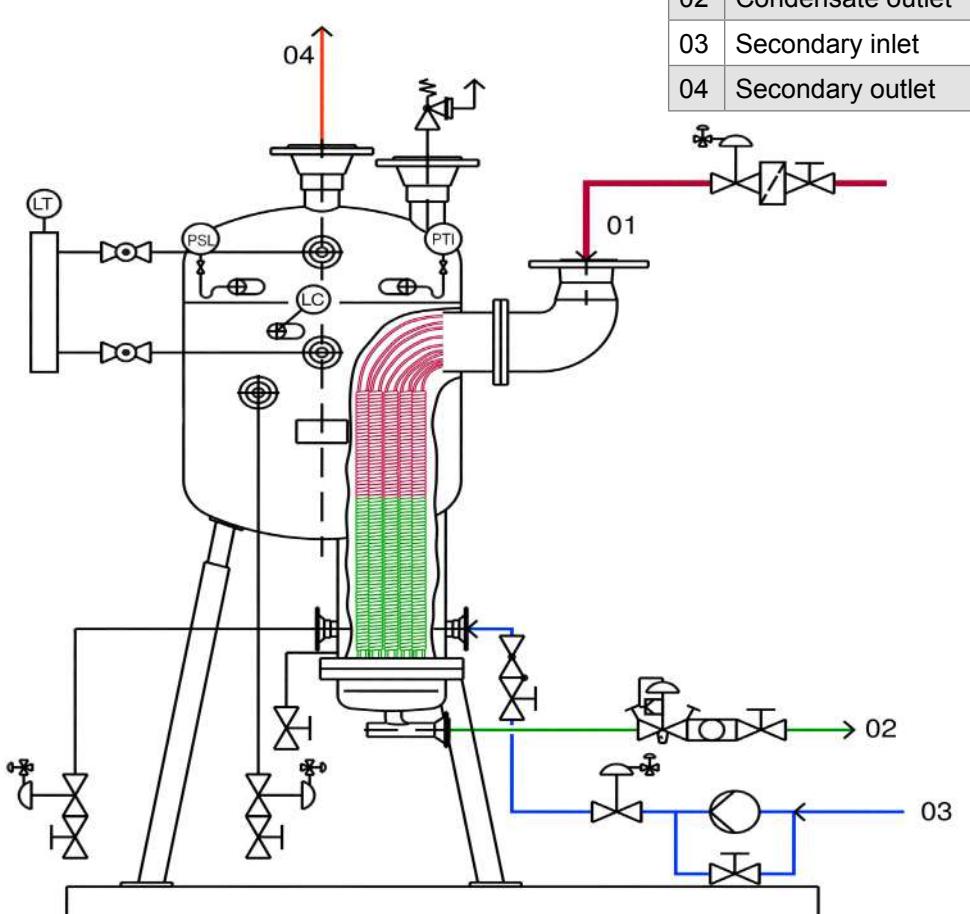

## Steam Terminal® steam generation

### CLEAN STEAM GENERATOR COMPACT STATIONS

The clean steam generator is fed with primary steam from an external source. It produces clean steam from demineralized water. Cross-contamination cannot occur because the primary circuit is fed by the steam boiler and the secondary circuit by the clean steam generator. The stations can be used for all sterilization systems in industry, sterilization processes with autoclaves in the medical sector, in the food and dairy industry as well as for air humidification.

### ADVANTAGES AT A GLANCE

- Fully pre-assembled and skid-mounted for easy assembly and transport.
- Thermally insulated on request.
- Made of passivated stainless steel 1.4571 for corrosion protection and durability
- Live steam capacities and pressures can be selected as required
- Station is supplied complete with control cabinet and is equipped with automatic level control, pressure control, conductivity control, automatic blowdown.
- Also available as individual components for assembly on site.
- Available in upright configuration with condensate side control or in horizontal configuration with steam side control.

## CLEAN STEAM GENERATOR COMPACT STATIONS IN HORIZONTAL CONFIGURATION

- In horizontal configuration with steam side control
- Model with dome for favorable flow conditions
- With condensate tank baelz 128
- Better energy utilization with re-cooling and feed water preheating

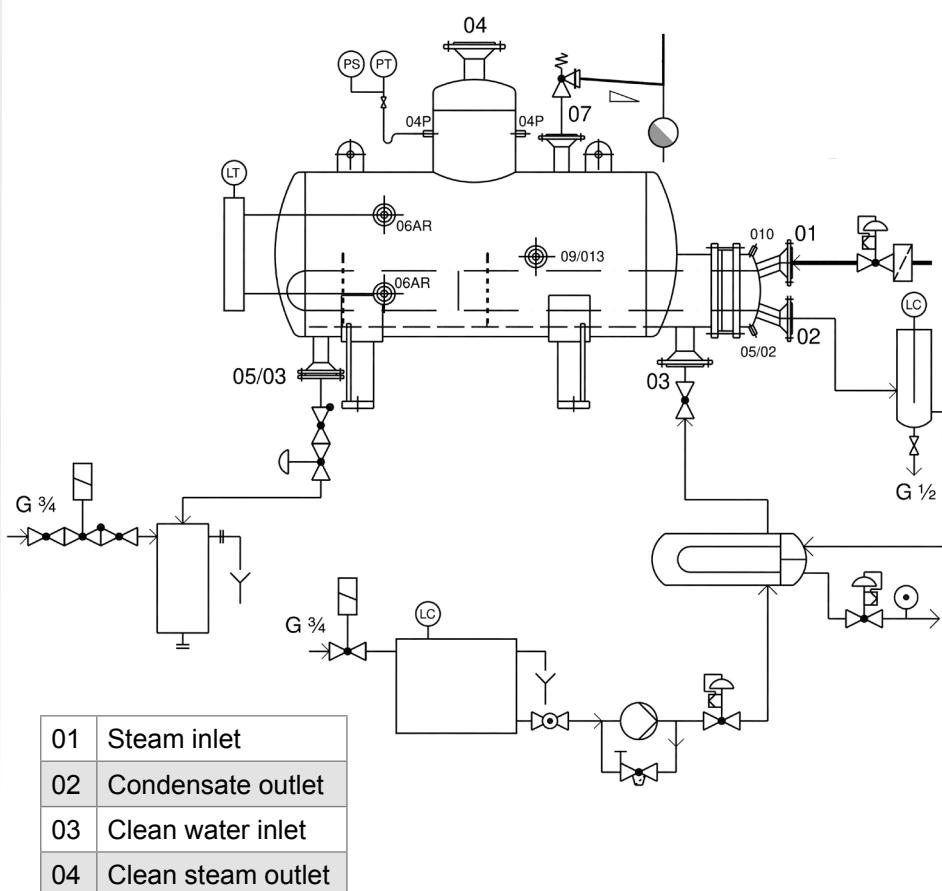

Clean steam generator compact station with baelz 122 in horizontal configuration with steam side control (above photo, below schematic representation)

Baelz has been supplying clean steam generators for decades. They are designed with our own tried and tested components, ranging from control valves to the heat exchanger, the heart of every system. That is what makes Baelz clean steam generators unique!

Independent boiler plants or district heating distributors deliver superheated steam which does not meet the demands of hygienic standards regarding the sterilization of medical equipment or the air humidity control of air conditioning systems for example.

Primary steam is used as a heating medium to produce clean steam. Appropriately treated feed water is led to the steam generator and heated until clean steam is available at the required pressure and the necessary degree of purity, in order to be reused. High-quality materials on the clean steam side, including the sealing materials, assure a high degree of purity. Systems for other primary fluids such as hot water or hot oil are also available.

The process measuring and control technology monitors feed water quality, controls steam pressure and ensures continuous mud blowdown in the installation. Depending on surroundings, available space and connecting conditions, Baelz supplies customers with the optimum solution in the form of a fully mounted Steam Terminal® with all the necessary components, with a horizontal or upright steam generator – everything from a single source.

[Inquiry form](#)

## Condensate Terminal®

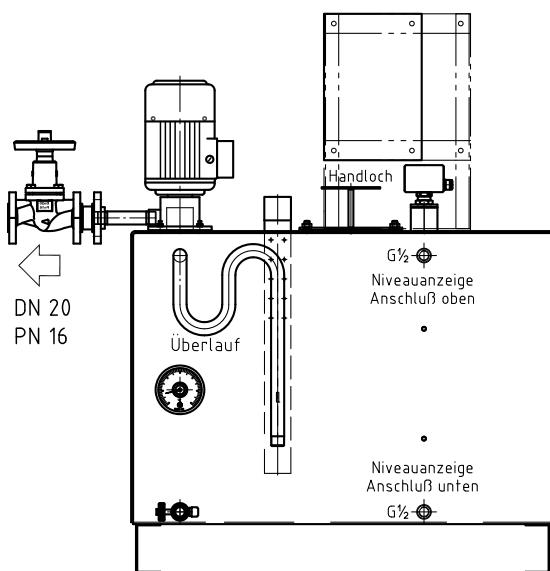

### COLLECTING AND USING CONDENSATE

Depending on the process, condensate is relatively pure and thus represents an excellent source of feed water. Another major advantage of using condensate is the heat content of the condensate. Much less energy is required to convert water supplied at, say, 90 °C back into process steam than for feed water with a water pipe temperature of 20 °C.

### ADVANTAGES AT A GLANCE

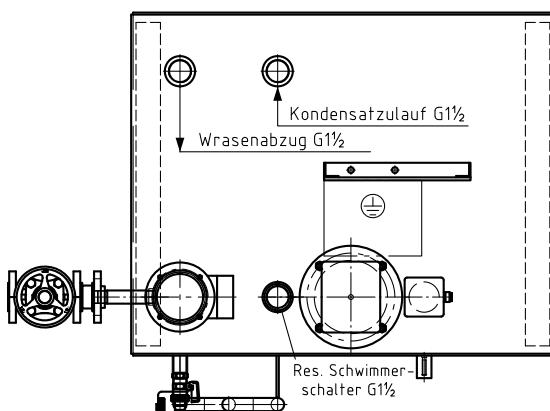

- Energy saving through use of condensate
- Available in standard capacities from 100 to 2000 liters
- With automatic overflow and dry-running protection
- With temperature and level indicator (depending on model)
- Depending on system requirements, components are pre-assembled on the condensate tank or on a skid for easy assembly and transport

Condensate Terminal® with baelz 128 condensate tank  
Photo shows example with optional accessories.

#### Options / Extra charges

Float switch baelz 783
Level indicator baelz 70730, 70749
Drain valve baelz 70586
Thermometer baelz 71150 or 71141
Check valve baelz 70082
Isolating valve baelz 70027R
Additional pump baelz 740...
Additional condensate inlets
Temperature sensor (special design)
Inlet with solenoid valve (special design)

Example of a condensate terminal with baelz 128 condensate tank

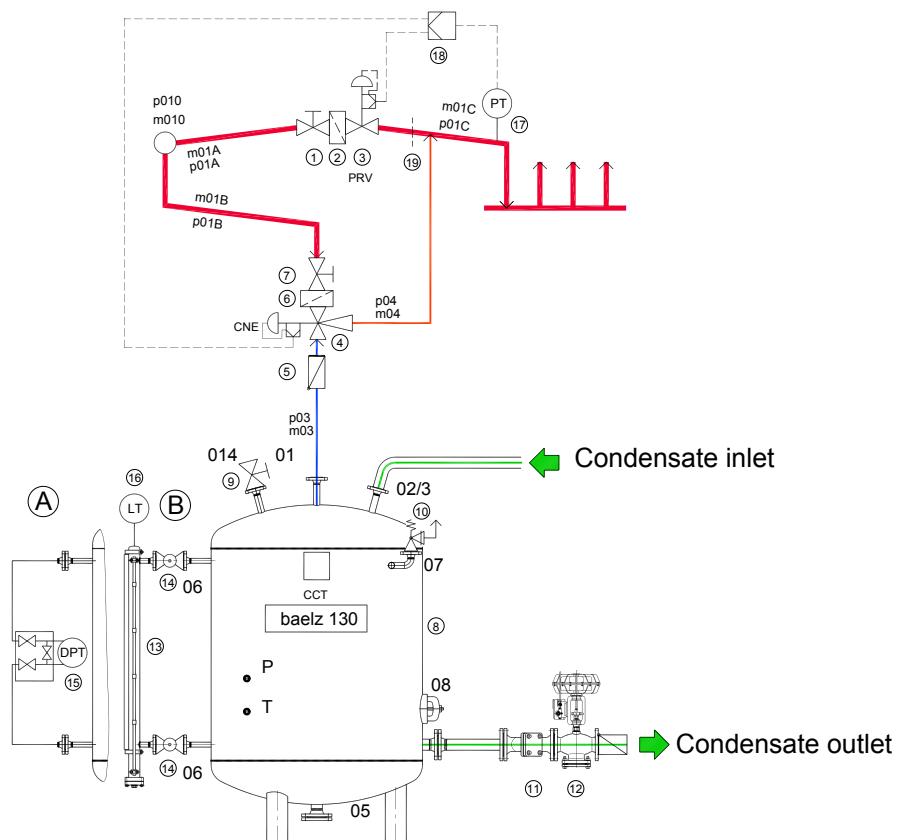

For systems without a baelz 740 submersible pump, the maximum allowable temperature in the tank is 100 °C instead of 90 °C.  
(Always observe the nameplate!)

Condensate Terminal® with steam pressurized condensate vessel baelz 130 in horizontal configuration

## STEAM PRESSURIZED COLLECTING STATIONS - CONDENSATE TERMINAL® WITH BAELZ 130

- With steam pressurized condensate vessel baelz 130 in upright or horizontal configuration
- Exclusion of air by steam pressure
- Low-oxygen condensate recovery for improved corrosion protection
- Level-dependent controlled condensate return
- Condensate temperature monitoring
- With pressure increase to overcome condensate back pressure
- Backflow prevention by means of an overflow valve in the event of large fluctuations in condensate back pressure (a check valve is sufficient if the condensate back pressure remains constant)
- Safety valve for overpressure protection
- Automatic venting valve for start-up operation

Steam/condensate compact station with steam pressurized condensate vessel baelz 130 in upright configuration and top-mounted controlled steam ejector baelz 590 for exhaust vapor compression

# Connection to a condensate system

Condensate with different temperatures and pressures must be brought together in a steam plant. Baelz creates customized solutions tailored to the design of the plant at hand.

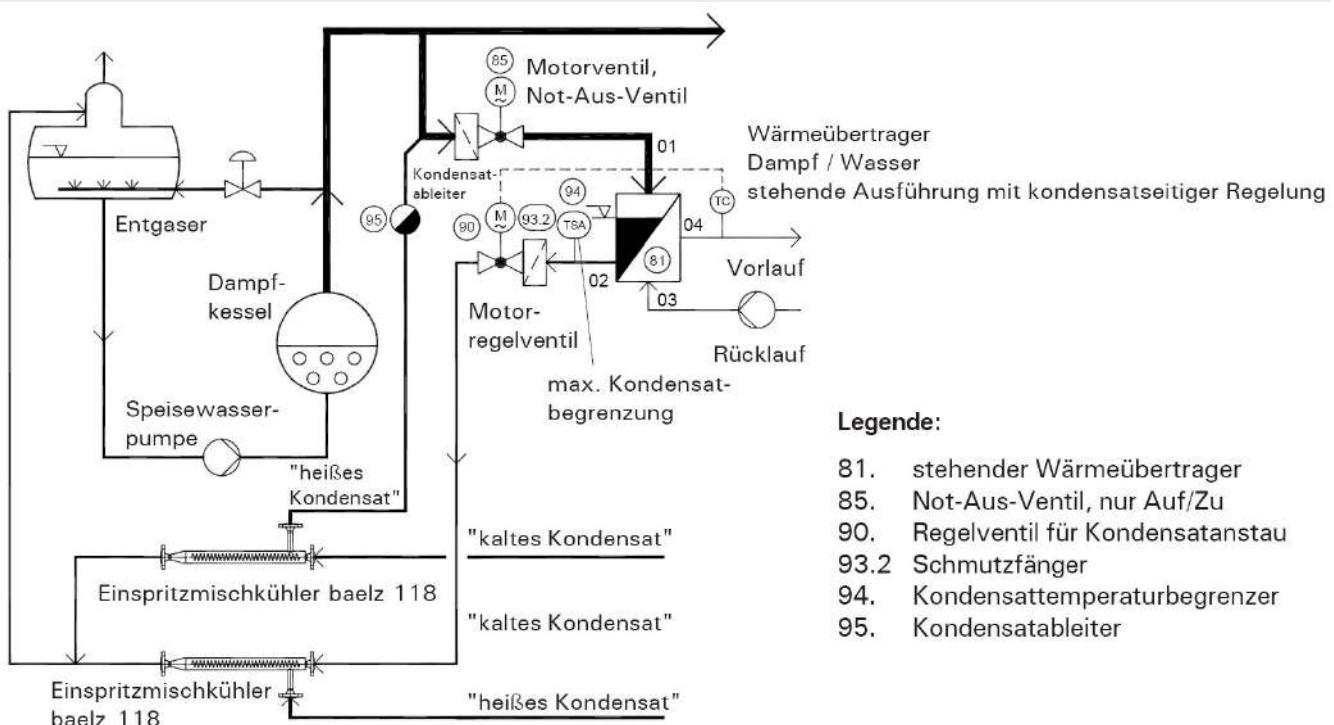

## EXAMPLES

Two basic ways of mixing hot and cold condensate without water hammer are shown below.

Both systems operate with steam and condensate backup with a steam/water heat exchanger controlled on the condensate side.

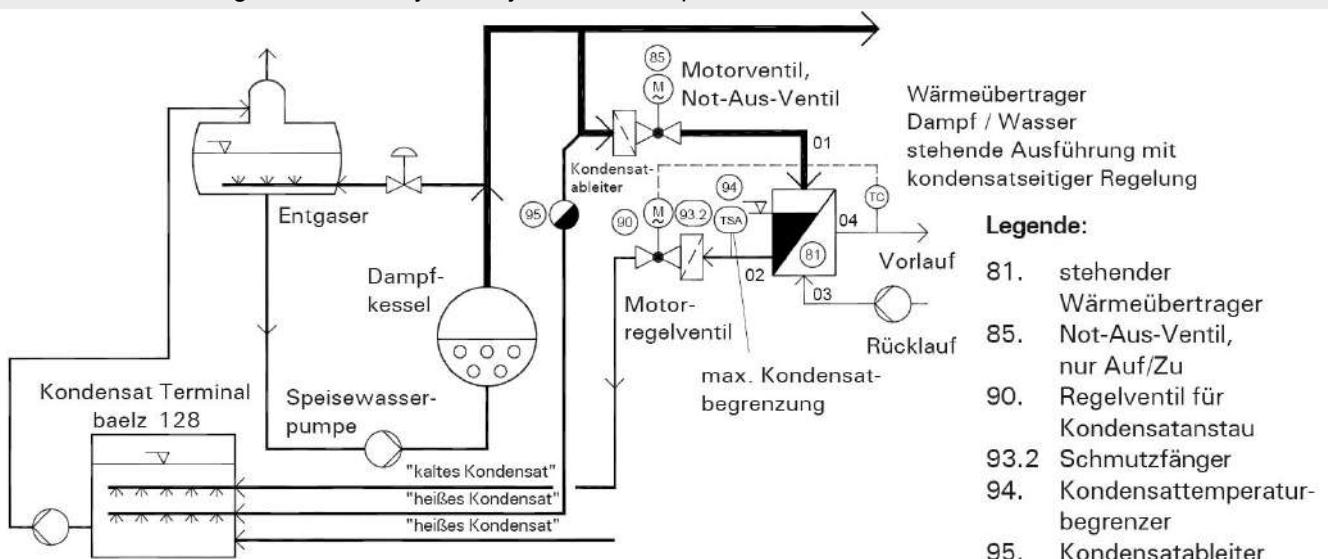

### EXAMPLE 1

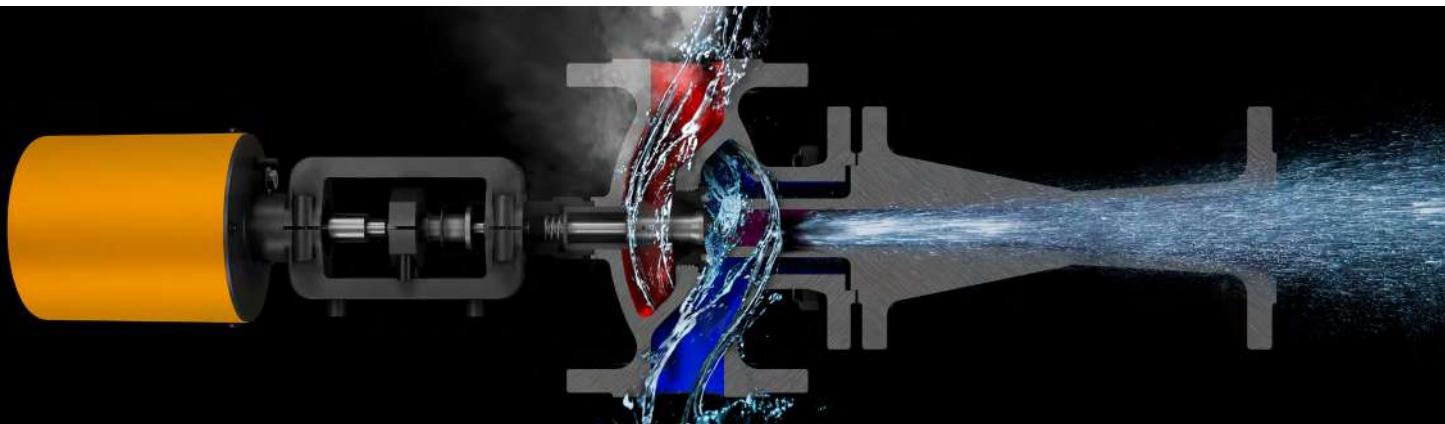

Connection to an existing condensate system by means of an injection cooler baelz 118

### EXAMPLE 2

Connection to an existing condensate system by means of a special condensate terminal

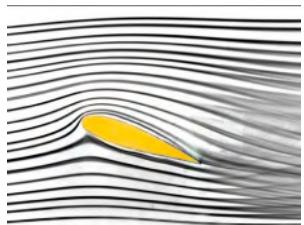

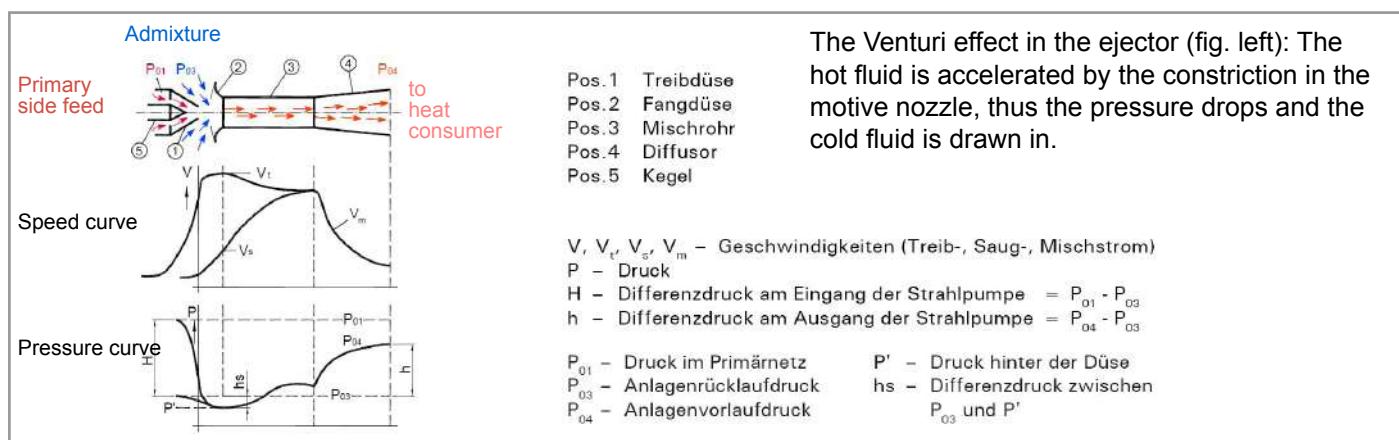

### Physical principles of ejectors

Based on the Bernoulli equation, we can deduce that if a fluid flows faster, the pressure in that fluid decreases and vice versa. This phenomenon is called the "Bernoulli Effect", of which perhaps the best known application is the function of an airplane wing: the air which is directed over the upper, more rounded surface has a longer distance to travel and therefore flows faster, creating a lower pressure over the upper surface of the wing than over the lower surface. The difference in pressure between the upper and lower surfaces of the wing creates lift and the aircraft takes off.

Daniel Bernoulli's (1700-1782) work was continued by Giovanni Battista Venturi (1746-1822). Venturi showed that a fluid flowing through a tube accelerates when the tube becomes narrower and vice versa - now known as the "Venturi effect".

Flow pattern around an aerofoil

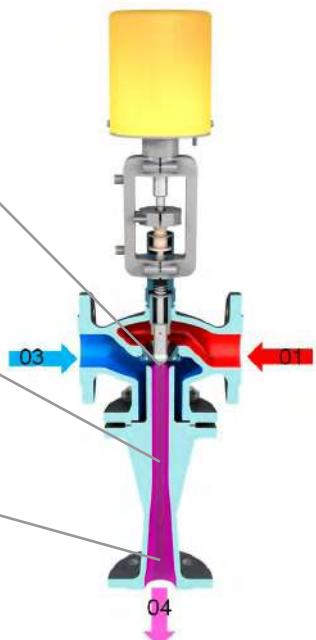

Venturi nozzle

### Functional principle of ejectors

The acceleration of the hot fluid in the Venturi nozzle (fig. left) creates a pressure drop at the nozzle outlet, resulting in a suction effect at the 3rd way of the ejector

The hot fluid 01 and the cold fluid 03 are brought together and mix in the cylindrical part of the diffusor.

The speed of the mixture is reduced in the conical part of the diffusor. This increases the pressure according to the pressure drop of the control loop in question (04).

Steam ejector systems can be delivered pre-assembled on a skid (picture above) or as a Baelz system which is installed at the customer's site.

## Steam ejector baelz 590

### METHOD 1: RECIRCULATION

This technology is used to improve the performance and thus the productivity of machines. Performance increases of 15 % on average are possible, combined with steam savings of up to 5 %. In this type of system, the controlled steam ejector is used for external recirculation with only motive steam as an energy source.

### METHOD 2: COMPRESSION

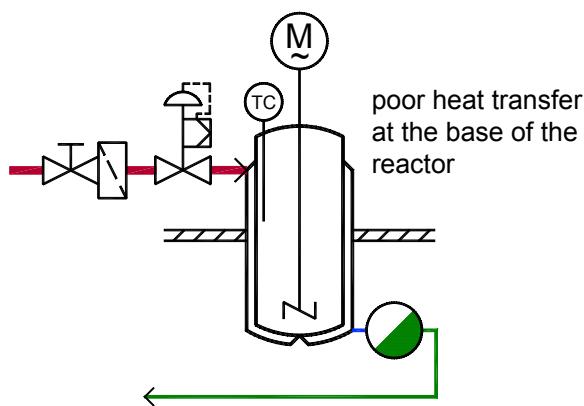

This technology is used purely to save energy. Direct steam savings of 10 to over 30% can be achieved. In this type of system, the controlled steam ejector is used for compression with two energy sources: motive steam and suction steam

### ADVANTAGES AT A GLANCE

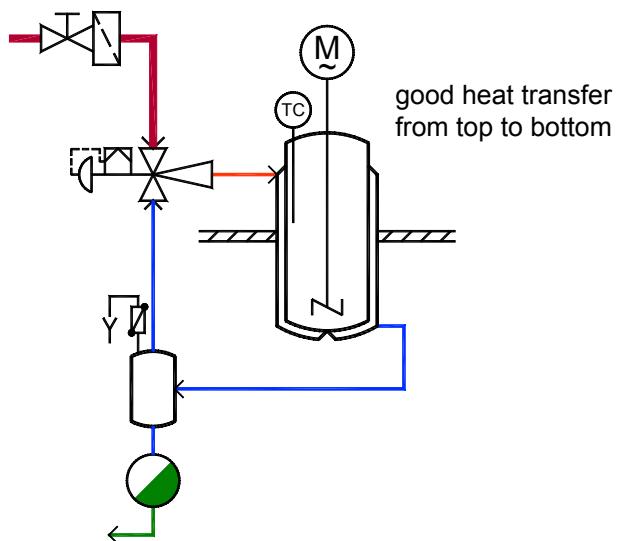

- Reduction of steam loss
- Increase in machine performance
- Increase in the effective heating surface to 100%
- Applicable to all types of steam systems
- Systems enable full use of available energy
- Applicable for use with various gases

### METHOD 1

Recirculation: comparison of conventional solution and ejector solution

**Conventional control**  
on a double jacketed reactor with  
steam side valve

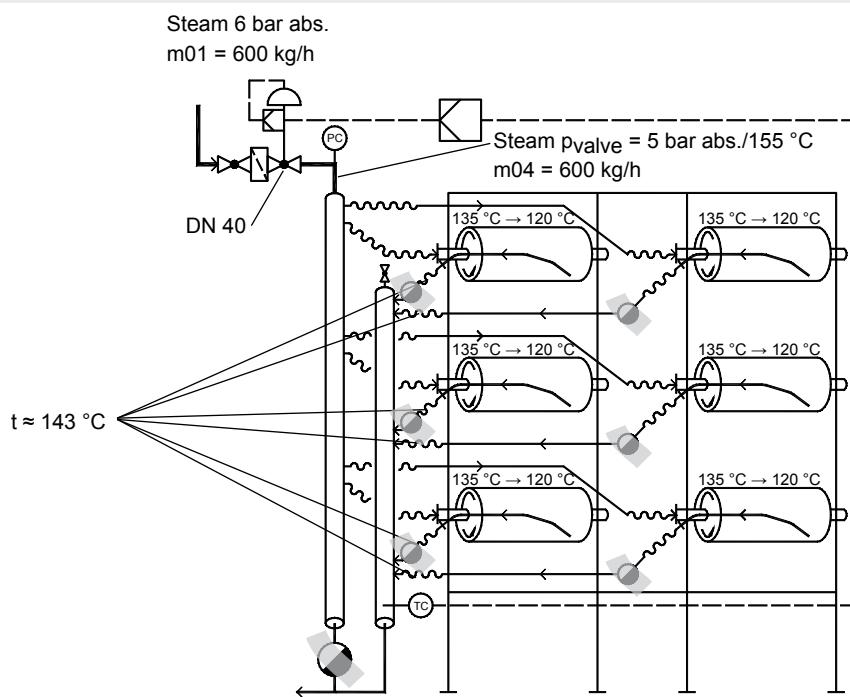

**Solution with circulation ejector to**  
ensure good heat transfer from top to  
bottom

## METHOD 1

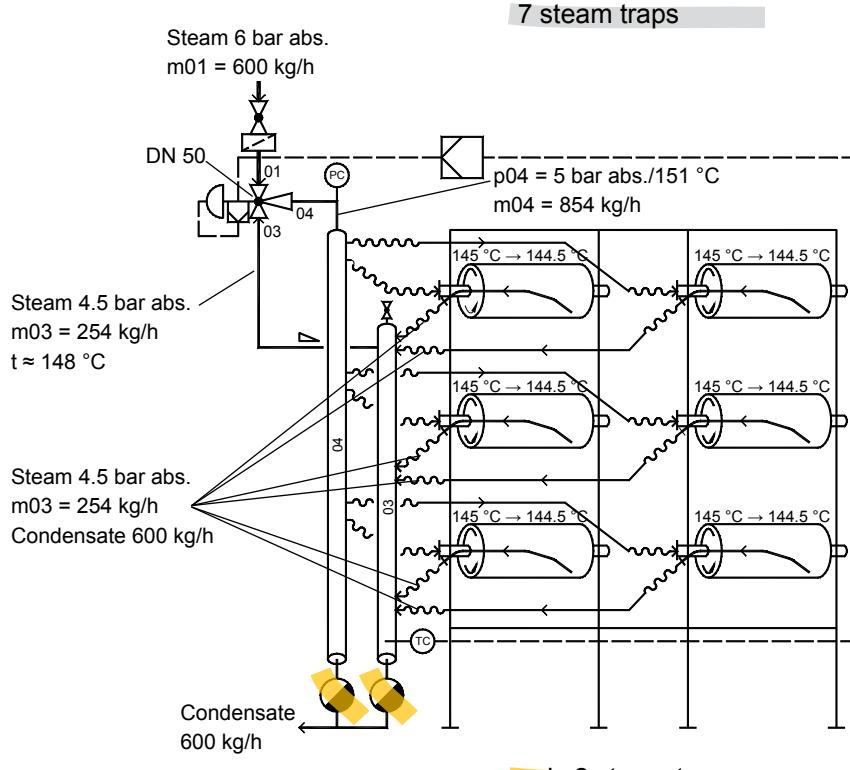

Recirculation: Example and comparison of conventional solution and ejector solution with drum dryers

**Conventional solution with control valves, 7 steam traps and lower surface temperature**

**Solution with ejectors, only 2 steam traps and higher surface temperature**

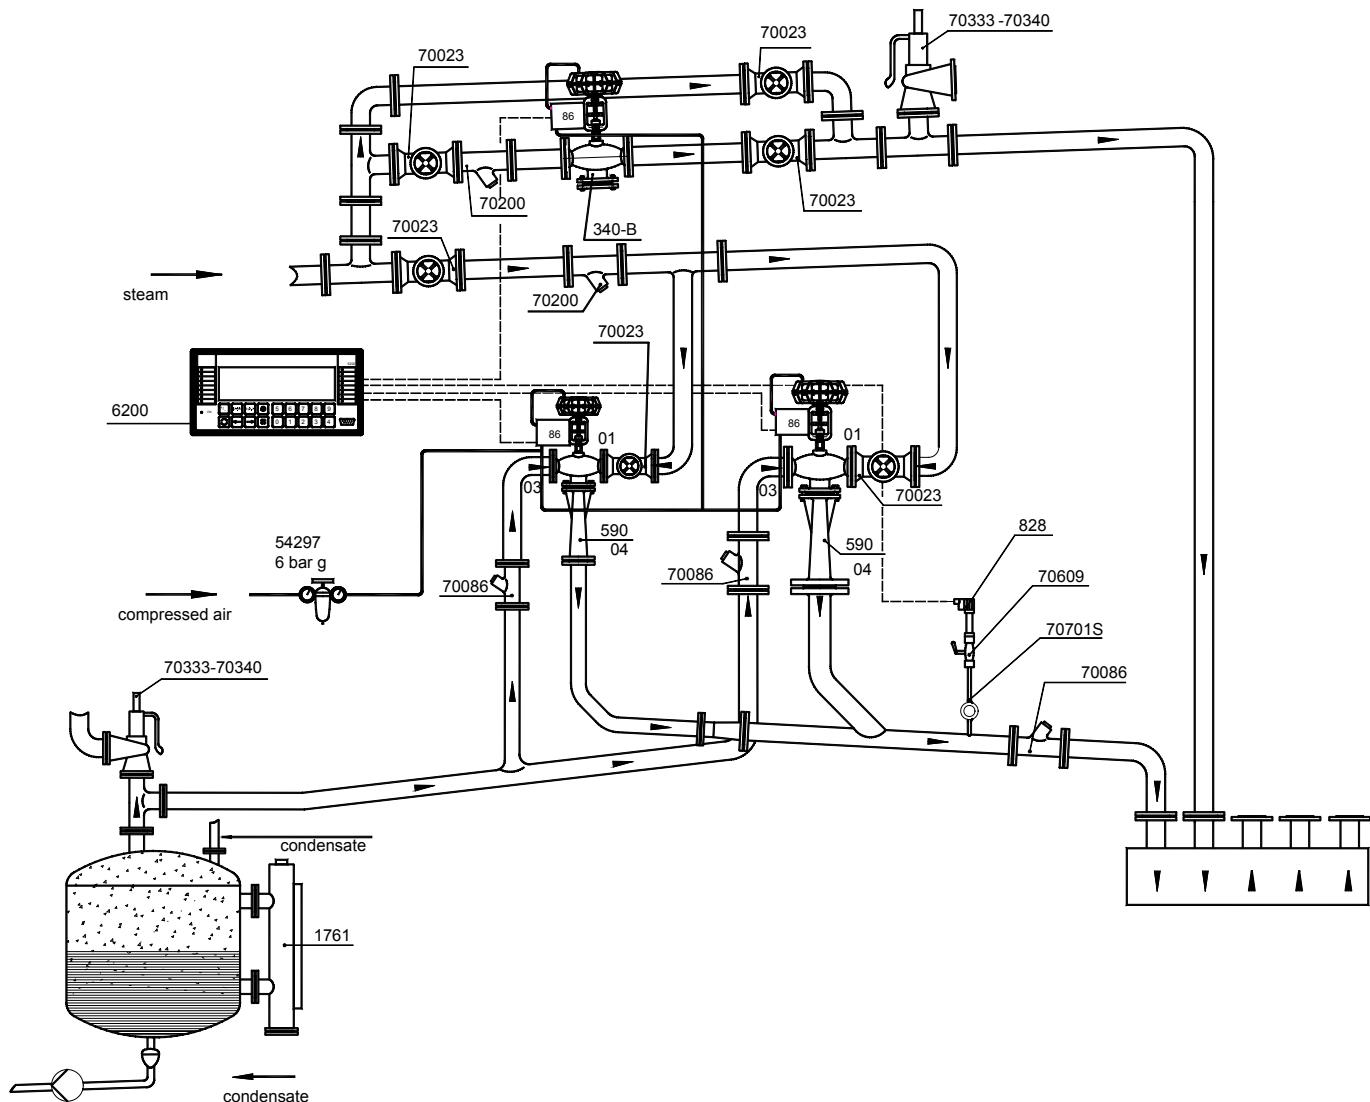

- Increased performance
- More efficient use of steam
- Easier drainage of condensate

	Conventional	With ejector
Steam pressure at the drum inlets	5 bar abs.	5 bar abs.
Δt above the drum surface	135 °C - 120 °C = 15 °C	145 °C - 144 °C = 1 °C
Number of steam traps	7	2
Steam quantity to be condensed	600 kg/h	600 kg/h
Steam quantity to be returned	-	254 kg/h

**METHOD 2**

Compression: Flash tank with 2 top-mounted compressors for variable loads and a bypass pressure reducing valve for start-up operation.

System properties in comparison

System values	Conventional system without steam ejector	System with 2 steam ejectors	Savings per hour with steam ejectors
Waste steam	-	26 kg/h	
Primary steam	2000 kg/h	1974 kg/h	
Steam pressure	6 bar	6 bar	
Steam temperature	165 °C	165 °C	
Feed water temperature	100 °C	158.9 °C	
Steam loss to atmosphere from open condensate tank	240 kg/h	20 kg/h	
Steam boiler efficiency	85 %	85 %	
Energy at steam boiler inlet	1558 kW	1350 kW	208 kW
Fuel consumption - oil / gas	132 kg/h / 177 Nm³/h	114 kg/h / 153 Nm³/h	18 kg/h / 24 Nm³/h
Additional consumption of treated water	240 kg/h	20 kg/h	220 kg/h

Die Baelz-Dampfstrahlpumpe baelz 590 finden Sie im Kapitel "Strahlpumpen" ab Seite <?> dieses Katalogs.

Steam ejector systems can be delivered pre-assembled on a skid (picture above) or as a Baelz system which is installed at the customer's site.

## Superheated steam cooling & pressure reduction baelz 591

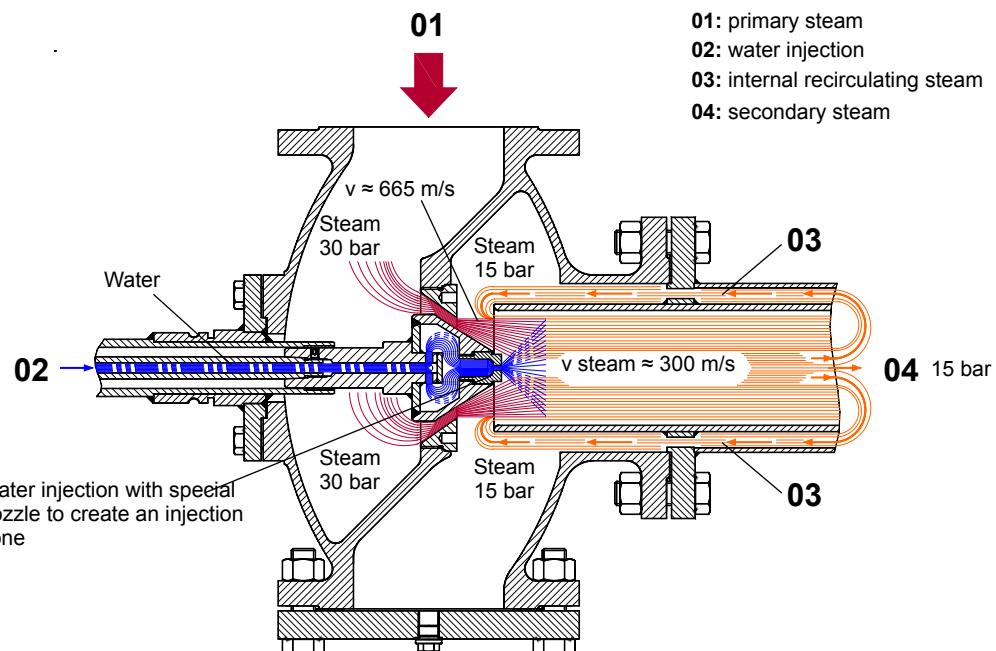

### METHOD 3: SUPERHEATED STEAM COOLING / SATURATED STEAM GENERATION

Due to the very fine atomization of water injected into the primary steam, the exchange surface area for evaporation is increased dramatically. This opens up new possibilities in the production process.

The water is injected through a special nozzle (see figure below). The water droplets are further nebulized by the fast flowing steam. This ejector with internal recirculation - used either as pressure reducing desuperheater or as a generator of saturated or wet steam - has several advantages compared to conventional desuperheaters.

### ADVANTAGES AT A GLANCE

- Saturated steam generation without any superheating thanks to internal recirculation
- Higher accuracy in pressure and temperature control
- Excellent atomization of the injected water
- Greater product diversity of the production plant possible
- Improved product quality
- You benefit from Baelz expertise in the design process

Function of steam cooling and reducing Jetomat® baelz 591 with operating speeds

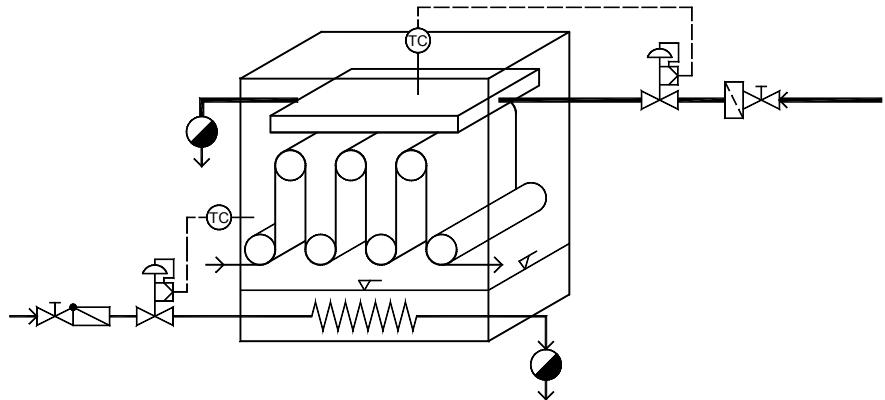

Parameters	baelz 591 installations - comparative values				Results at a glance

Cooling water temp.	-	20 °C	-	60 °C		

### METHOD 3

Superheated steam cooling / saturated steam generation: More flexibility and improved product quality, for example in the textile industry.

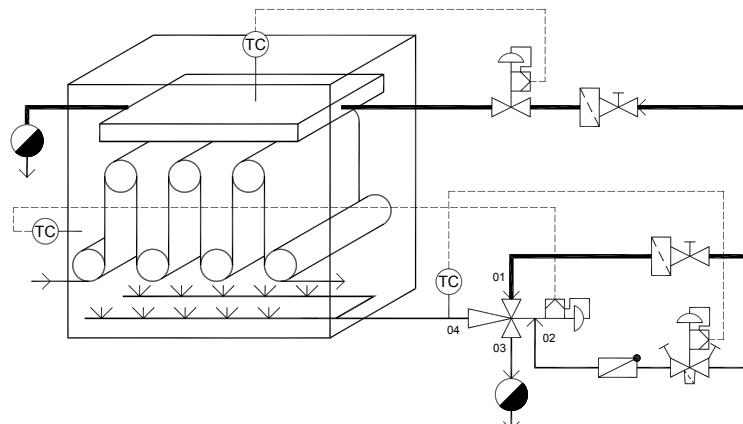

#### Conventional solution

Textile steamer with evaporation in bottom water bath

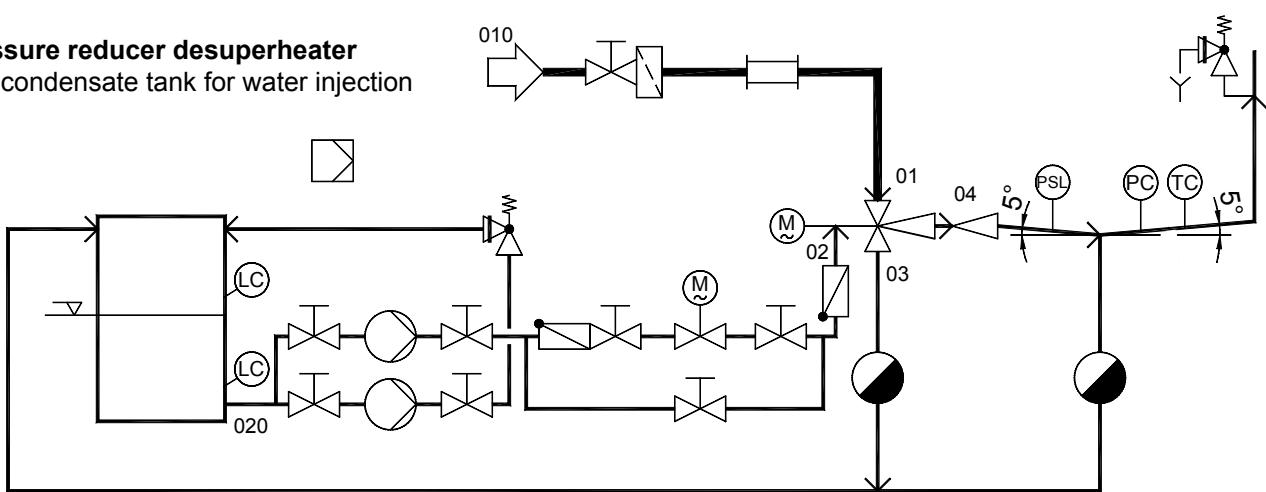

#### Solution with saturated steam generation

Textile steamer with steam ejector baelz 591 for generating saturated steam at approx. 103 °C

#### Pressure reducer desuperheater with condensate tank for water injection

Die Baelz-Dampfstrahlpumpe baelz 591 finden Sie im Kapitel "Strahlpumpen" ab Seite <?> dieses Katalogs.

Steam ejector systems can be delivered pre-assembled on a skid (picture above) or as a Baelz system which is installed at the customer's site.

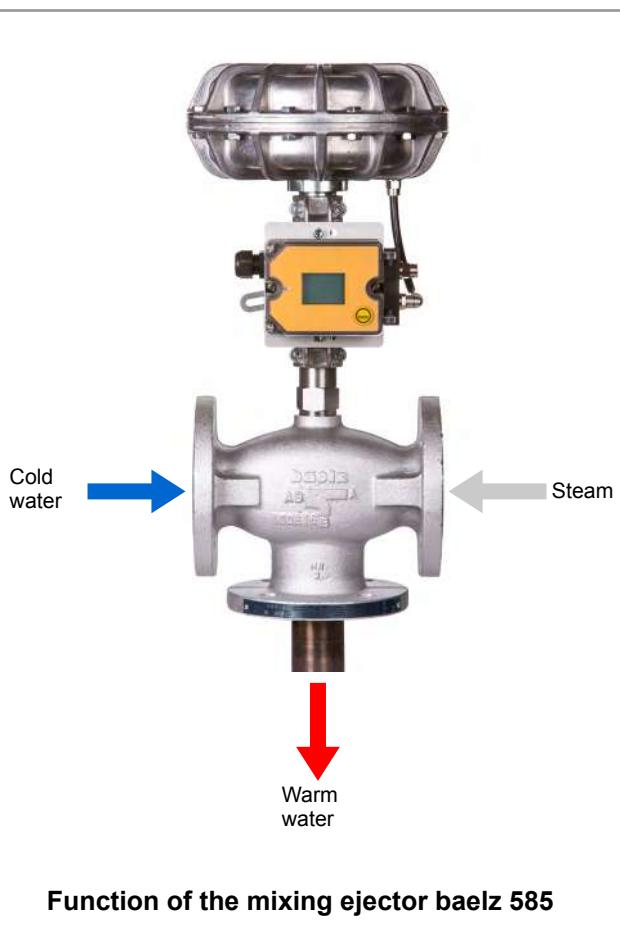

## Mixing ejectors baelz 585

### WATER HEATING WITH DIRECT STEAM INJECTION

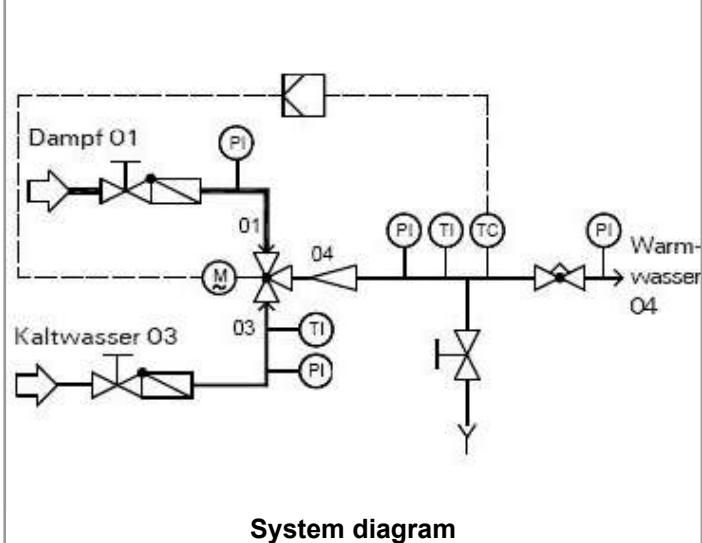

In the steam/water mixing ejector baelz 585 water is mixed with steam to reliably supply warm water at the desired temperature. It comes with an actuator, temperature sensor and control unit to enable fully integrated process control.

### ADVANTAGES AT A GLANCE

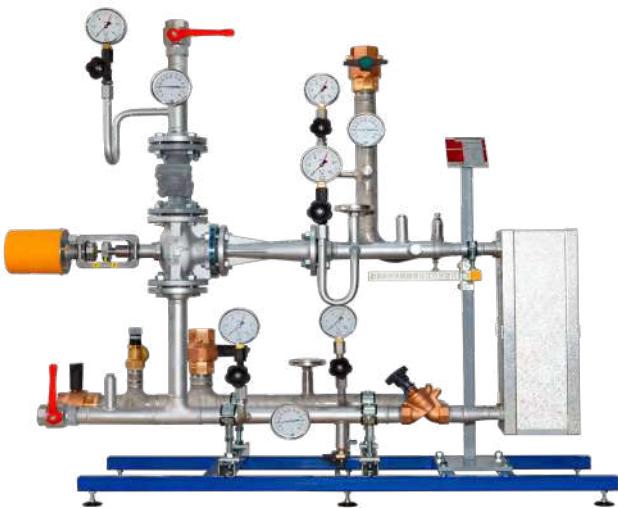

- Optimal use of the motive power of steam during the transfer of the water to be heated
- Optimal mixing through steam condensation in water
- Silent operation due to the specially designed mixing chamber
- Fully integrated process control possible
- Low investment costs
- Can also be used with other liquids

### Application example: Water heating with direct steam injection

Die Baelz-Dampfstrahlpumpe baelz 585 finden Sie im Kapitel "Strahlpumpen" ab Seite <?> dieses Katalogs.

Moduline compact warm water station with plate heat exchanger baelz 140 and water ejector Jetomat® baelz 480

Water ejector systems can be delivered pre-assembled on a skid (picture above) or as a Baelz system which is installed at the customer's site.

## Water ejector systems Moduline

### ONLY ONE PUMP PER SYSTEM, ENERGY SAVING

The controlled water ejector based on the Baelz-hydrodynamic® process combines the functions of four individual components: It generates circulation in the area of the consumer, it adjusts circulation volume according to the actual heat requirement, it regulates temperature and compensates for fluctuations in differential pressure.

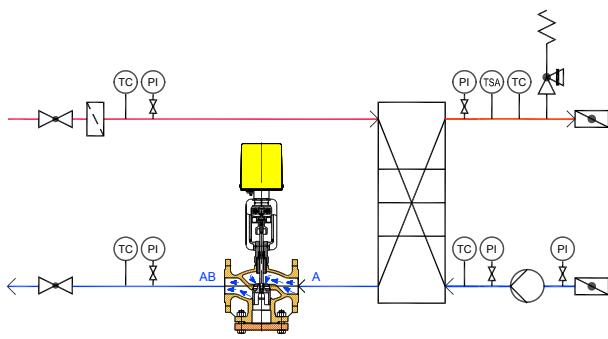

Where secondary heating water is usually distributed in the heating circuits using control valves with one electric pump each, Baelz uses controlled ejectors with only one main pump.

Many heating and ventilation systems have been in operation for over 30 years, saving electricity and money.

### ADVANTAGES AT A GLANCE

- Good controllability over the entire load range
- Only one main pump, meaning lower energy costs
- Simplified system design due to fewer components
- Less data points in the superordinate control system
- Lower return temperatures
- Hydraulic stability

### Admixture control with ejectors

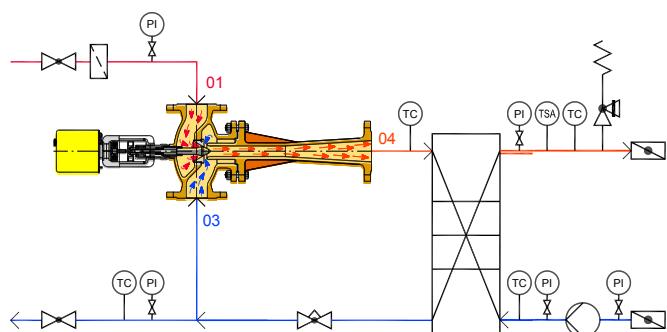

Throttle circuit

In a **throttle circuit**, the inlet temperature into the heat exchanger is always equal to the primary flow temperature in the supply network. A primary inlet temperature that is too high often leads to calcification during water processing.

The heat output is controlled by changing the mass flow rate. Controlling the heat output exclusively by changing the volume causes a greater temperature difference between the inlet and outlet of the mass flow in partial load operation. Large temperature differences create thermal stresses, which are a frequent cause of damage to heat exchangers.

In addition, a low water flow rate in partial load operation causes poor heat transfer in the heat exchanger.

Admixture circuit with an ejector

For information on Baelz water ejectors, see the "Ejectors" chapter beginning on page 74 of this catalogue.

Water ejectors - economical, flexible and versatile:

Station with distributor assembly and baelz 480 water ejectors.

Tankless water heater system

Tankless water heater with distributor and 3 heating circuits

Heating station – Baelz supplies fully insulated stations on request.

Ejector technology saves electricity as electric pumps are usually rendered unnecessary. Where pumps are needed to return water into the circuit in conventional plants - the flow energy having been dissipated in control valves or differential pressure regulators - controlled Baelz ejectors enable the flow energy in district heating and hot water systems to be retained at all times. Ejectors therefore result not only in lower energy and investment costs but also in fewer components and fewer moving parts. The customer is provided with a durable, low-maintenance and reliable system with significantly lower maintenance and repair costs.

In addition to the baelz 480 water ejectors, suitable for use with water, liquids and thermal oil, we also offer smaller ejectors for direct use at the heating surface.

Baelz ejector technology can be delivered as part of a ready-to-use station (example, see picture above) or can be installed at the customer's site (example, see picture on next page).

**Heat transfer station with ejector heating distributor and buffer tank; Baelz head office, Heilbronn**

Small selection of Baelz reference projects with water ejector technology			
Product	Company	Country	Industrial sector
50 x baelz 480 with P21	Bundesinstitut für Risikobewertung, Berlin	Germany	Building technology
3x baelz 471 with E07	Vattenfall	Germany	Building technology
1 x 480 with E07	Ukrspn	Ukraine	Power plant
1 x 480 with E07	Cathedral	Belgium	Building technology
baelz 480	Ford Werke	Germany	Automotive
baelz 471, baelz 475	Ante-Holz	Germany	Timber industry

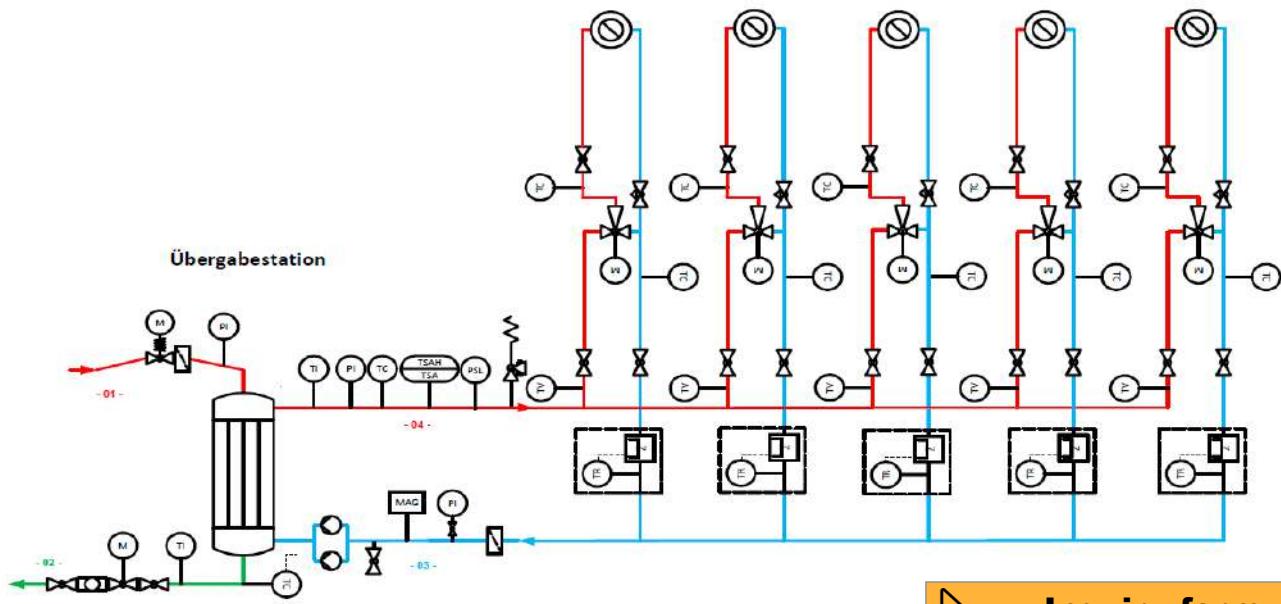

### Example of a Baelz system at a pharmaceutical company:

A leading Southern German pharmaceutical company was planning a new modular production building at its site. The building was to be supplied with cold water, cooling water, steam, drinking water and compressed air by a central power plant. Until then, all building systems on the site were planned conventionally. In the case of the modular production building, however, the decision was taken to utilize ejector technology for the first time.

The use of ejector technology reduced the number of fittings and hence also the number of data points significantly. In this case, about 1800 euros were saved on data points per group. The following illustration shows the optimized hydraulics of the system.

# Baelz absorption chillers

## BEE, BUMBLEBEE, HORNET

Baelz-absorpdynamic® absorption chillers are suitable for cooling industrial plants, rooms, machines and food, but can also be used in winter for generating heat. Possible heat sources are waste heat from combined heat and power plants or from industrial or combustion plants as well as district heating.

## ADVANTAGES AT A GLANCE

- High spreads for district heating applications > 40 K
- Thermal process efficiency, COP up to 0.80
- Low heat source temperatures from 60 °C possible
- Process design for dry recooling
- Use as heat pump for heating systems up to 45 °C
- Fast response, 25 % to 100 % power < 10 minutes
- Good access through doorways, <0.97m x 1.60m x 2.05m (Bee)
- Efficient system control for min. operation/energy costs

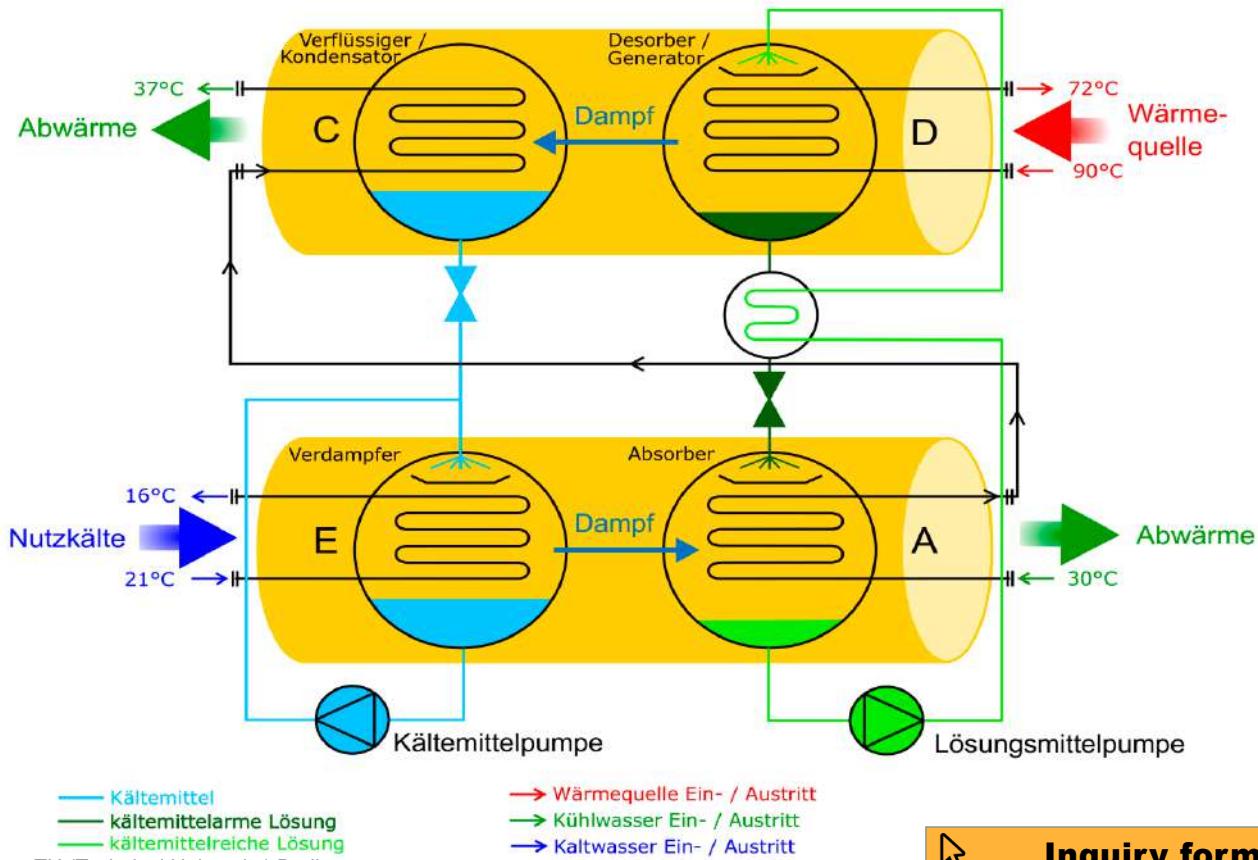

## OPERATING SOFTWARE TOUCHPILOT®

The operating software was specially developed by Baelz for controlling the Baelz absorption chillers Bee, Bumblebee and Hornet. With its intuitive application and clear user interface for quick navigation (shown above), it combines functionality and user-friendliness.

## Functional principle

In contrast to electrically operated vapor-compression chillers, absorption chillers generate cold by using thermal energy. The principle of the absorption process is based on a closed circuit of separation and recombination of two liquids (refrigerant and solvent) to achieve a cooling effect. A lithium bromide solution with water as a refrigerant is ideally suited on account of the excellent thermodynamic, calorific and physical properties, as well as lithium bromide being absolutely safe for those working with it in this context. The global warming potential value (GWP) being 0, the system does not fall under the F-Gas regulation.

The illustration below shows the functional diagram of an absorption chiller.

[Inquiry form](#)

## Absorption chiller Bee

### BEE

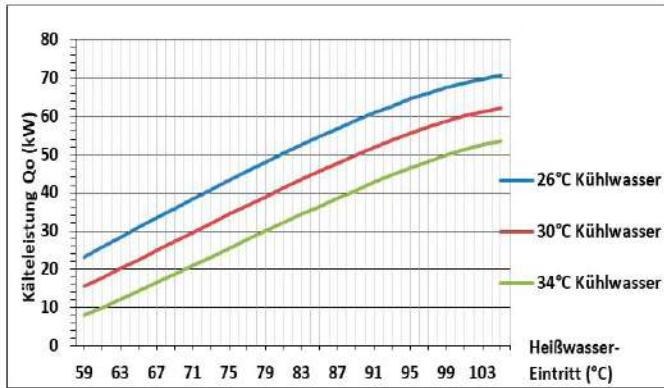

The Bee is the smallest Baelz absorption chiller. It is ideally suited for installation in confined spaces and for difficult access conditions. Thanks to its compact design (only 97 cm wide!), access through doorways is also possible.

### TECHNICAL SPECIFICATIONS

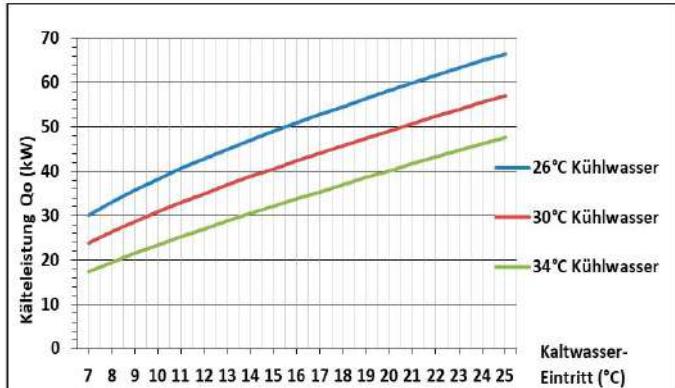

Type:	Single effect LiBr-H <sub>2</sub> O
Cooling capacity:	50 kW
Coefficient of performance:	0.80
Tmin (hot water / cold water):	60 °C / 5 °C
Tmax (cooling water):	40 °C
L / H / W:	2.05 / 1.60 / 0.97 m
Structural weight:	1,100 kg
Operating weight:	1,360 kg
Max. weight in case of damage:	1,944 kg
Current type:	400 V / 3 phases / 50 Hz
Power consumption:	max. 400 W (without external field devices)

## Absorption chiller Bumblebee

### BUMBLEBEE

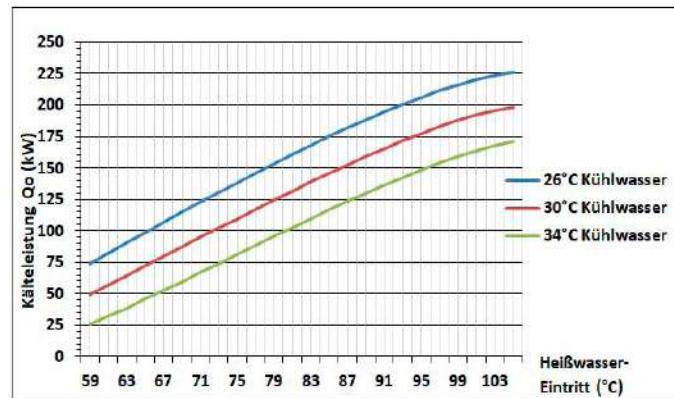

The Bumblebee is Baelz's best-selling absorption chiller. It is powerful yet compact and is particularly suitable for industrial plants with process cooling (combined heat and power plants, waste heat from compressed air systems).

### TECHNICAL SPECIFICATIONS

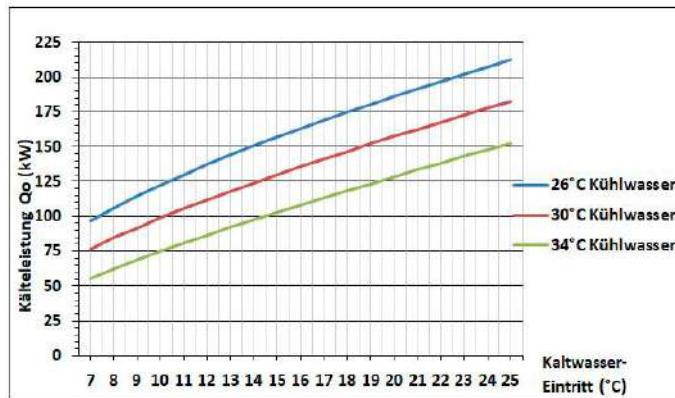

Type:	Single effect LiBr-H <sub>2</sub> O
Cooling capacity:	160 kW
Coefficient of performance:	0.80
Tmin (hot water / cold water):	60 °C / 5 °C
Tmax (cooling water):	40 °C
L / H / W:	2.31 / 2.14 / 1.18 m
Structural weight:	2,100 kg
Operating weight:	2,730 kg
Max. weight in case of damage:	3,870 kg
Current type:	400 V / 3 phases / 50 Hz
Power consumption:	max. 700 W (without external field devices)

### Characteristic curves (thermal) - General conditions for reference operating point

## Absorption chiller Hornet

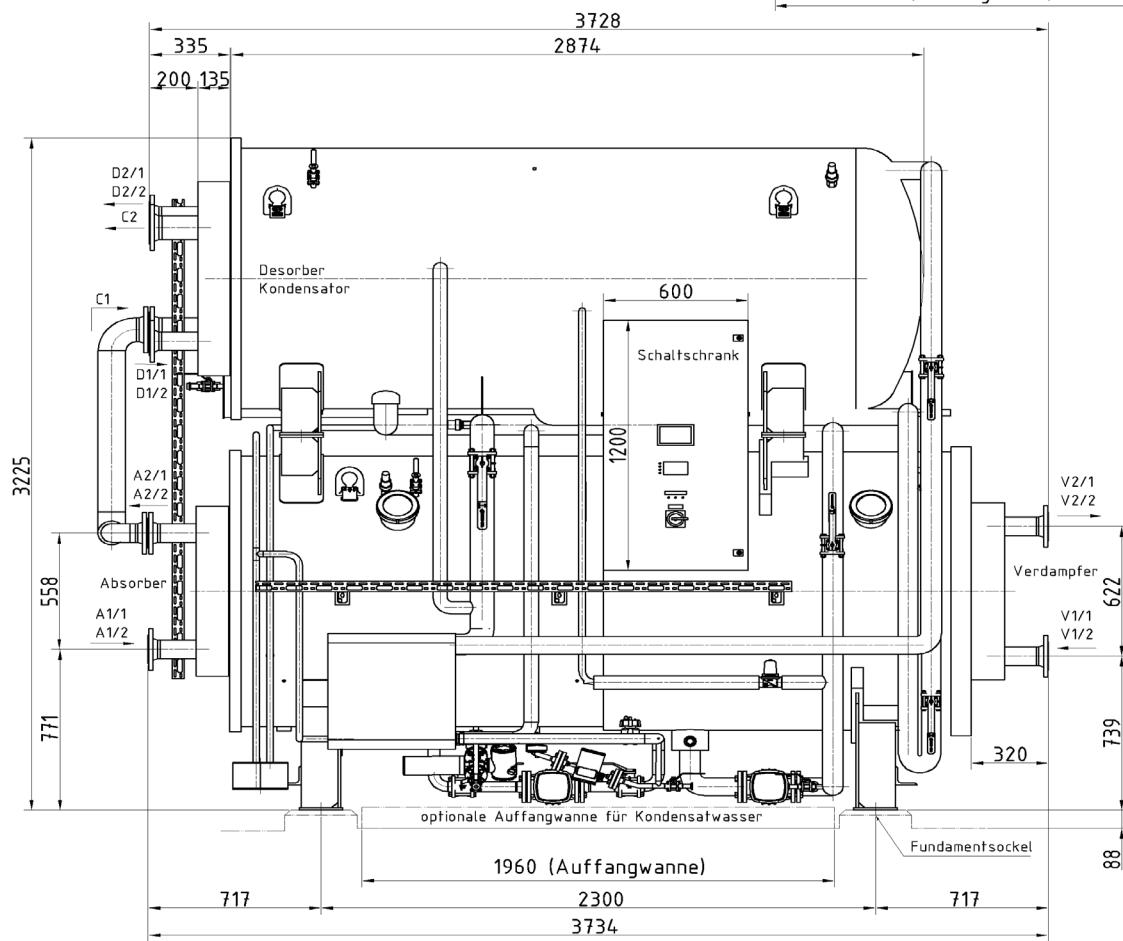

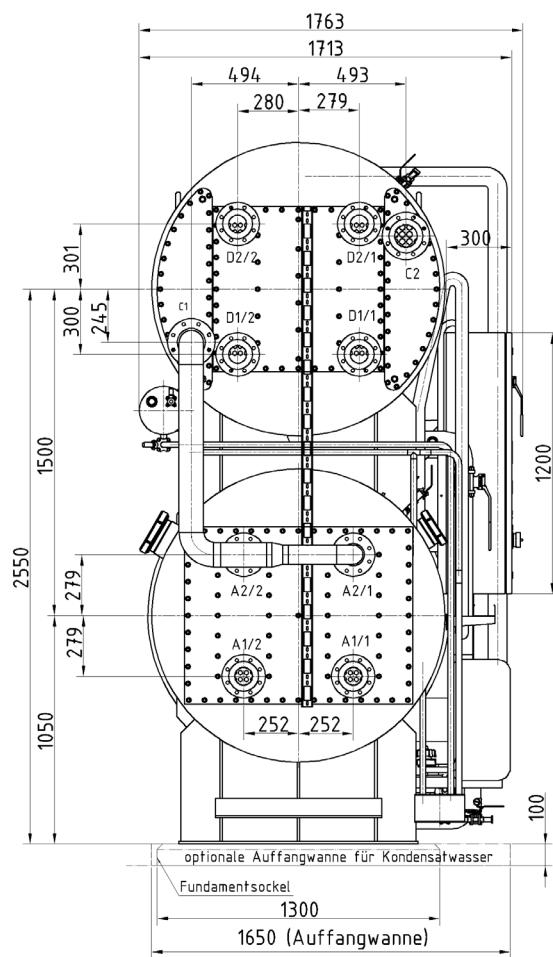

### HORNET

The Hornet is the largest Baelz absorption chiller. With a nominal cooling capacity of 500 kW, it is suitable for applications with increased cooling load and for more demanding industrial applications.

### TECHNICAL SPECIFICATIONS

Type:	Single effect LiBr-H <sub>2</sub> O
Cooling capacity:	500 kW
Coefficient of performance:	0.80
Tmin (hot water / cold water):	60 °C / 5 °C

## baelz 61

### Immersion temperature sensor

- For temperature measurement in liquid and gaseous fluids
- Measuring element PT100
- Connection head made of aluminum
- Ingress protection rating IP 66
- Measuring fluid: -50 ... +600 °C
- Ambient temperature: max. 100 °C
- Several insertion lengths

page 214

## baelz 251

### Stainless steel thermowell

- For baelz 25 and baelz 61
- Made of stainless steel 1.4571
- Available as screw-in or weld-in thermowell
- For several sensor lengths

page 214

## baelz 828

### Pressure transmitter

- Accuracy: ≤0.2% at 25 °C
- Auxiliary voltage: 9 ... 30 V DC
- Output signal: 4 ... 20 mA, 2-wire
- Ingress protection rating IP 65
- Measuring fluid: -40 ... +100 °C (/125 °C)
- Ambient temperature: -25 ... +80 °C

page 215

## baelz 1750

### Conductivity electrode

- For monitoring water quality
- Electrode housing and electrode rod made of stainless steel
- Ingress protection rating IP 65
- Operating pressure max. 32 bar
- Operating temperature max. 239 °C
- Available in 2 stem lengths

page 215

## baelz 1753

### Measuring and switching amplifier

- For conductivity electrode baelz 1750
- Housing with snap-on mounting for mounting rail
- 1 limit contact max. 250 V AC, 5 A
- Current output: 4 ... 20 mA
- Voltage: 230 V ± 10 %, 50/60 Hz, approx. 4.5 VA
- Ambient temperature: -0 ... 60 °C

page 216

## baelz 1771

### Bypass level sensor

- Level indicator without auxiliary power
- Bypass tube and magnetic float made of stainless steel 1.4571
- Operating pressure max. 20 bar
- Operating temperature max. 200 °C
- Several designs available

## baelz 22

### DESCRIPTION

Room temperature sensor for temperature measurement in living spaces, offices, etc. For indoor wall mounting.

### Accessories

Type	Description	Option
ZB25-26622	Adapter for socket connection G 1/2, material 1.4571 (reducing adapter from G 1/2 to G 1/4) optionally with sealing edge ring or copper seal	incl. sealing edge ring G 1/2, 1.4571 (for clean steam stations)
25-PZB25-26622 (Cu)		incl. copper seal 23 x 21 x 2 mm

## baelz 26

### DESCRIPTION

Duct temperature sensor for temperature measurement in ventilation ducts

### TECHNICAL SPECIFICATIONS

Connection head:	polyamide, pure white
Ingress protection rating:	IP 65
Cable gland:	M16
Sensor sleeve:	Ø 6 mm, 1.4571
Housing temperature:	-35 ... +70 °C
Measuring fluid:	-45 ... +130 °C
Flow velocity:	≤ 30 m/s air
Insertion length:	192 mm
Weight approx.:	0.1 kg

### Equipment, baelz 26

Type	Measuring element
26-PT	1 x PT100
26-2PT	2 x PT100
26-3.2	1 x NTC
26/2-3.2	2 x NTC

### Accessories

Type	Description	Notes
ZB26-MF-Ø7mm	Mounting flange for sensor sleeve from baelz 26, diameter: 7 mm, weight approx.: 0.04 kg	As replacement or for retrofitting Mounting flange included in baelz 26 delivery.

## baelz 27

### DESCRIPTION

Contact temperature sensor for temperature measurement on tubes

### TECHNICAL SPECIFICATIONS

Housing:	polyamide, pure white
Ingress protection rating:	IP 65
Sensor sleeve:	brass
Ambient temperature:	-35 ... +70 °C (housing)
Measuring range:	-45 ... +130 °C
Dimensions:	65 x 50 mm
Suitable for all tube Ø up to 2"	
Weight approx.:	0.05 kg

### Equipment, baelz 27

Type	Measuring element
27/1-PT	1 x PT100
27/1-PT1000	1 x PT1000
27-3.3	1 x NTC

**Note:** Tensioning strap and heat conducting paste included. For larger diameters, also order tensioning strap (see accessories).

### Accessories

Type	Description	Notes
ZB27-SB-900mm	Tensioning strap for tube Ø > 2" Length: 900 mm, weight approx.: 0.05 kg	Heat conducting paste included

## baelz 61

### DESCRIPTION

Immersion temperature sensor for temperature measurement in liquid and gaseous fluids.

### TECHNICAL SPECIFICATIONS

Measuring element:	PT100, EN 60751 (IEC 751), Class B
Ingress protection rating:	IP 66
Connection head:	form B, aluminum
Stem:	Ø6 mm, 1.4571 with sheathed cable (vibration resistant)
2-wire circuit	
Cable gland:	M20 x 1.5
Compression fitting:	G 1/4, 1.4571
Measuring range:	-50 ... +600 °C
Ambient temperature:	max. 100 °C

Operating parameters, baelz 61			
Length (mm)	Pressure (bar)	Fluid density (kg m³/h)	Flow velocity (m/s)
100/200	≤ 8	Air, gas, steam ≤ 5.5	60
300			30
400			30
600			30
100/200			8.5
300	≤ 40	Gas, steam ≤ 109	5
400			5
600			5
100/200			3.2
300	≤ 40	Liquid ≤ 800	2
400			2
600			2
100/200			2.5
300	≤ 40	Liquid ≤ 1000	1.8
400			1.8
600			1.8

Equipment and options, baelz 61			
Type	Measuring element	Stem length (mm)	Weight approx. (kg)

Accessories		
Type	Description	Notes
ZB61-MP	Mounting plate for air duct mounting baelz 61, with thread G 1/4	with soft seal for max. 80 °C, dimensions 60 x 60 mm, weight approx. 0.1 kg
ZB61-G1/2-VA	Reducer fitting G 1/2 - G 1/4	1.4571, weight approx. 0.05 kg
ZB61-G1/4-VA	Replacement fitting G 1/4	1.4571, weight approx. 0.05 kg

## baelz 251

### DESCRIPTION

Thermowell made of stainless steel 1.4571 for screw-in or weld-in temperature sensors.

### TECHNICAL SPECIFICATIONS

#### Stainless steel screw-in thermowell baelz 251-S5

for baelz 25 and 61

Connection: internal G 1/4, external G 1/2

#### Stainless steel weld-in thermowell baelz 251-S6

for baelz 25 and 61

Connection : internal G 1/4

#### Stainless steel screw-in thermowell baelz 251-J-S7

for baelz 239/2-J and 239/3-J

Connection: screw-in spigot form A according to DIN 3852/2, G 1/2

Equipment and options, baelz 251

## baelz 828

### DESCRIPTION

Pressure transmitter

### TECHNICAL SPECIFICATIONS

Accuracy:	≤ 0.2 % at 25 °C
Auxiliary voltage:	9 ... 30 V DC
Output signal:	4 ... 20 mA, 2-wire, short-circuit proof
Electrical connection:	plug EN175301-803A
Process connection:	G 1/2 A/DIN 16288, 1.4404
Housing:	1.4404
Measuring cell:	ceramic Al <sub>2</sub> O <sub>3</sub>
Process seal:	FPM (Viton)
Ingress protection rating:	IP 65
Fluid temperature:	-40 ... +100 °C (125 °C < 0.5 h) - see note
Ambient temperature:	-25 ... +80 °C
Weight approx.:	0.15 kg

**Note:** For higher temperatures we recommend a water seal, see baelz 85800.

Digital display on inquiry (ZB828-DA)

## baelz 1750

### DESCRIPTION

Conductivity electrode for monitoring water quality.

### TECHNICAL SPECIFICATIONS

Nominal pressure:	PN 40
Operating pressure:	max. 32 bar
Operating temperature:	max. 239 °C
Ambient temperature:	plug 100 °C
Electrode housing:	stainless steel
Electrode rod:	stainless steel
Insulator:	PTFE
Ingress protection rating:	IP 65
Mechanical connection:	G 1/2
Electrical connection:	plug connector with terminal screws, strain relief, cable gland PG 11

### Equipment and options, baelz 1750-5

Type	Stem length (mm)	Weight approx. (kg)
1750-5-340	340	0.8
1750-5-265	265	0.5
1750-5-150	150	0.3

**Note:** Sealing edge ring in stainless steel: Baelz type 70707-VA-G 1/2

## baelz 1753

### DESCRIPTION

Measuring and switching amplifier for conductivity electrode baelz 1750-5.

Housing with snap-on mounting for mounting rail.

### TECHNICAL SPECIFICATIONS

Ingress protection rating:	IP 40
Dimensions (LxHxD):	51 x 112 x 111 mm
1 limit contact:	max. 250 V AC, 5 A
Current output:	4 ... 20 mA
Voltage:	230 V ± 10 %, 50/60 Hz, approx. 4.5 VA
Manual temperature compensation	
Weight approx.:	0.5 kg
Ambient temperature:	0 ... 60 °C

**Note:** The cable capacity must not exceed 1nF.

### Equipment and options, baelz 1753-2

Type	Measuring range (µS/cm)	Adjustable limiting value at 25 °C (µS/cm)
1753-2-1000	0 ... 1000	100 ... 1000
1753-2-10000	0 ... 10000	1000 ... 10000

### Accessories / Extra charges

Type	Description	Notes
ZB1753-CY3x0.75mm <sup>2</sup> -5m (orderNo.) MP1753-022	Low capacitance connection cable BUS SAFETY CY 3 x 0.75 mm <sup>2</sup> Extra charge per additional meter of cable	between baelz 1750 and 1753; length 5 m Max. Do not exceed a cable length of 20 m!

## baelz 1771

### DESCRIPTION

Bypass level sensor for continuous level indication without auxiliary power.

### TECHNICAL SPECIFICATIONS

Bypass tube:	stainless steel 1.4751, Ø 60.3 x 2 mm
Magnetic float:	stainless steel 1.4571 Ø 50 mm, length 185 mm
Connection flange:	DN 20, PN 40
Operating pressure:	max. 20 bar
Operating temperature:	max. 200 °C
Drain plug:	G 1/2 on lower flange (see note for option)
Level sensor:	resistance measuring chain approx. 0-5kΩ (measuring circuit 4.2)
Measuring chain resolution:	5 mm

### OPTIONS

ZMU	2-wire transmitter 1771-ZMU
	installed in the terminal housing of the sensor
	Ambient temperature: -20 ... +60 °C
	Output: 4 ... 20 mA
	Input: 0 ... 5 kΩ, 3-wire
	Load max.: 700 Ω at 24 V DC
	Supply: 11 ... 30 V DC

2BGU	2 magnetic contacts 1771-BGU
	Reed contact: bistable
	230 V AC, 60 VA, 1 A
	230 V DC, 30 W, 0.5 A
	Silicone cable 2 m (4 x 0.75 mm²)
	Arrangement of the magnetic switches: min. 30 mm from the center of the support

Equipment and options, baelz 1771-K

Type	Display	Center distance (mm)	With ZMU	With 2BGU	Weight approx. (kg)
1771-K-450		450			15

<b>ZB1771-ZMU-5000Ohm-ME650</b>	Sensor with built-in transmitter for baelz 1771. Complete with stainless steel tube. Including 2-wire transmitter baelz 1771-ZMU installed in the terminal housing of the sensor.	Ambient temp.: -20 ... 60 °C Output: 4 ... 20 mA Input: 0 ... 5 kΩ, 3-wire Load max.: 700 Ω at 24 V DC Supply: 11 ... 30 V DC	Center dist.: 650 mm
<b>ZB1771-ZMU-5000Ohm-ME850</b>			Center dist.: 850 mm

page 220

**baelz 69/1-OM****Frost protection monitor**

- For temperature monitoring of air heaters against freezing
- Two designs
- Adjustment range: -18...+13 °C
- Ingress protection rating with cover plate: IP 44
- Electrical changeover contact: 16 A, 250 V
- Cable connection:M16 strain-relieved
- Weight approx.: 0.7 kg

page 221

**baelz 231/2-J-W****Double thermostat "Pilot"**

- TÜV type-tested
- Functions purely electromechanically
- Housing: plastic / die-cast aluminum
- Ingress protection rating: IP 54 - EN 60529
- Pressure resistance: up to 50 bar

page 222

**baelz 239/3-J****Inline expansion thermostat "Pilot"**

- DIN-registered safety temperature monitors
- Functions purely electromechanically
- Housing: plastic / die-cast aluminum
- Ingress protection rating: IP 54 - EN 60529
- Pressure resistance: up to 65 bar

page 223

**baelz 831/2-fs****Diaphragm differential pressure switch**

- For use in firing, ventilation and air conditioning technology
- Housing and cover: polycarbonate
- Diaphragm: NBR
- Setting tolerance: ± 15 %
- Ingress protection rating: IP 54
- Ambient temperature: -15...+60 °C
- Fluid temperature: -15...+70 °C
- Weight, approx.: 0.2 kg

page 224

**baelz 834****Safety pressure switch**

- TÜV-tested
- Sensor housing and wetted parts made of stainless steel
- Process connection: G ½ A, external thread
- Ingress protection rating: IP 54
- Max. fluid / ambient temp.: -25...+70 °C
- 1 changeover switch: 5 A, 250 V AC, inductive
- Weight, approx.: 0.6 kg

page 225

**baelz 835/5****Pressure switch**

- Housing: aluminum with transparent cover
- Ingress protection rating: IP 54
- Process connection: G ¾, internal
- Fluid temperature: +70 °C
- Ambient temperature: -20...+70 °C
- 1 changeover switch 16 A non-inductive, 6 A inductive max. 230 V AC
- Weight, approx.: 0.5 kg

page 226

## baelz 779

### Float switch

- For level monitoring
- Switching differential: 13 mm
- Switching contact: 1 NC contact, 1 NO contact
- Ambient temp.: max. 70 °C
- Ingress protection rating: IP 66
- Threaded cable gland: M20 x 1.5

page 227

## baelz 783

### Float switch

- For level monitoring
- Guide tube: 1.4571; Ø 12 mm
- Cylinder float: 1.4571; Ø 44 mm
- Process connection: G 1½; 1.4571
- max. -30...+120 °C / 16 bar
- Ingress protection rating: IP 65
- Switching capacity: 230 V AC; 100 VA; 1 AAC / 230 V DC; 50 W; 0.5 A DC
- Switching element: Reed switch

page 228

## baelz 466

### Controller

- With 4 or 6 input contacts
- For wall mounting

## baelz 1781/5

### Amplifier relay

- Can be used with baelz 1782-4 as sensor for interfaces

## baelz 1782-4

### Level probe

- No moving parts in the fluid
- max. -220 °C / 25 bar

page 229

## baelz 1783/2

### Duct smoke detector

- For controlling fans and for monitoring ventilation.
- VdS approved (G210059)
- Sensor: scattering RM 3.3 (ALK-E)
- Operating temperature: -20 °C - +50 °C
- Perm. flow: 1 - 20 m/s
- Ingress protection rating: IP 54
- Weight, approx.: 3 kg

page 230

## baelz 740-S-E

### Condensate pilot - High pressure centrifugal pumps

- Also as submersible pump
- Housing made of cast iron GJL-200
- Operating pressure max. 16 bar
- Neutral fluids - water, oils, etc.
- Ingress protection rating: IP 55

page 231

## baelz 749

### Pump controller

- For 1 or 2 condensate pumps
- up to max. 1.5 kW
- With fault alarm output
- Coating: RAL 7035, light gray
- Supply line: 400 V / 230 V, 50 Hz
- With motor-protective circuit-breaker, power protection, control fuse
- Control lamps: OPERATION / FAULT

## baelz 69/1-OM

### DESCRIPTION

Frost protection monitor for temperature monitoring of air heaters against freezing.

### TECHNICAL SPECIFICATIONS

Steam-filled capillary with precise switching mechanism

Adjustment range: -18...+13 °C

Ingress protection rating with cover plate: IP 44

Electrical changeover contact: 16 A, 250 V

Cable connection: M16 strain-relieved

Housing: sheet steel, nickel-plated

Capillary tube length 6 m without reset, with 6 mounting clamps.

Mounting plate, cover plate, capillary feed-through and the required mounting parts are included in the delivery.

Weight approx.: 0.7 kg

## baelz 69/1-OM-2P

### DESCRIPTION

2-phase antifreeze monitor on air side with display for temperature monitoring of air heaters against freezing.

### TECHNICAL SPECIFICATIONS

Display indicator: for operating mode and frost hazard

Operating voltage: 24 V AC +10/-20 %, 50/60 Hz

Power consumption: 6.6 VA

Measuring range: 0...15 °C

Adjustment range: 1...10 °C

Switching differential: approx. 2 K

Continuous output signal: 0...10 V max. 1 mA

Continuous input signal: 0...10 V max. 1 mA

Contact load max.: 6(2) A, 230 V AC, 6 A 24 V DC

Contact load min.: 5 mA, 5 V AC/DC

Factory setting: 5 °C

Perm. apparatus head temp.:

-15...+55 °C

Ingress protection rating / class:

IP 42, I

Time constant: stationary air 90 s, moving air <40 s

Capillary tube: perm. temperature max. 110 °C

Electrical connection: spring terminals max. 2 x 1.5 mm<sup>2</sup>  
or 1 x 2.5 mm<sup>2</sup>

Capillary tube length 6 m, with 6 mounting clamps.

Threaded cable gland M16, rubber grommet and fixing screws are included in the delivery.

Weight approx.: 0.8 kg

## baelz 231/2-J-W

### DESCRIPTION

The TÜV type-tested double thermostat "Pilot" functions purely electromechanically while being reliable and low-priced. It is used for decentralized temperature control as a controller, monitor or limiter.  
 STW = safety temperature monitor  
 STB = safety temperature limiter

### TECHNICAL SPECIFICATIONS

Housing cover:	plastic
Lower part:	
die-cast aluminum, painted	
Ingress protection rating:	IP 54 - EN 60529
Cable gland:	M20 x 1.5
Sensor:	copper (Cu-DHP), Ø 6 mm
Ambient temperature:	thermostat head max. 80 °C
Media:	water, oil, hot steam, air
Connection:	G ½ screw-in spigot form A, DIN 3852/2 with fixing screw
Pressure resistance:	50 bar/100 °C 48 bar/150 °C 42 bar/250 °C
Screw-in thermowell:	Ø 15 x 0.75 mm, 150 or 300 mm stainless steel 1.4571
Switching differential:	STW: 4...6 % STB: internal manual reset
Contact type:	STW: changeover (fs) STB: changeover (fs) and restart lockout
Switching capacity max.:	AC 230 V +10 %, 10(2) A $\cos \varphi = 1$ (0.6) DC 230 V +10 %, 0.25 A

#### Max. inflow velocity in m/s at 200 °C

Oil	4.3	2.9
Air	16.2	10.8

Baelz type	Setpoint range (°C)	Thermowell (mm)	Weight. approx. (kg)
239/3-J-30-fs-VA-200	50...200	300 x Ø8	0.6
239/3-J-15-fs-Mv-150	20...150	150 x Ø8	0.6

**Note:** Adapter for installation in existing thermowell baelz 251-S7 without draining the system, see baelz 85939 in our price list.  
For higher flow velocities we offer thermowells in special design. Please inquire!

## baelz 831/2-fs

### DESCRIPTION

Diaphragm differential pressure switch for differential pressure monitoring in firing, ventilation and air conditioning technology. It is suitable for switching a circuit on, off or over when the actual pressure value changes in relation to the setpoint.

### TECHNICAL SPECIFICATIONS

Housing and cover:	polycarbonate
Diaphragm:	NBR
Setting tolerance:	± 15 %
Ingress protection rating:	IP 54
Ambient temperature:	-15...+60 °C
Fluid temperature:	-15...+70 °C (see note)
Fluid:	air, neutral, non-aggressive gases
Pressure connection:	2 hose nozzles Ø 4.6 mm or 2 hose nipples Ø 4.6 mm
Electrical connection:	terminal screws
Threaded cable gland:	PG11
1 changeover switch:	max. 250 V AC/3 A at cos φ = 0.6 max. 48 V DC/1 A
Weight, approx.:	0.2 kg

Baelz type	Max. operating pressure (mbar)	Adjustment range (mbar)	Switching differential (mbar)	Dimensions L x H x D approx. (mm)
831/2-fs-1.5	50	0.2...1.5	≤ 0.18	Ø 101 mm, depth 56 mm
831/2-fs-3	500	0.4...3	≤ 0.3	72 x 72 x 45.5
831/2-fs-50	500	2.5...50	≤ 1	72 x 72 x 45.5

### Accessories

Baelz type	Product	Weight. approx. (kg)
ZB831-LGW	Air duct connection nipple, 1 set (2 pieces)	0.05
ZB831-KS	Fixing bracket (snap bracket)	0.1

**Note:** For higher temperatures we recommend a water seal, see baelz 85800.

## baelz 834

### DESCRIPTION

The TÜV-tested safety pressure switches baelz 834 are suitable for pressure limitation and pressure monitoring in steam and hot water systems.

### TECHNICAL SPECIFICATIONS

Sensor housing:	stainless steel 1.4104
Wetted parts:	metal bellows - stainless steel 1.4571
Switch housing:	die-cast aluminum GD-AlSi12 (DIN 1725)
Process connection:	G ½ A, AG
Electrical connection:	plug DIN 43650
Ingress protection rating:	IP 54
Max. fluid / ambient temperature:	-25...+70 °C (see note)
1 changeover switch:	5 A, 250 V AC, inductive
Vacuum resistance:	-1 bar
Weight, approx.:	0.6 kg

Baelz type	Function	Adjustment range (bar)	Operating pressure (bar)	Switching differential (bar)
834/1-f-SDBAM6	Maximum pressure limitation	1.2...6	max. 10	Manual reset
834/1-f-SDBAM16	Maximum pressure limitation	3...16	max. 20	Manual reset
834/1-f-SDBAM32	Maximum pressure limitation	6...32	max. 45	Manual reset
834/2-fs-DWR6	Maximum and minimum pressure monitoring	0.5...6	max. 16	0.2 (not adjustable)
834/2-fs-DWR16	Maximum and minimum pressure monitoring	3...16	max. 25	0.5 (not adjustable)
834/2-s-DWR6/206	Minimum pressure limitation	0.5...6	max. 16	Manual reset
834/2-s-DWR16/206	Minimum pressure limitation	3...16	max. 25	Manual reset

**Note:** baelz 834/2-fs-DWR6 = replacement for baelz 834/2-f-DWUM8

baelz 834/2-s-DWR6/206 = replacement for baelz 834/2-f-DBUM8

For higher temperatures a water seal must be provided, see baelz 85830 / 85840. If a water seal is not possible due to lack of space, please ask us for further special designs.

## baelz 835/5

### DESCRIPTION

For monitoring and controlling the pressure of liquids and gases in pipelines, boilers, pressure vessels, water extinguishing systems and apparatus.

### TECHNICAL SPECIFICATIONS

Housing lower part:	die-cast aluminum
Transparent cover:	impact-resistant polycarbonate sealable
Ingress protection rating:	IP 54
Process connection:	G $\frac{1}{2}$ , internal
Diaphragm measuring system	
Diaphragm:	Perbunan (mineral oil resistant)
Fluid temperature:	+70 °C
Ambient temperature:	-20...+70 °C
1 changeover switch 16 A non-inductive, 6 A inductive max. 230 V AC	
Weight, approx.:	0.5 kg

Baelz type	Adjustment range (mbar)	Switching differential (mbar)	Dimensions LxHxD approx. (mm)
835/5-fs-2	0.11...2	0.11	
835/5-fs-4	0.22...4	0.25	
835/5-fs-8	0.5...8	0.5	103 x 105 x 78
835/5-fs-32	2...32	2.0	

### Accessories

Baelz type	Product	Weight. approx. (kg)
ZB835-MVR	Manometer fitting, steel, external thread G $\frac{1}{2}$ x G $\frac{1}{4}$	0.05

**Note:** For higher temperatures we recommend a water seal, see baelz 85800.

## baelz 779

### DESCRIPTION

The flange and housing float switches baelz 779... are used for level monitoring.

### TECHNICAL SPECIFICATIONS

Switching differential:	13 mm
Switching contact:	1 NC contact, 1 NO contact
Contact load AC:	max. 440 V AC/max. 5 A/max. 2000 VA at power factor = 0.4 min.
Contact load DC:	max. 240 V DC max. 1 A, 35 W inductive load max. 2 A, 70 W resistive load
Ambient temperature:	max. 70 °C
Ingress protection rating:	IP 66
Threaded cable gland:	M20 x 1.5 brass nickel-plated

### Float switch with flange for side mounting baelz 779... Magnetic switch without stuffing box

Baelz type	Switch housing	Internal parts	Connection	Temp./Pressure max.	Weight. approx. (kg)
779	Aluminum bronze	Stainless steel	Square flanges 92 x 92 mm	200 °C/18 barg 20 °C/18 barg	3.5
779-2	Die-cast aluminum	Stainless steel	Square flanges 92 x 92 mm	350 °C/19.6 barg 200 °C/33.8 barg 20 °C/33.8 barg	3.5
779-3	Die-cast aluminum	Stainless steel	DN 80, PN 64, DIN 2636	350 °C/30 barg 120 °C/64 barg 20 °C/64 barg	9.5

### Accessories

Baelz type	Product	Data / Notes	Weight. approx. (kg)
ZB779-A00	Square counter flanges for baelz 779 and 779-2	For installation in vessels Delivery includes M12 x 25 studs Dimensions 92 x 92 mm	1

### Housing float switch baelz 779-G

Baelz type	With built-in Float switch	Housing	Screw bolts	Process connection	Temp./Pressure max.	Weight. approx. (kg)
779-G	baelz 779	Steel	Ck-35 - 1.1181	2 x DN 20, PN 40, DIN 2635	200 °C/18 barg 20 °C/18 barg	9.8
779-2-G	baelz 779-2	Steel	Ck-35 - 1.1181	2 x DN 20, PN 40, DIN 2635	350 °C/15.7 barg 180 °C/33.8 barg 20 °C/33.8 barg	9.8

## baelz 783

### DESCRIPTION

Float switch for vertical installation for level monitoring.

### TECHNICAL SPECIFICATIONS

Guide tube:	1.4571; Ø 12 mm
Cylinder float:	1.4571; Ø 44 mm
Process connection:	G 1½; 1.4571
Electrical connection:	aluminum housing 75 x 80 x 57 mm
Temperature / Pressure:	max. -30...+120 °C/16 bar
Ingress protection rating:	IP 65
Switching capacity:	230 V AC; 100 VA; 1 AAC 230 V DC; 50 W; 0.5 A DC
Switching element:	Reed switch
Contacts close when level rises	

### baelz 783 - Contacts: 2 NO contacts

Baelz type	Insertion length (mm)	Switching points (mm)		Weight, approx. (kg)
		top	bottom	
783-520-180-470	520	180	470	1
783-600-200-500	600	200	500	1.05
783-1000-200-950	1000	200	950	1.25
783-1100-200-1000	1100	200	1000	1.3

### baelz 783-1 - Contacts: 3 NO contacts

Baelz type	Insertion length (mm)	Switching points (mm)			Weight, approx. (kg)
		top	middle	bottom	
783-1-520-180-400-470	520	180	400	470	1
783-1-1000-200-900-950	1000	200	900	950	1.25

### baelz 783-4 - Contacts: 4 NO contacts

Baelz type	Insertion length (mm)	Switching points (mm) specify when ordering				Weight. ap- prox. (kg)
		S1 (top)	S2	S3	S4 (bottom)	
783-4-500-S1.../S2.../S3.../S4...	500	min. 55	Please specify desired switching points (S1-S4) when ordering		max. 450	1
783-4-1000-S1.../S2.../S3.../S4...	1000	min. 55	Please specify desired switching points (S1-S4) when ordering		max. 950	1.25

**Note:** Switching points measured from screw-in thread downwards.

Provide suitable contact protection measures to protect the reed contacts, see accessories.

### Extra charges / Accessories

Baelz type	Product	Data
MP783-L-X	Per 100 mm longer insertion length. Specify length in place of X	-
ZB783-RC/24		24 V
ZB783-RC/115	RC elements for protective circuitry of reed contacts with inductive load on AC voltage	115 V
ZB783-RC/230		230 V

**Note:** Amplifier relays for potentially explosive atmospheres available on inquiry (baelz 1781-Ex).

## baelz 1781/5

### DESCRIPTION

Amplifier relay baelz 1781/5 can be used with level probe baelz 1782-4 as electronic sensor for interfaces, e.g. water steam and condensate.

### TECHNICAL SPECIFICATIONS

Input:	control circuit electrode 6 V
Response sensitivity adjustable from:	1...150 kΩ = 1 mS...6.67 µS
Output:	2-pole potential-free changeover contact 250 V / 2 A
Supply:	230 V, 50/60 Hz
Switch cabinet installation:	on standard rails according to DIN 46277
Dimensions (LxHxD):	22.5 x 75 x 99 mm
Weight, approx.:	0.2 kg

## baelz 1782-4

### DESCRIPTION

Level probe baelz 1782-4 can be used with amplifier relay baelz 1781/5. No floats, i.e. no moving parts in the fluid, no sticking, e.g. due to corrosion.

### TECHNICAL SPECIFICATIONS

Material:	stainless steel 1.4571
Head:	light metal die-cast
Ingress protection rating:	IP 54
Connection:	G ½
Electrode length:	100, 200, 250 or 300 mm
Threaded cable gland:	PG 16
Fluid temperature:	max. 220 °C
Pressure:	max. 25 bar
For liquids with a minimum conductivity of 7 µS/cm	

Baelz type	Electrode length (mm)	Weight approx. (kg)
1782-4-100	100	0.6
1782-4-200	200	0.7
1782-4-250	250	0.75
1782-4-300	300	0.8

### Accessories

Baelz type	Product	Weight
ZB1782-KT24914	Enclosed socket 1/2 x 76 mm	approx. 0.07 kg

## baelz 1783/2

### DESCRIPTION

Duct smoke detector for controlling fans and for monitoring ventilation. VdS approved (G210059).

### TECHNICAL SPECIFICATIONS

Sensor:	scattering RM 3.3 (ALK-E)
Relay outputs:	potential-free
Alarm relay locked:	1 changeover contact, 8 A, 250 V AC or 24 V DC 1 NC contact, 8 A, 250 V AC or 24 V DC
Contamination relay:	1 NC contact, 6 A, 250 V AC or 24 V DC
Operating temperature:	-20 °C - +50 °C
Perm. flow:	1 - 20 m/s
Perm. humidity:	10 - 95 % non-condensing
Ingress protection rating:	IP 54
LED display:	contamination level, flashes > 70 % for status indication
LED in housing:	ABS
Housing:	aluminum/plastic
Air measuring tube:	Length 160 mm
<b>1783/2-16...</b>	Length 600 mm
<b>1783/2-60...</b>	230 V AC ± 10 %, 50/60 Hz or 24 V AC (16...27.6 V AC)
<b>Power supply:</b>	24 V DC (21.6...27.6 V DC)
Rated current:	230 V AC: 30 mA 24 V AC/DC: 120 mA
Threaded cable gland:	3 x M16
Weight, approx.:	3 kg

Baelz type	Power supply	Length (mm)
<b>1783/2-16-230VAC</b>	230 V AC	160

<b>1783/2-60-24VAC/DC</b>	24 V AC/DC	600

**Note:** Modbus and BACnet interface on inquiry.

## baelz 466

### DESCRIPTION

Controller with 4 or 6 input contacts for wall mounting.

### TECHNICAL SPECIFICATIONS

Housing:	plastic
Ingress protection rating:	IP 40
Voltage:	230 V, 50/60 Hz
Control voltage:	24 V DC
NC contact:	250 V / 1 A
Dimensions:	(LxHxD) 75 x 150 x 106 mm
Weight, approx.:	0.8 kg

Baelz type	Control circuit	Output
<b>466-4/4</b>	4 input contacts	4 potential-free NO contacts
<b>466-6/3</b>	6 input contacts	3 potential-free NO contacts

## baelz 740-CR

### DESCRIPTION

Vertical high pressure centrifugal pumps available in many designs. Designed for durability under high pressure loads.

### TECHNICAL SPECIFICATIONS

Housing:	cast iron GJL-200 - 5.1300
Impeller, shell,	
intermediate chamber:	1.4301
Shaft 740-CR-1...CR-5:	1.4401
Shaft 740-CR-10:	1.4057
Cartridge mechanical seal, maintenance-free silicon carbide/silicon carbide, elastomers in EPDM	
Operating pressure:	max. 16 bar
Fluid temperature:	0...+120 °C
Media:	neutral fluids: water, oils, etc.
Ambient temperature:	max. +40 °C
Ingress protection rating:	IP 55
Connection:	oval flanges, internal thread connections on one level

**Note:** The maximum inlet pressures must not be exceeded, otherwise the motor bearings will be loaded with excessive axial forces for which they are not designed. The baelz 740-CR model is well suited to this purpose...F-L with additional bearing flange (on inquiry). Even then, the inlet pressure and zero delivery pressure must not exceed the maximum operating pressure.

Baelz type	Motor power (kW)	Max. inlet pressure (bar)	Nominal flow rate (m³/h)	Nominal head (mWs)	Weight, approx. (kg)	Connection
740-CR-1-11	0.55	10	1.8	51	22.5	Rp 1
740-CR-3-9	0.75	10	3	42	23.2	Rp 1
740-CR-5-8	1.1	10	5.8	39	26.2	Rp 1½
740-CR-10-4	1.5	6	10	31.5	45	Rp 2
740-CR-10-8	3	7.5	10	64.5	55	Rp 1½

## baelz 740-S-E

### DESCRIPTION

Condensate pilot as submersible pump baelz 740-S-E... For installation in condensate tank baelz 128-E. Self-priming, vertical submersible centrifugal pump in sectional design made of chrome nickel steel.

### TECHNICAL SPECIFICATIONS

Pump housing:	cast iron GJL-200 - 5.1300
Shaft sealing:	carbide/carbide, FKM
Operating pressure:	max. 16 bar
Fluid temperature:	-10...+90 °C
Media:	neutral fluids: water, oils, etc.
Ambient temperature:	max. +40 °C
Ingress protection rating:	IP 55
Connection:	G ¾ internal thread
Immersion depth:	518 mm

### Rated current table baelz 740

Baelz-740-	Voltage	Rated current (A)
S-E-1-4-37	3 x 220...240 V / 380...415 V, 50 Hz	1.74 / 1.0
S-E-2-4-75	3 x 220...240 V / 380...415 V, 50 Hz	3.3 / 1.9
CR-1-11...	3 x 220...240 V / 380...415 V, 50 Hz	2.5 / 1.44
CR-3-9...	3 x 220...240 V / 380...415 V, 50 Hz	3.3 / 1.9
CR-5-8...	3 x 220...240 V / 380...415 V, 50 Hz	4.95 / 2.85
CR-10-4...	3 x 220...240 V / 380...415 V, 50 Hz	5.45 / 3.15
CR-10-8...	3 x 380...415 V Δ, 50 Hz	6.3
CR-15-3...	3 x 380...415 V Δ, 50 Hz	6.3
CR-15-4...	3 x 380...415 V Δ, 50 Hz	7.9

**Note:** Other models, e.g. other fluids or connections on inquiry. See also our price list.

Baelz type	740-S-E-2-4-75	740-S-E-1-4-37
Motor power (kW)	0.75	0.37
Nominal flow rate (m³/h)	4	2
Nominal head (mWs)	29.5	31
Weight. approx. (kg)	16	15

## baelz 749

### DESCRIPTION

Pump controllers      **baelz 749/1-SEG** for 1 condensate pump  
**baelz 749/2-SEG** for 2 condensate pumps  
 up to max. 1.5 kW, with fault alarm output.

### TECHNICAL SPECIFICATIONS

Pump capacity:	X kW (please specify when ordering)
Coating:	RAL 7035, light gray
Door hinge:	right
Threaded cable gland:	bottom
Supply line:	400 V / 230 V, 50 Hz
With motor-protective circuit-breaker, power protection, control fuse	
Control lamps:	OPERATION / FAULT

Baelz type	Sheet steel housing LxHxD (mm)	Switch	Weight. approx. (kg)	Notes
<b>749/1-SEG-X</b>	300 x 300 x 155	MANUAL / OFF / AUTO	4	-
<b>749/2-SEG-X</b>	380 x 300 x 210	OFF / AUTO / P1 / P2	7	Pump change to auto position in case of restart or fault

**Note:** When ordering, please indicate pump capacity in kW in place of "X" in the type number.

## baelz 70023

### DESCRIPTION

The baelz 70023 is a 2-way flanged isolating valve for industrial applications.

### TECHNICAL SPECIFICATIONS

Material: cast steel or stainless steel

Working fluids for cast steel: gases, water, steam and other non-aggressive fluids

Working fluids for stainless steel: gases, water, stainless steel, food, beverages, aggressive fluids

Plug types: shut-off plug, balancing plug, throttling plug, flat plug

Can be used down to -10 °C

### Materials baelz 70023

	70023...	70023...-VA
Housing	up to DN 40: P250GH - 1.0460 from DN 50: GP2410GH+N - 1.0619+N	GX5CrNiMo19-11 - 1.4408
Spindle	X20Cr13 - 1.4021	X6CrNiMoTi17-12-2 - 1.4571
Plug	up to DN 100: X20Cr13 - 1.4021 from DN 125: P250GH - 1.0460	X5CrNiMo18-10 - 1.4401
Spindle sealing	Stuffing box	
Stuffing box packing	Graphite	Flexible graphite

Baelz type	Equipment
70023	Shut-off plug
70023E	Balancing plug
70023R	Throttling plug, position indicator and locking device
70023R-VA	Throttling plug
70023-VA	Flat plug
Additional option	70023-VA with throttling plug from DN 125 and position indicator on inquiry

### Operating parameters

## baelz 70027

### DESCRIPTION

The baelz 70027 is a maintenance-free 2-way flanged isolating valve for industrial applications. It is equipped with a bellows.

### TECHNICAL SPECIFICATIONS

Material: gray cast iron or stainless steel

Working fluids for gray cast iron: water, steam, thermal oil

Working fluids for stainless steel: general industry, food, beverages, aggressive media

Plug types: throttling plug, flat plug

Metal-to-metal seal

Can be used down to -10 °C

### Materials baelz 70027...

	70027...	70027...-VA
Housing	GJL-250 - 5.1301	GX5CrNiMo19-11-2 - 1.4408
Spindle	Stainless steel	X5CrNiMo18-10 - 1.4401
Bellows and plug	Stainless steel	X6CrNiMoTi17-12-2 - 1.4571
Spindle sealing	Bellows ( 1.4541) and safety gland	2-walled bellows and safety gland
Stuffing box packing	Pure graphite	Flexible graphite

Baelz type	Equipment			Additional option
70027R	Throttling plug up to DN 300			
70027R-F	Flat plug: option from DN 125	Flanged connection, DIN EN 1092-2, flange type 21	With position indicator, stroke limitation and locking device	Non-rising hand wheel  At operating temperatures > 200 °C and with uninsulated valves, the model with high temperature coating must be used - on inquiry
70027R-VA	Throttling plug up to DN 100			
70027-VA	Flat plug DN 125, DN 150		With position indicator  Non-rotating spindle with non-rising hand wheel	Throttling plug from DN 125 and locking device on inquiry

## baelz 70028

### DESCRIPTION

The baelz 70028 is a maintenance-free 2-way flanged isolating valve for industrial applications. It is equipped with a bellows.

### TECHNICAL SPECIFICATIONS

Material: spheroidal iron

Working fluids: water, steam, thermal oil

Plug types: throttling plug, flat plug

Metal-to-metal seal

With position indicator, stroke limitation and locking device

Can be used down to -10 °C

### Materials baelz 70028...

Housing	GJS-400-18-LT - 5.3103
Internal parts	Stainless steel
Spindle sealing	Bellows ( 1.4541) and safety gland
Stuffing box packing	Pure graphite

Baelz type	Equipment	Additional option
baelz 70028R	Throttling plug up to DN 300	
baelz 70028R-F	Flat plug: option from DN 125	
baelz 70028AR	Throttling plug up to DN 150	
baelz 70028AR-F	Flat plug: option from DN 125	At operating temperatures > 200 °C and with uninsulated valves, the model with high temperature coating must be used - on inquiry

## baelz 70075

### DESCRIPTION

The baelz 70075 is a DIN 16720/A compliant manometer isolating valve for industrial applications.

### TECHNICAL SPECIFICATIONS

Material: forged steel or stainless steel

Working fluids for forged steel: liquid, non-aggressive fluids, thermal oil

Working fluids for stainless steel: drinking water, liquid gaseous and aggressive fluids, thermal oil

Silicone-free model

### Materials baelz 70075...

## baelz 70079

### 4-SPINDLE BALANCING AND SHUT-OFF VALVE BLOCK

for differential pressure sensor baelz 819

Housing: brass

Internal parts: stainless steel

Inlet: Process connection G ¼ i incl. cutting ring fitting for Ø 8 mm

Outlet: pipe connection 8 mm

Nominal pressure: PN 40

Temperature / Pressure: max. 120 °C / 40 bar

Weight approx.: 1.5 kg

## baelz 70081

### DESCRIPTION

The baelz 70081 is a flanged check valve for industrial applications.

### TECHNICAL SPECIFICATIONS

Material: gray cast iron, spheroidal iron or stainless steel

Working fluids for cast iron: water, steam

Working fluids for stainless steel: general industry, food, beverages, aggressive fluids

Metal-to-metal seal

Can be used down to -10 °C

### Materials baelz 70081...

## baelz 70082

### DESCRIPTION

The baelz 70082 is a clamp-on check valve for industrial applications.

### TECHNICAL SPECIFICATIONS

Material: DN 15 - 100: brass

DN 125-200: gray cast iron

Working fluids: liquids, gases, steam, non-aggressive fluids

Metal-to-metal seal

Can be used down to -10 °C

### Data and operating parameters baelz 70082

## baelz 70098-CL

### DESCRIPTION

The baelz 70098-CL is a regulating and isolating valve for use in hot water heating systems. It is suitable for coupling ultrasonic sensors to measure volume flow and temperature.

### TECHNICAL SPECIFICATIONS

Body material: gray cast iron

Working fluids: heating water with or without glycol content (max. 60 %). Not suitable for fluids containing mineral oil, steam and fluids which attack EPDM and uncoated cast iron.

Maintenance-free, soft sealing

### Materials baelz 70098-CL

<b>Body, seat</b>	GJL-250 - 5.1301
<b>Spindle</b>	Stainless steel (non-rotating)
<b>Spindle sealing</b>	EPDM profile ring
<b>Throttling plug</b>	Gray cast iron with EPDM sheathing as soft-sealing passage and rear seal

### Data and operating parameters baelz 70098-CL

Nominal pressure	Tmax. / Pmax.	Face-to-face length	Design	Equipment	Sensors
PN 16	max. -10...+120 °C/ 16 bar	EN 558-1/ ISO 5752/1	Flanged connection, DIN EN 1092-2, flange type 21 straight-way type with slanted seat and bonnetless.	Non-rising hand wheel, locking device, stroke limitation, position indicator in percent, insulating cap with dew point lock. Without sensors.	A measuring computer is required to measure volume flow and temperature (see accessories).

### Accessories

ZB70098-CL-201	<b>Sensor set</b> suitable for baelz 70098-CL. Cable length 510 mm. For short-term measurement in connection with measuring computer 70098-MS. Weight approx. 0.2 kg
70098-MS	<b>Measuring computer</b> for short-term measurement. Mobile device (battery-operated) with USB interface for reading in and reading out data. For temperature and flow display. Delivery includes sensors (in connection with baelz 70098-CL).
	Body ingress protection rating
	IP 54
	Ambient temperature (operation)
	5...50 °C
	Measuring range temperature
	-10...+120 °C

## baelz 70098/2

### DESCRIPTION

The baelz 70098/2 is a balancing and isolating valve for use in heating and cooling systems. It offers highest accuracy for hydraulic systems.

### TECHNICAL SPECIFICATIONS

Body material: spheroidal iron

Working fluids: heating water or neutral liquids with or without glycol content (max. 57 %).

Maintenance-free, soft sealing

### Materials baelz 70098/2

<b>Housing</b>	GJS-400-15 - 5.3106
<b>Spindle</b>	Stainless steel
<b>Spindle sealing</b>	EPDM ring
<b>Throttling plug</b>	Stainless steel
<b>Hand wheel</b>	Plastic

### Data and operating parameters baelz 70098/2

Nominal pressure	Tmax. / Pmax.	Remark	Face-to-face length	Design	Equipment
PN 25	120 °C/25 bar	Higher operating temperatures up to max. 150 °C on inquiry.	ISO 5752/1 DIN 3202/T1F1 EN 558-1/1	Flanged connection, straight-way type, slanted seat	With 2 self-sealing measuring nipples Direct digital readout of hand wheel position for precise and easy regulation.

## baelz 70195

### DESCRIPTION

The baelz 70195 is a soft-sealing, centric butterfly valve for use in water heating systems according to DIN EN 12828, air-conditioning, cooling, water supply, drinking water and service water systems.

### TECHNICAL SPECIFICATIONS

Material: spheroidal iron  
 Working fluids: steam  
 Mounting position: any  
 DVGW certified  
 Maintenance-free

### Materials baelz 70195A, baelz 70195GA

Housing	GJS-400-15	5.3106
Shaft	X29CrS13	1.4029
Disk	X4CrNi18-10	1.4301
Ring bellows	EPDM	

### Operating parameters

Baelz type	Nominal pressure	Temperature	Operating pressure	Differential pressure (at ambient temperature)	Permissible flow velocity
70195A	PN 6/10/16	max. -10...+130 °C	max. 6, 10 or 16 bar	DN 20 - 200: max. 16 bar DN 250 + 300: max. 10 bar	max. 4 m/s with water
70195GA	PN 10/16		max. 10 or 16 bar	max. 16 bar	

### baelz 70195

Baelz type	Design	Face-to-face length	Tested
70195A	Semi-lug type body Wafer design		Body, pressure and safety testing according to EN 12266-1/ Leakage rate A and ISO 5208/Category A
70195GA	Full-lug type body. With raised face - suitable for downstream dismantling and dead-end service. <b>With locking hand lever.</b>	EN 558-1-20 and ISO 5752-20

## baelz 70200Rg

### DESCRIPTION

The baelz 70200Rg is a strainer made of red bronze or brass, depending on the size of the housing, for use in heating systems and industrial applications.

### TECHNICAL SPECIFICATIONS

Material: red bronze / brass

Working fluids: neutral liquids, water steam, mineral, heating and hydraulic oils, air and other non-hazardous, non-aggressive gases

With socket connection, internal thread

With replaceable screen available in two mesh sizes

### Materials baelz 70200Rg...

<b>Body G 1/4 - 2</b>	CuSn5Zn5Pb5-C (Rg5)
<b>Body G 2½ - 3</b>	Brass
<b>Head piece</b>	Brass

## baelz 70310-H

### DESCRIPTION

The baelz 70310-H is a float steam trap with flanged connection for drainage of steam systems.

### TECHNICAL SPECIFICATIONS

Material: gray cast iron or spheroidal iron  
 Working fluids: steam, condensate  
 With automatic thermal start-up venting  
 Integrated strainer screen  
 Backflow preventer

### Materials baelz 70310-H...

<b>Body / Hood 70310-H-A...</b>	GJL-250 - 5.1301
<b>Body / Hood 70310-H-C...</b>	GJS-400-18U-LT - EN-JS1049
<b>Float</b>	X6CrNiMoTi17-12-2 - 1.4571
<b>Internal parts</b>	Stainless steel
<b>Screen</b>	X5CrNi18-10 - 1.4301

### Operating parameters baelz 70310-H...

Baelz type	Nominal pressure	Tmax. / Pmax.	Differential pressure

70310-H-A-h-r	Special mounting position horizontal	Inflow from right
70310-H-C-h-r		

**Note:** The steam traps are selected according to the flow diagram; on inquiry.  
 Subsequent modification of the mounting position on site in accordance with conversion instructions is possible.  
 Stainless steel steam trap on inquiry. Observe specifications / restrictions of the regulations!

## baelz 70311-H

### DESCRIPTION

The baelz 70311-H is a thermal bimetallic steam trap with flanged or threaded socket connection for the discharge of slightly to strongly subcooled condensate. It is equipped with a corrosion-resistant, water hammer-resistant bimetallic regulator for automatically venting during start-up and operation.

### TECHNICAL SPECIFICATIONS

Material: heat-resistant constructional steel  
 Working fluids: steam, condensate  
 Automatic venting  
 With external strainer screen  
 Backflow preventer

### Materials baelz 70311-H...

<b>Housing</b>	P2250GH - 1.0460
<b>Sealing cap</b>	DN 15 - 25: P2250GH - 1.0460
<b>Cover</b>	DN 40 + 50: P2250GH - 1.0460
<b>Internal parts</b>	Stainless steel
<b>Screen</b>	X5CrNi18-10 - 1.4301
<b>Temperature sensor</b>	Corrosion-resistant bimetal

### Operating parameters baelz 70311-H...

Nominal pressure	Tmax. / Pmax.	Differential pressure	Inlet pressure

## baelz 70341

### DESCRIPTION

The baelz 70341 is a high performance diaphragm safety valve for heat generation plants with flow temperatures of 120°C. For plants according to DIN 4751 part 2.

### TECHNICAL SPECIFICATIONS

Component-tested, code letters D/G/H

Flanged connection, angle type

**With closed protective bonnet and open lift housing**

**Actuation overpressure component tested:**

**DN 20:** from 2.4 bar to 10 bar

**DN 25 - 100:** from 1.0 bar to 10 bar

Actuation overpressure below 1 bar on inquiry.

**Please specify actuation overpressure when ordering!** For certificates or attestations, see supplementary charges

## baelz 70500

### DESCRIPTION

The baelz 70500 is a 2-way socket valve with hand wheel for use in heating systems and industrial applications.

### TECHNICAL SPECIFICATIONS

Material: red bronze or stainless steel

Working fluids for red bronze: non-flammable, non-toxic liquids, steam and gases

Working fluids for stainless steel: water, oils, gases, alkalis, chemical, petrochemical, pharmaceutical and food products

Materials baelz 70500	
<b>Housing</b>	Red bronze CC491K
<b>Bonnet</b>	Screwed in, brass CW612N
<b>Plug seal</b>	PTFE

Materials baelz 70500-VA

## baelz 70512

### DESCRIPTION

The baelz 70512 is a flow measurement and regulating valve with hand wheel for fine adjustment and for use in central heating and cooling systems (not for steam).

### TECHNICAL SPECIFICATIONS

Material: red bronze

Working fluids: water

DN 15 - 32 DVGW-tested

### Materials baelz 70512

<b>Body / Head piece</b>	Red bronze CC491K
<b>Plug / Spindle</b>	Brass (Ms-EZB), resistant to dezincification
<b>Plug seal</b>	PTFE

**Note:** Ball valves in other designs and materials, e.g. for drinking water installations or with temperature indicator available on inquiry.

## baelz 70625

### DESCRIPTION

The baelz 70625 is a diaphragm safety valve for closed water heaters according to DIN 4753, part 1 and DIN 1988. KTW recommendations for drinking water are observed.

### TECHNICAL SPECIFICATIONS

Material: brass  
Working fluid: water  
Spring load not adjustable  
Component-tested, code letter W

#### Materials baelz 70625...

<b>Body and cover</b>	Brass, angle type
<b>Screw-in part</b>	<b>Up to 6 bar:</b> High-quality plastic <b>Over 6 bar:</b> Brass
<b>Spring bonnet</b>	High-quality plastic

## baelz 70625-H4

### DESCRIPTION

The baelz 70625-H4 is a safety valve for closed, thermostatically secured water heating systems with flow temperatures up to 120 °C, according to DIN EN 12828 / TRD 721, for all static heights or nominal outputs above 350 kW as well as solar systems according to DIN 4757, part 1 and 2.

### TECHNICAL SPECIFICATIONS

Material: red bronze

Working fluids: water, liquids, gases, steam

Component-tested, code letters D/G/H

### Materials baelz 70625-H4...

<b>Housing</b>	Red bronze, bronze bellows with metallically supported O-ring EPDM, glycol-resistant
<b>Pressure spring</b>	Stainless steel
<b>Internal parts</b>	Brass

**Note:** In order to achieve the highest possible heat output, 3 valves may be installed per system.  
Performance table for actuation overpressure >10 bar on inquiry.

### Data and operating parameters baelz 70625-H4...

Temperature	Actuation overpressure (factory-set)	Mounting position	Connection
max. 120 °C	0.5...25 bar See performance table	Spring bonnet vertically upwards	Inlet/Outlet: Internal thread

## baelz 70703

### Comb-profiled seal

for manometers and manometer isolating valves

**70703** Material: copper

**70703-VA** Material: XCrNiMoTi17-12-2 1.4571

Weight G 1/4 approx.: 0.09 g (70703-G 1/4 and 70703-VA-G 1/4)

Weight G 1/2 approx.: 0.25 g (70703-G 1/2 and 70703-VA-G 1/2)

## baelz 70705

### Sealing discs G 1/2

Suitable for clamping sleeves baelz 70700...

**70705-G 1/2** Material: copper

**70705-VA-G 1/2** Material: XCrNiMoTi17-12-2 1.4571

## baelz 70730

### Valve fluid level indicator with spigot connection

Upper and lower shut-off, bottom with drain valve

Material: brass

Connection: G 1/2, spigot connection

For glass tube: outer Ø/inner Ø 13/10 mm

Supplied without glass tube

**Nominal pressure:** PN 16

Temperature/Pressure: max. 200 °C/16 bar (see note)

Weight approx.: 0.8 kg

**Note:** Observe the given operating conditions of the glass tubes.  
Glass tubes see baelz 70749

## baelz 70749

### Duran glass tubes

Alkali resistant

Material: borosilicate glass

Temperature/Pressure: max. 200 °C/16 bar

baelz 70749

Baelz type	Length (mm)	Diameter (mm)	Weight approx. (kg)
70749-13x1.5-1000 mm	1000	13 x 1.5	1
70749-13x1.5-1500 mm	1500	13 x 1.5	1.5

## baelz 70802

### Bourdon tube manometer

DIN 16063/16064

Class: 1.6

Wetted parts: copper alloy

Ambient temperature: -25...+60 °C

Fluid temperature: up to + 60 °C (see note)

Connection: G ½A, bottom

Silicone-free model

**70802-100-u:** Body: steel, painted black with chrome-plated slip ring  
Ø100 mm, external thread

Weight approx.: 0.4 kg

**Note:** A water seal must be provided  
for higher temperatures, see baelz 85800...  
Manometer valves see baelz 70075

### baelz 70802

Baelz type	Display range (bar)
70802-100-u-4	0...4
70802-100-u-6	0...6

70802-100-u-40	0...40

## baelz 70804

### Glycerine filled Bourdon tube manometer

Class: 1.0

Wetted parts: copper alloy

Ambient temperature: -25...+60 °C

Fluid temperature: up to + 60 °C (see note)

Connection: G ½A, bottom

Connection: G ½A, rear

**70802-100-u:** Body: steel, painted black with bayonet ring  
Ø100 mm, external thread

Weight approx.: 1.2 kg

**Note:** A water seal must be provided  
for higher temperatures, see baelz 85800...  
Manometer valves see baelz 70075

#### baelz 70806-VA

70806-VA-100-u-40	0...40

## baelz 70806-VA

### Bourdon tube manometer

Class:	1.0
Ingress protection rating:	IP 54
Wetted parts:	X6CrNiMoTi17-12-2 1.4571
Ambient temperature:	-25...+60 °C
Fluid temperature:	up to + 180 °C (see note)
Connection:	G ½A, bottom
Media:	gaseous, liquid, aggressive, not highly viscous and not crystallizing fluids, also in aggressive environment
70802-VA-100-u:	Body: stainless steel, (bayonet ring case) Sight glass: instrument glass Ø100 mm, external thread
Weight approx.:	0.4 kg

**Note:** A water seal must be provided for higher temperatures, see baelz 85800... If a water seal is not possible, e.g. for space reasons, please ask for our special designs.

Manometer valves see baelz 70075

## baelz 71150-TM-VA

### Bimetallic dial thermometer

Display accuracy:	class 1
Body / Ring:	stainless steel
Stem:	stainless steel
Sight glass:	flat instrument glass
Body Ø:	100 mm
Measuring element:	bimetal coil
Ingress protection rating:	IP 43
Stem length:	63, 100 or 160 mm including stainless steel protection tube G ½, 1.4571
Connection:	rear
Operating pressure:	max. 25 bar
Weight approx.:	0.4 kg

### Type designations baelz 701150-TM-VA

## baelz 81900

### Dished ends

DIN 28011

Material: P265GH - 1.0425

Design: made of cold formed sheet metal,  
edge VA (V-seam external)  
with hard stamping

### Weights baelz 81900

Baelz type	Weight (kg)
81900-21.3 x 3 mmØ	0.05
81900-26.9 x 3 mmØ	0.06
81900-33.7 x 3 mmØ	0.07
81900-42.4 x 3 mmØ	0.08
81900-48.3 x 3 mmØ	0.2
81900-60.3 x 3 mmØ	0.2

81900-139.7 x 4 mmØ	1.0
81900-168.3 x 5 mmØ	1.7
81900-219.1 x 6 mmØ	3.3
81900-273.0 x 6 mmØ	4.8
81900-323.9 x 7 mmØ	7.6

## baelz 85850

### Water seals

to protect manometers from overheating.

For baelz Bourdon tube manometers and for baelz 826, 828, 831 and 835

Consisting of:  
1 x siphon  
1 x manometer isolating valve  
seals

Temperature/Pressure: max. 200 °C/25 bar  
Weight approx.: 0.8 kg

baelz 85850 In steel

## baelz 85892

### Water seals

to protect manometers from overheating.

For safety pressure switches baelz 834

Consisting of:  
1 x siphon  
seals

Temperature/Pressure: max. 200 °C/25 bar  
Weight approx.: 0.3 kg

### baelz 85892 in steel

baelz 85950

## baelz 85950

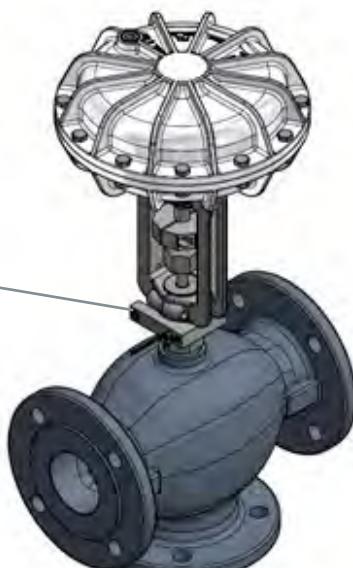

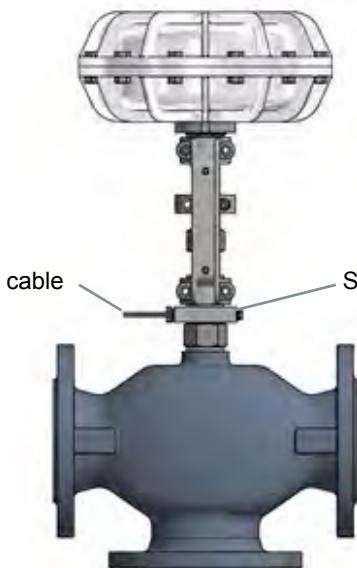

### STUFFING BOX HEATING

- protects the valve spindle against icing up
- for fluid temperatures between -10...- 40°C
- junction box optional

### APPLICATION

Standard version for spindle Ø10 mm or Ø16 mm  
For spindle Ø22 mm on request

Technical specifications, baelz 85950		
<b>Power supply</b>	12-24 V AC/DC or 110-230 V AC/DC	
<b>Maximum power (W)</b>	20	
<b>Ambient temperature (°C)</b>	-20...+50	
<b>Cable length (mm)</b>	2000	
<b>Protection rating</b>	SK II	
<b>Dimensions (approx., mm)</b>	70 x 67 x 15	
<b>Weight (approx., kg)</b>	0.1	
<b>Type baelz</b>	<b>Spindle Ø (mm)</b>	<b>Power supply</b>

## Spare parts for baelz 265st-SK3

Product	Data
Solenoid complete	230 V, 50 Hz
Plug stem complete	For seat Ø 2.5, 3, 4 and 5 mm; consisting of: Plug stem KT 9640 Holder KT 9434 Anchor KT 22594 Rivet pin
Plug stem	For seat Ø 2.5, 3, 4 and 5 mm

## Spare parts for baelz 265st-K16-230

Product	Data
Solenoid complete	230 V, 50 Hz
Spindle	For seat Ø 6, 8 and 10 mm
Plug	For seat Ø 6 and 8 mm, for seat Ø 10 mm

Note: For order numbers, prices and more detailed product data, see the current Baelz price list.

## Spare parts for baelz 334 / 334-1 and 335 / 335-1

Nominal pressure PN 16 / 25

Product	Data / Notes	
Plug stem	G ½... G 1½	Kvs 3.53... 22
V-ring packing in PTFE for baelz 335	Consisting of:	1 set of V-rings in PTFE 10 x 18 x 10.4 mm 2 shim rings 12 x 18 x 0.5 1 pressure spring KT 9417 2 DU bushings 1010
V-ring packing in PTFE for baelz 335-1	Consisting of:	1 set of V-rings in PTFE 10 x 18 x 10.4 mm, 2 shim rings 12 x 18 x 0.5 1 pressure spring KT 9417 2 DU bushings 1010 including wiper set
O-ring	EPDM 44 x 2 mm / 48 x 2 mm	
Socket seals (1 set)	G ½... G 1½	
Weld-on sockets	G ½... G 1½	
Stainless steel weld-on sockets	G ½... G 1½	
Threaded sockets 2-fold	G ½...G1	for two-way valves
Threaded sockets 3-fold	G ½...G1	for three-way valves
Union nut	G ¾...G2	

## Spare parts for baelz 340-2/342-2/347-2... Without bellows

Nominal pressure PN 16, 25 and 40 or as specified in the Baelz price list

Product	Data / Notes	
Plug stem for 340-2/342-2/347-2-B 340-2/342-2/347-2-BK	DN 15...125	Kvs 2...200

**Note:** Information on our packings can be found in our operating instructions MBA 334-367.

If the spindle surface is damaged, the plug spindle must also be replaced.

## Spare parts for baelz 373-E07

Order number	Product	Data / Notes
99373-051		C: 0.36 µF/500 V incl. 100 Ω/1 W 230 V, 50/60 Hz (220...240 V)
99373-053	Motor type RSM63/8 SG including motor pinion KT 24669 and capacitor as specified	C: 1.65 µF/250 V incl. 18 Ω/0.25 W 115 V, 50/60 Hz
99373-055		C: 0.36 µF/63 V 24 V, 50/60 Hz

For drive, elevating spindle and intermediate ring, see Baelz price list

Motor

Capacitor

## Spare parts for baelz 373-E11

See Baelz price list for	motor type RSM63/8 SG incl. motor pinion KT 24669 and capacitor Diode board with integrated capacitor Solenoid including diode board and capacitor Elevating spindle
--------------------------	---

**Note:** Replacement yokes see order no. 99.0S373-923/-924

For a smooth process, please indicate the exact data of the nameplate when ordering.

## Spare parts for baelz 373-E40

Order number	Product	Data / Notes
99373-091		C: 0.6 µF/400 V incl. 100 Ω/1 W 230 V, 50/60 Hz (220...240 V)
99373-093	Motor type RSM842/3F (replacement for RSM 842/3ANK) including motor pinion KT 9340 and capacitor as specified	C: 2.5 µF/200 V incl. 10 Ω/0.25 W 115 V, 50/60 Hz (110...120 V)
99373-095		C: 48 µF/45 V 24 V, 50/60 Hz

For potentiometer pinion (please order guide), elevating spindle and threaded sleeve, see Baelz price list

## Spare parts for baelz 373-E45

See Baelz price list for	Motor Board complete, including capacitor - When converting to a different voltage, also order the corresponding board.
--------------------------	---

**Note:** For order numbers, prices and more detailed product data, see the current Baelz price list.

## Replacement capacitors and limit switches

[See Baelz price list](#)

Capacitor

Load-dependent limit switches

## Spare parts for pneumatic actuators baelz 373-P21... and P22...

Product	Data / Notes	
NBR rolling diaphragm and clamping band	Stainless steel clamping band	
Silicone diaphragm and clamping band	Stainless steel clamping band	For ambient temperatures up to max. 100 °C
Clamping band	Stainless steel	
Seal set complete for 373-P21.../P22...	Consisting of:	O-ring 38 x 2.5 NBR-WS 636 2 DU bushings 1215 DU-B 1 sealing element QHLP12x22 NBR-80118 2 snap ring 7993-B18
Seal set complete for 373-P21L.../P22L...	Consisting of:	O-ring 38 x 2.5 NBR-WS 636 2 DU bushings 1215 DU-B 1 sealing element QHLP12x22 NBR-80118 1 snap ring 7993-B22
Diaphragm plate	for baelz 373-P21... and P22...	
Spindle	Stainless steel	Take actuator type and operating direction into account when ordering
Pressure spring	Take actuator type and operating direction into account when ordering	

**Note:** Replacement yokes see order no. 99.0S373-923/-924

NBR rolling diaphragm and clamping band

Silicone diaphragm and clamping band

Pressure spring

Diaphragm plate

Seal set

**Note:** For order numbers, prices and more detailed product data, see the current Baelz price list.

## Spare parts for pneumatic actuators baelz 373-P31/P32... and P41...

Product	Data / Notes	
NBR rolling diaphragm and clamping band for baelz 373-P31/P32...	Stainless steel clamping band incl. 2 x DIN 912 M5 x 25	
NBR rolling diaphragm and clamping band for baelz 373-P41...	Stainless steel clamping band incl. 2 x DIN 912 M6 x 30	
Clamping band for baelz 373-P31/P32...	Stainless steel	incl. 2 x DIN 912 M5 x 25
Clamping band for baelz 373-P41...	Stainless steel	incl. 2 x DIN 912 M6 x 30
Seal set complete	Consisting of:	2 DU bushings 2225 DU-B 1 sealing element QHLP22-32 NBR-80118 2 snap ring 7993-B32
Diaphragm plate	for baelz 373-P31... and P32... / for baelz 373-P41... and P41-V6 (note actuator type)	
Spindle	Stainless steel	Take actuator type and operating direction into account when ordering
Pressure spring	Take actuator type and operating direction into account when ordering	

**Note:** Replacement yokes see order no. 99.0S373-911...922

NBR rolling diaphragm and clamping band for baelz 373-P31/P32...

NBR rolling diaphragm and clamping band for baelz 373-P41...

Pressure spring

Seal set

**Note:** For order numbers, prices and more detailed product data, see the current Baelz price list.

## Aluminum yoke S21... / Stainless steel yoke S23 / Galvanized steel yoke S41...

<b>Aluminum yokes S21/S21L</b>	Standard model incl. coupling and fixing screws, galvanized steel
<b>Aluminum yokes S21-BS/S21-L-BS</b>	With polyester coating incl. coated coupling, color black RAL 9005, stainless steel fixing screws
<b>Stainless steel yoke S23</b>	Incl. coupling and fixing screws, for spindle Ø max. 16 mm, stroke max. 40 mm <b>For motor actuators 373-E66-80-25...</b> <b>For high differential pressures</b>
<b>Galvanized steel yoke S41...</b>	Incl. coupling and fixing screws, for spindle Ø 22mm <b>For pneumatic actuators baelz 373-P31, -P32 and -P41</b> <b>and motor actuators 373-E45, -E66 (DN 150) and -E88 (from DN 150)</b>
Product	Data / Notes
<b>S21</b>	For control valves with spindle Ø 10 mm (G1/8)
<b>S21-BS</b>	For control valves with spindle Ø 10 mm (G1/8)
<b>S21-L</b>	For control valves with spindle Ø 16 mm (M12)
<b>S21-L-BS</b>	For control valves with spindle Ø 16 mm (M12)
<b>Hand wheel</b>	For manual change of stroke via manual release on motor actuators. Consisting of: 2 x hand wheel segment KT 7691 2 x DIN 912 M6 x 30 - 8.8 2 x DIN 934 M6
<b>S23</b>	For control valves with spindle Ø max. 16 mm
<b>S41</b>	For control valves without cooling tube
<b>S41-C</b>	For control valves with cooling tube
<b>Coupling</b>	For steel yokes S31/-C and S41/-C Consisting of: coupling KT 9616 Lug KT 8015 Sheet metal plate KT 8182 2 x DIN EN 24017 M6 x 16 - 8.8 2 x DIN 914 M6 x 10 - 45H 4 x DIN 912 M8 x 30 - 8.8

Aluminium yoke S21  
(built-in)

Steel yoke S41  
(built-in)

Stainless steel yoke S23  
(built-in)

Note: For order numbers, prices and more detailed product data, see the current Baelz price list.

## Spare parts for baelz 373-E03-40-3

Order number	Product	Data / Notes
99375-001		C: 0.2 µF/500 V incl. 100 Ω/1 W 230 V, 50/60 Hz
99375-003	Motor for rotary actuator type RSM 51/8 (replacement for RSM 50/8 FG) incl. motor pinion KT 5479 and capacitor as specified	C: 0.82 µF/200 V incl. 33 Ω/0.25 W 115 V, 50/60 Hz
99375-005		C: 20 µF/40 V 24 V, 50/60 Hz

## Spare parts for baelz 373-E03-20-0,7

Order number	Product	Data / Notes
99375-011		C: 0.2 µF/500 V incl. 100 Ω/1 W 230 V, 50/60 Hz
99375-013	Motor for rotary actuator type RSM 51/8 (replacement for DRSM 50/8 ES NG) incl. motor pinion KT 5479 and capacitor as specified	C: 0.82 µF/200 V incl. 33 Ω/0.25 W 115 V, 50/60 Hz
99375-015		C: 20 µF/40 V 24 V, 50/60 Hz

## Spare parts for baelz 373-E03-12-0.25

Order number	Product	Data / Notes
99375-021		C: 0.2 µF/500 V incl. 100 Ω/1 W 230 V, 50 Hz
99375-022		C: 0.2 µF/500 V incl. 100 Ω/1 W 230 V, 60 Hz
99375-023	Motor for rotary actuator type RSM 51/8 incl. motor pinion KT 5479 and capacitor as specified	C: 0.82 µF/200 V incl. 33 Ω/0.25 W 115 V, 50 Hz
99375-024		C: 0.82 µF/200 V incl. 33 Ω/0.25 W 115 V, 60 Hz
99375-025		C: 20 µF/40 V 24 V, 50 Hz
99375-026		C: 20 µF/40 V 24 V, 60 Hz

## Spare parts for baelz 373-E41-150-1

Order number	Product	Data / Notes
99375-053		C: 0.68 µF/500 V incl. 100 Ω/1 W 230 V, 50/60 Hz
99375-055	Motor for rotary actuator type RSM 51/8 (replacement for DRSM 50/8 ES NG) incl. motor pinion KT 5479 and capacitor as specified	C: 2.7 µF/250 V incl. 50 Ω/0.25 W 115 V, 50/60 Hz
99375-057		C: 57 µF/63 V 24 V, 50/60 Hz
99375-3823	Board complete	with capacitor 0.68 µF 230 V, 50/60 Hz
99375-3236	Stem gear	

**Note:** For a smooth process, please indicate the exact data of the nameplate when ordering.

**Note:** For order numbers, prices and more detailed product data, see the current Baelz price list.

## Spare parts for baelz 471/471-1...4

Nominal pressure PN 16 / 25

Product	Data / Notes	
Plug stem	Suitable for G ½... G 1½	Seat Ø 3...16 mm
Connection cover	Suitable for G ½... G 1½	Nozzle Ø 3...16 mm
Spring cage	for baelz 471/471-1...3 / for baelz 471-4	
Pressure screw	for baelz 471/471-1...3 / for baelz 471-4	
Connecting piece		
V-ring packing in PTFE for baelz 471/471-1...3	Consisting of:	1 set of V-rings in PTFE 10 x 18 x 10.4 mm 2 shim rings 12 x 18 x 0.5 1 pressure spring KT 9417 2 DU bushings 1010
V-ring packing in PTFE for baelz 471/471-4	Consisting of:	1 set of V-rings in PTFE 10 x 18 x 10.4 mm incl. wiper set 2 shim rings 12 x 18 x 0.5 1 pressure spring KT 9417 2 DU bushings 1010
O-rings	EPDM 44 x 2 mm (orderNo. K30000437) / EPDM 48 x 2 mm (orderNo. K30000566)	
Socket seals	G ½... G 1½	Consisting of 4 special seals
Weld-on sockets	G ½... G 1½	Steel St. 37
Stainless steel weld-on sockets	G ½... G 1½	
Threaded sockets 3-fold	G ½... G 1	Brass
Union nuts	G ¾...G2 (for G ½... G 1½)	Brass

## Spare parts for baelz 475, 480 and 590

For spare parts for baelz 475, 480 and 590, nozzle drivers for disassembly/assembly of baelz 480 and 590 nozzles and universal keys, please refer to the Baelz price list.

Please note that when exchanging the plug stem 480-1 for 480-3, from nozzle Ø 16 mm, the threaded connector KT 9412 must be exchanged for KT 22824.

From DN 80, the threaded connector KT 22824 is already included with 480-1, regardless of the nozzle diameter, so that no replacement is required.

V-ring sets see baelz 91030...

Union nut for baelz 480

Connecting piece for baelz 480

Threaded connector for baelz 480

Diffuser seal for baelz 480

Nozzle for baelz 480

Head piece for baelz 475

Nozzle driver for baelz 480 and 590

Note: For order numbers, prices and more detailed product data, see the current Baelz price list.

## Lubricating and assembly pastes

Order number	Product	Data / Notes
92000-001	High-performance grease paste, silicone-free 70 g cartridge	For V-ring sets
92000-101	High-performance grease paste, silicone-free 50 g can	For drive spindles (apply thinly)
G51000462	Assembly paste 150 ml	For extremely high temperatures -20 °C...1200 °C For light assembly/disassembly work / tight-fit connections For plugs, threads, screws, nuts, bolts, etc. (not suitable as lubricant for moving parts such as sliding bearings, roller bearings, etc.) corrosion-inhibiting, prevents seizure, waterproof, silicone-free (apply thinly)
92300-001	Assembly paste 50 g can	White high-temperature lubricating and assembly paste, max. 1200 °C For food, drinking water and pharmaceutical industry <b>NSF H1 registered</b> (meets FDA requirements) For light assembly/disassembly work For plugs, threads, screws, nuts, bolts, etc. corrosion-inhibiting, prevents seizure, waterproof, silicone-free (apply thinly)

Assembly paste OrderNo. 92000-001

Assembly paste OrderNo. 92000-101 / 92300-001

Assembly paste OrderNo. G51000462

Note: For order numbers, prices and more detailed product data, see the current Baelz price list.
