Maximum differential pressure ΔP_{max} (bar) at which the actuator closes the valve completely
The differential pressures specified here are limited by the nominal pressure of the housings, if this is lower.

Pneumatic actuators. 3-way valves as diverting valves. Plug closes in direction of flow.

Actuator baelz 373-	Power (N)	req. feed pressure (bar)	DN (mm) / maximum differential pressure ΔP_{max} (bar)

Deploy all diverting valves only up to 0.6 bar differential pressure.
If a diverting valve with > 0.6 bar is required, a valve with > 0.6 bar is required,
a damping device must be provided on the actuator.
